

Why settle for an older home?

Save up to \$3,000 a year!*

Our homes meet the EFL Platinum Certification and result in lower energy bills.

Program Energy Heating / Cooling Cost Comparisons

SQ. FT.	EFL Platinum Annual Heating/Cooling	Energy Star Annual Heating/Cooling	10 yr. Old Home Annual Heating/Cooling
2,000	\$921	\$1,141	\$2,917
2,500	\$1,002	\$1,381	\$3,313
3,000	\$1,092	\$1,512	\$3,715
3,500	\$1,356	\$1,963	\$4,472

The cost of energy continues to increase. That's why we build one of the most comprehensive energy efficient homes in Houston. And with your family in mind; we don't stop there! In addition to *energy efficiency*, every one of our homes is engineered to meet a minimum 110 mph wind speed (120 mph in wind-storm zones); *Third Party inspected 9 times to ensure quality and performance*; and built according to the requirements of the "Green Building Initiative" of the Greater Houston Builders Association to help protect and save our environment.

* All costs are estimates for the heating and cooling portion only of the annual energy utility costs and are based on \$0.1430 per kilowatt hour (electricity) and \$1.0433 per Cubic foot (natural gas). It is estimated that heating and cooling can account for up to 55% of a homes' annual utility cost. Actual costs will vary according to current utility rates, home size, configuration and design, temperature setting, individual living conditions, weather etc...

Why settle for just Energy Star when you can save more money with a home built to the Environments for Living® Program?

SAVE UP TO 27% IN HEATING & COOLING COSTS – Check and Compare!

Why Environments For Living vs. just Energy Star?	My Benefit	Our Homes	Builder X
High Efficiency "15 SEER" Air Conditioning Systems	Higher Number = Lower Energy Bills	✓	
95% High Efficient Furnaces	Higher % = Lower Energy Bills	✓	
Double-Paneled, Low-E Vinyl Cased Windows With Tilt-Out Sashes	Lower Energy Bills Easier to Clean	✓	
R-38 Attic and R-15 Wall Insulation	Higher Number = Lower Energy Bills	✓	
Radiant Barrier Roof Decking	Reduces Attic Heat to Lower Energy Bills	✓	
Insulated Sheathing on Exterior Walls (Plywood in Wind-Storm Areas)	Lower Energy Bills	✓	
Programmable Thermostat that Controls Both Temperature and Humidity	Provides Greater Comfort and Lower Energy Bills	✓	
R-8 Insulated Air Conditioning and Heating Ducts	Higher Number = Lower Energy Bills	✓	
Polysealant Around Windows and Doors to Eliminate Outdoor Air Infiltration	Less Dust and Lower Energy Bills	✓	
High Efficiency Energy Star Rated Kitchen Appliances	Lower Energy Bills	✓	
Filtered Fresh Air Intake	Eliminates Stale Air for Better Indoor Air Quality	✓	
High Performance Media Air Filters	Less Dust Better Indoor Air Quality	✓	
Advanced Lighting Package	Energy-Saving Light Fixtures = Lower Energy Bills	✓	
Energy Star Rated Ceiling Fixtures	Lower Energy Bills	✓	
Guaranteed Heating and Cooling Energy Usage	We Put it in WRITING!	✓
