

A little History about their property at 3113 Carmel Valley.

Our property is a unique country oasis in the middle of suburbia with a historical connection to the Quail Valley Community. Before Quail Valley was developed, the previous family owned 220 acres in this area and sold eggs from their farm to other farmers and local residents. The owner sold most of their land in the late 60's to the Quail Valley developers but kept about 5 acres and built 2 homes - one for themselves and one for their daughter and son-in-law. After a generation passed, the daughter sold 3.5 acres and her folk's house to our neighbors who put in a fence and barn for their horses.

Our 1.6 acres allows you to view blue herons, egrets, and hawks in the backyard relaxing by the pool, while also seeing horses out the front door! it's a unique property with a historical tie to the Quail Valley Community.
