

Information from the Museum Park Association:

<http://www.h-gac.com/livable-centers/planning-studies/museum-park.aspx> The goal is to weave this area into a cohesive culture/parks district by connecting HCC, Innovation District/Ion, museums, and Hermann Park through landscaping, right of way improvements, mobility improvements, etc. which Darren mentioned today.

Projects that are underway:

- Caroline Promenade - the spine of the Culture District. Predesign underway by SWA, public engagement starts in early fall. We're working on funding for design and implementation. Other esplanades will take their identity from Caroline, extending to Menil, St. Thomas U., Project Row House, Emancipation Park. Esplanade designs will be on the same caliber as Centennial Garden design.
- Shared Bike Lanes – Under contract through Harris County Pct. 1. These are painted bike images in Museum Park, south on LaBranch from downtown to Calumet, east on Calumet, south on Crawford to Centennial Gardens.
- Parking Benefit District – Working with CoH Parking Management to finalize pilot Community Parking Plan and Parking Benefit District, using revenue from the PBD for infrastructure improvements in Museum Park.
