

914 Fairway Farms Bullet Points

There are multiple electrical outlets in the soffit around the house for Christmas lights. They are turned on/off by a switch inside the house.

All of the back yard pavers are thinset to 4" concrete.

The roof of the shop in the back can be extended forward to make it 30'-40' longer for a covered RV/Large Boat storage.

Or the shop can be extended forward to make it longer.

All of the soffit has down landscaping lights.

The master shower is built with all concrete... no wood. It also has steel reinforce corners.

All of the baseboard is tiled and has acrylic grout in the corners.

There are additional return vents in two of the bedrooms.

There is a Bose Lifestyle system integrated into the living room.

The driveway was rebuilt in 2006 and was made 2' wider.
