

If you are looking for a Mediterranean inspired house that has all the bells and whistles, then look no further! This home was built by the prestigious Lifetime home builders. Let's start off with the long, custom stained driveway, that leads up to your two-car garage, that has upgraded flooring and a keyless entry into the home. A unique gas Lantern sits above the gated entry, that you enter through, before you reach your front door. Another keyless entry is on the stained, Knotty Alder wooden door. There are multiple security cameras that are already installed for your use. The exterior has stucco and a Stone entry. This home is close to all the amenities of Houston but also is one of the very few, that has a huge, fenced backyard with a covered patio. It is perfect for your pets and weekend get togethers.

On the first floor there is an office, storage under the stairs, bedroom with en-suite bathroom and access to the backyard. As you walk up the wooden stairs, you will notice built in step lighting, custom cut outs in the walls for your art with controlled lighting above it, that will showcase your favorite pieces. As you enter the second floor, to the Left you will see an island kitchen with custom cabinets, soft closed drawers, granite countertops, a dry bar, breakfast area, chandelier lighting and a balcony that overlooks the backyard. The balcony contains a conveniently located gas connection for grilling. To your right there is also a dining room and living area that has faux wood ceiling beams, many lights that have dimmers on them and another balcony that you access through the living room. There are multiple speakers installed in the ceilings throughout the house; enabling you to play your music by connecting to your favorite device. On the third floor, the second bedroom is located to the left with an en-suite bathroom and closet. The utility room is conventionally located on the third floor as well. The master bedroom is located to the right and has an entrance to the third and largest balcony. It is also equipped with water connections allowing you to conveniently water your plants and be able to clean with ease. The Master bedroom has an en-suite bathroom, with dual sinks, seated vanity, jetted tub, shower with seating and rain head. It also has a long, walk-in closet.

This home has so many upgrades! From plantation shutters, the ability to control the temperature differently on each floor, Low-E SC Double pane windows that help reduce energy loss thereby increasing your home's comfort level and decreasing your utility costs! It is central vacuum ready (also known as whole -house vacuum) It also includes Home Automation/Whole house audio system and many more features! Between the Location, many amenities and HUGE private backyard, you will see that this home is a RARE find!
