- Only Jericho employees on your job, NO subcontractors
- We stand behind our Lifetime Transferable Warranty
- Extra care taken to preserve landscaping
- Most repairs completed in 2-3 days
- Member of Foundation Repair Association

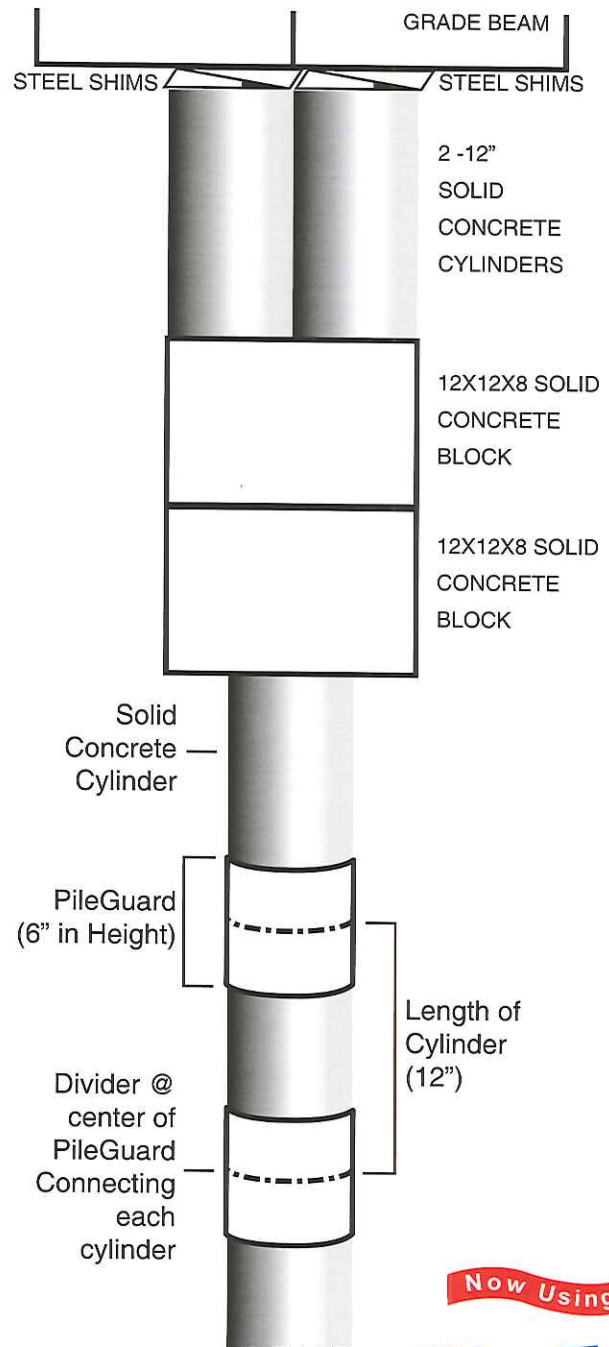

Permanent Repair, Proven with Thousands of Homeowners

Jericho uses the PileGuard piling system of foundation repair. This advanced system consists of pre-cast concrete piles, aligned and held together in a high-density plastic sleeve, that are driven into the ground until absolute refusal. The pressure on each piling is enough to support up to five times the weight of the structure. Where traditional systems might stop at a predetermined depth of 12 feet, our method allows us to go into the ground as needed to do the job right.

The system is tested and approved by engineers. And has been re-approved by the thousands of satisfied homeowners whose foundations were corrected by this method.

We carry General Liability Insurance on every job. Our employees are covered by Texas Workers' Comp Insurance. Insurance certificates are available upon request.

- Visa/MC, Discover, American Express accepted
- References available
- Our estimates have always been free
