

IMPACT RESISTANT HURRICANE WINDOWS

9000 SERIES

What makes NewSouth Window different?

Factory Direct

NewSouth provides you with a factory direct solution, which means we invest in our products with superior components. We have built a high-performance window to defend against Coastal weather; we call it the Ultimate Window, you'll call it the last window you'll ever buy.

Lifetime Warranty

Here at NewSouth we manufacture, install, and guarantee our products and installation for life, giving you peace of mind. This is what we call single-source accountability which means you'll only ever need to make one call should an issue arise!

Energy Efficient

NewSouth Window Solutions Energy Star rated windows are made to better enhance the energy efficiency of your home. Our windows are manufactured with uPVC vinyl, Low-E glass and other cutting-edge technologies to keep the cool air in and the heat out. This will save energy and may even lead to a reduction in your monthly energy bill.

Impact Resistance

NewSouth is your solution when it comes to hurricane rated windows. Our impact-resistant windows are approved for use in the wind-borne debris region and the 175 MPH Miami-Dade's High Velocity Hurricane Zone (HVHZ). Additional benefits to impact resistance are noise reduction and intruder resistance. Non-impact options are also available, please speak to your factory representative for more information.

WE MANUFACTURE | WE INSTALL | WE GUARANTEE

9000 SERIES

Blending Miami-Dade and Energy Star standards with a beautiful aesthetic

1 • 100% pure uPVC vinyl.

Low maintenance; provides superior energy efficiency and durability.

2 • 12-point fusion welded corners.

Watertight sash and frame.

3 • Multi-chambered 3 ¼" wide frame.

Structurally sound and energy efficient.

4 • Glass Features

A. Double pane & double strength glass that is stress tested.

Ensures against seal failure due to heat.

B. Laminated glass with a 7/8" insulated unit.

Patented eVantage 366 or 340 glass for maximum comfort.

5 • Aluminum reinforced sash.

Optimal stability, structural integrity and security.

6 • Triple weather stripping.

To prevent energy loss and to keep water out.

7 • Interlocking meeting rail that is twice as deep as industry standards.

Prevents air & water infiltration, & resists forced entry attempts.

8 • Fiberglass mesh half-screen with extra deep ½" pocket.

Extruded aluminum frame offers more stability for less screen shifting.

9 • Argon gas sealed glass unit.

Aids in noise reduction and energy efficiency.

10 • XL Edge desiccant filled warm edge spacer system.

Less heat transfer at the glass edge to help save energy.

11 • Recessed sloped external sill.

Designed to shed water and keep your house dry during a storm.

12 • Built in, double strength integrated lift handle.

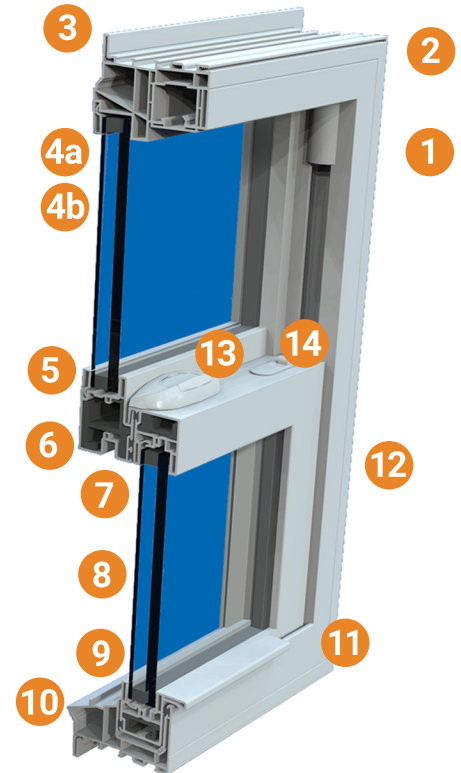

Sturdy and long lasting, no snap-on pieces.

13 • State of the art self-locking system.

Improved safety for your family.

14 • Recessed tilt latches.

Allows bottom sash to tilt in with latch that is flush to the frame.

- Beveled Frame adds elegance
- Beautiful mill-work duplicated exterior frame
