WARRANTY TERMS AND PROVISIONS

Important Facts Concerning Your Warranty:

Soil conditions in this area are such that some future shifting of the soil may occur, particularly during periods of extended dry weather, which may result in new or additional settling. Therefore, we do not guarantee that the structure will not experience additional movement. This warranty provides that Titan Structural Solutions, LLC will re-raise or adjust settled areas where the work has been installed. Our warranty does not include adding additional underpinning in other areas.

If a building is partially underpinned, settlement may occur in areas not underpinned by Titan Structural Solutions, LLC such as the remainder of the perimeter and/or the interior of the building. Adjustments required due to movement in these other areas are not covered by our warranty and may require additional repairs at owner's cost.

If the work performed was a partial underpinning of the structure, then the remaining structure may move independently of the underpinned area creating a greater differential than if the entire structure was underpinned or no underpinning was done.

This Warranty Excludes All Of The Following:

- All costs for Removal and Replacement of collateral structural or cosmetic components, including but not limited to floors, wall coverings, windows, decks, landscaping, or tunneling required to access our prior work.
- All damage caused by catastrophic occurrences and acts of God including, but not limited to earthquakes, floods, hurricanes, tornadoes, war, terrorism, fire sink holes or mud slides.
- All work done by another party in areas where Contractor's work was performed. If work is performed on an area warranted by Contractor's without Contractor's prior written approval, ALL WARRANTY for the repair is VOIDED.
- Any movement of the foundation not due to settlement such as "Heave" or "horizontal movement". "Heave" is defined as the swelling of the soils resulting in differential uplift of the structure and "horizontal movement" may be caused by soil erosion, creep and or slough of the soils. These conditions may be caused by excess moisture from plumbing leaks, poor draining (surface and subsurface), flooding, rising water table, trees or their removal, or other causes. Maintaining proper draining, plumbing and landscaping is the responsibility of the owner.
- All costs of redecorating, repairing or replacing of any material or items not specially incorporated in the product installed per the agreement. By example, it is possible that more stress fractures may develop and damage may result such as, but not limited to, sheetrock, wall plaster, tile, wooden members, roof, or other rigid materials and these items are not covered.

Titan Structural Solutions, LLC

Certificate of Warranty

Titan Structural Solutions, LLC warrants the installed pilings against settlement, subject to the following limitations:

Warranty will remain in effect for the life of the structure. Warranty is transferable free of charge.

Should settlement occur, Contractor shall raise the settlement to as near as possible to the original set elevation. There will be no charge for this service.

If warranty work is needed, Customer is responsible for removal and replacement of anything that customer installed that obstructs access to pilings such as re-removing floor coverings or tunneling for the access of the Interior Pilings.

Flooding and Remediation Letter
For
2504 Forge Stone Drive
Friendswood, TX 77546

May 9, 2019

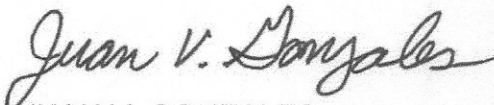

Background: We have owned the property since 2008 and no flooding had occurred before hurricane Harvey. Longtime (approximately 30 years) residents in the neighborhood verified that no flooding had ever occurred. Harvey caused nine inches of water to enter the house. Property was not and is not in a flood zone.

As soon as the water receded and access to property was possible, the following actions were immediately completed after the flooding caused by Hurricane Harvey:

- First two feet of dry wall were removed
- First two feet of insulation were removed
- All flooring was removed (carpeting & tile)
- All lower cabinets on first floor were removed and discarded
- Damaged furniture was discarded
- Walls and floor were treated to prevent mold buildup
- Fans circulated air for several days to dry all moisture and prevent mold buildup
- New insulation and dry wall was installed
- New ceramic tile, bamboo flooring, and carpeting was installed
- New wood cabinets were installed on the first floor
- Terminex treated property for termites to address the item listed in the disclosure statement

The above measures were taken to the best of my knowledge and recollection.

Sincerely,

JUAN V. GONZALES
Homeowner

*For purposes of this notice:

"100-year floodplain" means any area of land that: (A) is identified on the flood insurance rate map as a special flood hazard area, which is designated as Zone A, V, A99, AE, AO, AH, VE, or AR on the map; (B) has a one percent annual chance of flooding, which is considered to be a high risk of flooding; and (C) may include a regulatory floodway, flood pool, or reservoir.

"500-year floodplain" means any area of land that: (A) is identified on the flood insurance rate map as a moderate flood hazard area, which is designated on the map as Zone X (shaded); and (B) has a two-tenths of one percent annual chance of flooding, which is considered to be a moderate risk of flooding.

"Flood pool" means the area adjacent to a reservoir that lies above the normal maximum operating level of the reservoir and that is subject to controlled inundation under the management of the United States Army Corps of Engineers.

"Flood insurance rate map" means the most recent flood hazard map published by the Federal Emergency Management Agency under the National Flood Insurance Act of 1968 (42 U.S.C. Section 4001 et seq.).

"Floodway" means an area that is identified on the flood insurance rate map as a regulatory floodway, which includes the channel of a river or other watercourse and the adjacent land areas that must be reserved for the discharge of a base flood, also referred to as a 100-year flood, without cumulatively increasing the water surface elevation more than a designated height.

"Reservoir" means a water impoundment project operated by the United States Army Corps of Engineers that is intended to retain water or delay the runoff of water in a designated surface area of land.
