

2705 Frostwood Circle
Might Need to Know

- Driveway light on peak of the house is hardwired and stays on all the time (Sodium vapor and has only been replaced once in 25 years.)
- Driveway light above garage doors has a switch at laundry room door. This driveway light must be on to turn on the back-porch string lights, that switch is at the door leading from garage to porch.
- Some replacement bulbs on the shelf in the garage, cheaper to buy a string for replacements than individual bulbs.
- A 220-volt breaker is off in the outside breaker box. The 2020 outlets for this is behind the gas stove. Not in use.
- Switch for lights over bar are beside refrigerator
- The switch on the wall in the den is for an overhead light or fan. The wire is already run to the middle of the ceiling.
- Mackey Mechanical has been our AC-Furnace company.
Lanco has been used for plumbing needs
- Garbage days is Tuesday
