GLA Calculations: The living area of the improvements is calculated utilizing field measurements (or architects plans if proposed construction). These dimensions are inherently inaccurate due to rounding errors, errors in measuring devices and adjustments that must be made to "square drawing". The more complex the design of the improvements, the greater these errors may be. This estimated GLA provided is an estimate only. It may differ from an estimate provided by builders, tax authorities or even a different appraiser. The GLA is an estimate only and should not be relied on as if fact.
