If visible evidence of active or previous infestation of listed wood destroying insects is reported, it should be associated and proposed or previous treatment. The degree of structural damage. Evaluation of corrective action should be performed by a qualified to give an opinion regarding the degree of structural damage. Evaluation of corrective action should be performed by a qualified expert.  F. THIS IS NOT A STRUCTURAL DAMAGE REPORT OR A WAR		
inaccessible areas include but are not limited to (1) areas concealed by wall coverings, turturue, extractive (5) (including appearance of the structure). Inspection does not cover any condition or damage which was not visible in or a at time of inspection but which may be revealed in the course of repair or replacement work.  **C. Due to the characteristics and behavior of various wood destroying insects, it may not always be possible to det infestation without defacing or removing parts of the structure being inspected. Previous damage to trim, wall surface, repaired prior to the inspection with putty, spackling, tape or other decorative devices. Damage that has been concealed by visible except by defacing the surface appearance. The WDI inspecting company cannot guarantee or determine by a previous pest control company, as indicated by visual exidence of previous treatment, has (s) inactive.  **D. If visible evidence of active or previous infestation of listed wood destroying insects is reported, it should be associated as the previous of the visually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of corrective action should be performed by a qualified expert.  **E. If visible evidence is reported, it does not imply that damage should be repaired or replaced. Inspectors of the usually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of corrective action should be performed by a qualified expert.  **E. This is NOT A STRUCTURAL DAMAGE REPORT OR A WARRANTY AS TO ABSENCE OF WOOD DESTIMED of the property of the property. The inspection of the structure of the property. The inspection groups has been recommended, the treating company applicator in the termite category. Information regar		20 40
infestation without defacing or removing parts of the structure being inspected. Prevolution and part and the repealed prior to the inspection with putty, spackling, tape or other decorative devices. Damage that has been concealed be visible except by defacing the surface appearance. The WDI inspecting company cannot guarantee or determine performed by a previous pest control company, as indicated by visual evidence of previous treatment, has (3) inactive.  Note: If visible evidence is reported, it does not imply that damage should be repaired or replaced. Inspectors of the usually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of corrective action should be performed by a qualified expert.  F. THIS IS NOT A STRUCTURAL DAMAGE REPORT OR A WARRANTY AS TO ABSENCE OF WOOD DESTINATION of the structure(s) inspected and proposed for treatment, label of pesticides to be used and complete details of aminimum, the warranty must specify which areas of the structure(s) are covered by warranty, renewal options and app applicator in the termite category. Information regarding treatment and any warrantes should be provided by the party of termite control options offered by pest control companies. These options will vary in cost treated, warranties, treatment techniques and renewal options.  J. There are a variety of termite control options offered by pest control companies. These options will vary in cost treated, warranties, treatment techniques and renewal options.  J. There are some specific guidelines as to when it is appropriate for corrective treatment to be recommended of (1) there is visible evidence of an active infestation in or on the structure, (2) there is visible evidence of an active infestation with no evidence of a prior treatment.  J. It treatment is recommended abased solely on the presence of conducive conditions, a preventive treatment or conditions may be recommended. The buyer and seller should be aware that there may be a variety of diff	he surface the struct	ture(s)
E. If visible evidence is reported, it does not imply that damage should be repaired or replaced. Inspectors of the usually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of corrective action should be performed by a qualified to give an opinion regarding the degree of structural damage. Evaluation of corrective action should be performed by a qualified expert.  F. THIS IS NOT A STRUCTURAL DAMAGE REPORT OR A WARRANTY AS TO ABSENCE OF WOOD DESTING The importance of the structure(s) inspected and proposed for treatment, label of pesticides to be used and complete details of a minimum, the warranty must specify which areas of the structure(s) are covered by warranty, renewal options and applicator in the termitic category. Information regarding treatment and any warranties should be provided by the party services to any prospective buyers of the property. The inspecting company has no duty to provide such information to an the contracting parity.  H. There are a variety of termitic control options offered by pest control companies. These options will vary in cost treated, warranties, treatment techniques and renewal options.  I. There are some specific guidelines as to when it is appropriate for corrective treatment to be recommended. Confuly be recommended if (1) there is visible evidence of an active infestation in or on the structure, (2) there is visible evidence of the property o	r repaired m	nay not
issually are not engineers or builders qualified expert.  F. THIS IS NOT A STRUCTURAL DAMAGE REPORT OR A WARRANTY AS TO ABSENCE OF WOOD DESTION  G. If termite treatment (including posticides, baits or other methods) has been recommended, the treating compared on information the structure(s) inspected and proposed for treatment, label of pesticides to be used and complete details of a minimum, the warranty must specify which areas of the structure(s) are covered by warranty, renewal options and app applicator in the termite category. Information regarding treatment and any warranties should be provided by the party services to any prospective buyers of the property. The inspecting company has no duty to provide such information to at the contracting party.  H. There are a variety of termite control options offered by pest control companies. These options will vary in cost treated, warranties, treatment techniques and renewal options.  I. There are some specific guidelines as to when it is appropriate for corrective treatment to be recommended. Or only be recommended if (1) there is visible evidence of an active infestation in or on the structure, (2) there is visible evid infestation with no evidence of a prior treatment.  I. If treatment is recommended based solely on the presence of conducive conditions, a preventive treatment or conditions may be recommended. The buyer and seller should be aware that there may be a variety of different strategic conducive condition(s). These corrective measures can vary greatly in cost and effectiveness and may or may not require licensed pest control operator. There may be instances where the inspector will renormend correction of the conducive mechanical alteration or cultural changes. Mechanical alteration may be in some instances the most economical method conditions. If this inspection report recommends any type of treatment and you have any questions about this, you may involved, another licensed pest control operator for a second opinion, and/or the Structural Pest Con	ned that sor	me
G. If termite treatment (including pesticides, baits or other methods) has been recommended, the treating comparidiagram of the structure(s) inspected and proposed for treatment, label of pesticides to be used and complete details of a minimum, the warranty must specify which areas of the structure(s) are covered by warranty, renewal options and app applicator in the termite category. Information regarding treatment and any warranties should be provided by the party of services to any prospective buyers of the property. The inspecting company has no duty to provide such information to at the contracting party.  H. There are a variety of termite control options offered by pest control companies. These options will vary in cost treated, warranties, treatment techniques and renewal options.  I. There are some specific guidelines as to when it is appropriate for corrective treatment to be recommended. On only be recommended if (1) there is visible evidence of an active infestation in or on the structure, (2) there is visible evidence of the property in the presence of conductive conditions, a preventive treatment or of conditions may be recommended. The buyer and seller should be aware that there may be a variety of different strategic conductive conditions,). These corrective measures can vary greatly in cost and effectiveness and may or may not requirilizensed pest control operator. There may be instances where the inspector will recommend correction of the conductive conditions.
