

## White House Upgrades

This house was built using all natural compounds and was designed to be eco-friendly and hypoallergenic. The previous owners lived a very organic and all natural lifestyle and did not allow any toxic chemicals to be used in the house or the yard. The owners were very particular about using organic, natural, and eco-friendly building materials from reputable, trusted suppliers for protecting their health from the plethora of toxic compounds found in conventional building supplies. Many building materials today contain toxins like formaldehyde, VOCs, and fire retardants, all of which [disrupt hormone function](#) and negatively affect you and your family's health in a myriad of ways. While building materials don't have the same organic certification process as food, it is possible to find paint, adhesives, grout, insulation, sheetrock and other materials made with organic or natural ingredients.

Below is a list of the all natural systems added

~ **Eco SmarteWhole House Water Purification System:** An advanced method of water purification with state-of-the-art electronic ionization, oxidation, and multimedia filtration (Activated Carbon and Hydroxite). Single or dual electrode ionization has been used in industrial applications for over 50 years, but in conjunction with dual media filtrations and oxygen are the basis for our proprietary technology. Now the technical advances have made it economical and practical for residential application. Replaces the use of water softeners, iron filters, chemical feeders, taste and odor filters, and eliminates the need for bottled water, or other water treatment methods. It will not restrict, limit or otherwise reduce your supply of water.

~ **REME Air purification Systems on each HVAC:** Unlike other systems that simply filter air, the Guardian Air REME+ (Reflective Electro Magnetic Energy) air purification system actually purifies indoor air with naturally-occurring oxidizers like ionized hydro-peroxides, Super Oxide Ions and ionized hydroxides. With this system, it's as if your home or office were situated beside a fresh crystal clear flowing stream in the middle of a dense forest. The Guardian Air is today's most advanced technology for boosting airborne oxidizers, and these oxidizers are crucial for our health.

~ **EcoSmarte Non-Chlorine Pool System:** ECOsmarte offers you a proven system to use no regular chemicals or salt in your pool. The ECOsmarte fresh water pool offers you every benefit found with a salt water pool with none of the negatives. What began as a product for chemically sensitive, cancer aware or environmentally conscious consumers in 1994, has evolved to a proven product with installations in all 50 U.S. States and over 100 Countries. Salt water chlorine generators have created a demand by consumers to stop handling chemicals and ECOsmarte delivers an affordable device that actually takes the swimmer out of the high amperage, acid and salt.

~ **Natural non-toxic Paint:** All paint was lead-free, VOC-free, natural paint

~ **Green Eco-Rock Sheetrock:** EcoRock uses 80% less energy to produce than gypsum drywall. Naturally cured and dried, EcoRock eliminates the energy-intensive, high-CO<sub>2</sub> generating calcining and oven drying found in gypsum drywall production. EcoRock is made of 80% recycled materials. EcoRock is designed to be fully re-utilized at end of life. EcoRock can be used as a pH additive for soils and can be returned to the production of EcoRock and other building materials as a valuable raw material. Unlike gypsum, EcoRock may be safely disposed of in landfills if necessary. EcoRock is the most mold-resistant and lowest emitting drywall. EcoRock outperforms all other mold resistant drywall by 50%. EcoRock scores the highest ASTM D3273 rating of 10 out of 10, showing zero mold growth over a six week period. No harsh anti-fungal chemicals are used on its surface or within its core. EcoRock also drastically reduces the quantity of indoor air contaminants over any other drywall. EcoRock generates 60% less dust, and presents no negative effects of airborne mercury often generated during wallboard production using FGD (recycled) gypsum from coal plants.

~ **No pesticides ever used on yard:** We have never used any toxic herbicides, pesticides or weed killers on our grass or yard. We only use all natural and organic fertilizers for lawn care

~ **Non Toxic cleaning chemicals ever used in house:** We have always used organic cleaning supplies for all household needs

~ **250 million year old fossil Agate sink:** This is a one of a kind sink bought from <https://elenhunting.com/> , This sink is valued at approx \$2000.00

~ **Solid Quartz Kitchen Sink:** This is a solid quartz hand chiseled sink: This sink is valued at approx \$3000.00

~ **Feng Shui:** The house was designed by Feng Shui Master lam Quan

~ **Bug spray all natural:** The solution used in the mosquito spray system and inside the home has been all natural and non-toxic to humans
