# The Benefits of Solar

Never worry about high electric bills or be without power in this beautiful home. This property has a state of the art 8.64 KW solar array with 24 Mission Solar 360 Watt Panels that produces the home's power from the sunny Texas sky. It also has a 20 KW Kohler whole home generator that runs on natural gas, coupled with an automatic transfer switch. So, while your neighbors don't have power, you will be relaxing in the air conditioning without ever noticing the power went out.
