SPECIAL WARRANTY DEED 1998

THE STATE OF TEXAS
COUNTY OF HOUSTON

KNOW ALL MEN BY THESE PRESENTS:

THAT TEXAS COMMERCE BANK, NATIONAL ASSOCIATION, in its capacity as TRUSTEE for the ANITA BYRDE BIGGER TRUST, hereinafter called Grantor, for and in consideration of the sum of TEN AND NO/100 (\$10.00) DOLLARS and other good and valuable consideration to Grantor paid by the Grantee herein named, the receipt and sufficiency of which is hereby acknowledged, have GRANTED, SOLD and CONVEYED, and by these presents do GRANT, SELL and CONVEY unto LOUISIANA-PACIFIC CORPORATION, a corporation organized under the laws of Delaware and having an office in Montgomery County, Texas, hereinafter called Grantee (the terms "Grantor" and "Grantee" used herein shall always include their successors, assigns and lessees, if any), the following described real property in Houston County, Texas, to-wit:

An undivided 11.4% interest in and to all that certain land in Houston County, Texas described in Exhibit "A" attached hereto and made a part hereof.

SAVE AND EXCEPT, however, and there is EXPRESSLY RESERVED TO GRANTOR, an undivided 11.4% interest, forever, in all oil, gas, coal and lignite (including, without limitation, coal and lignite located at or near the surface and including sulphur or any other minerals inherent to or contained in any oil, gas, coal or lignite) in, on, under or that may be produced from the land hereinabove described and every part thereof, together with the full right of ingress and egress over, upon and across said property for the purpose of exploring for (including, but not by way of limitation, seismicographic exploration and core drilling for any such minerals) the above specified minerals and for drilling wells, mining or producing the same and for storing and removing the same when so mined or produced. This right of ingress and egress shall include the right to make use of so much of the surface estate of the land described as may be necessary, incident or convenient to any such mineral exploration, development, storage, production or removal, including drilling of water or disposal wells and the erection of pipelines, storage tanks, flush pits, roads and other surface structures necessary, incident or convenient to such mineral exploration, development, storage, production or removal. All such

structures, material, machinery or equipment placed upon the property by Grantor may be removed by Grantor at any time.

Grantors (the plural word "Grantors" used in this deed include the owners of the other 88.6% interest in said property) shall have the right to occupy so much of the surface of the above described land as may be necessary or expedient for the mineral exploration, development, storage, production or removal of coal or lignite therefrom; and shall have the right of ingress and egress to and from and throughout the above described land necessary and expedient for the development, production, and removal of coal or lignite therefrom. Grantors shall have the right to mine the above described land by strip mining or otherwise and to use any portion of the property for such purpose even though it requires the removal of material overlying the coal or lignite and deprives Grantee of the use of the surface of a portion of said land during the period required for mining. Also, if Grantors desire to use the coal or lignite on site for fuel or other processing, Grantee agrees to lease land for a plant site on the property, said site not to exceed 400 acres, together with necessary rights of way for export of the plant products from the site, at a reasonable or appraised rental price.

With reference to the mining of coal or lignite, the following procedure shall be followed: Grantors shall notify Grantee in writing of the intent to mine coal or lignite from said land. Said written notice shall designate the portion of said land to be mined from time to time, describing it so as to make it clear what land is intended to be so used and accompanying it with maps or sketches to make it clearly identifiable. The land so designated to be mined shall be contiguous and reasonably shaped, and shall include not less than 160 acres and not more than 320 acres. Nothing shall prevent Grantors from designating more than one parcel to be mined at a time, but all shall meet the above specifications. The written notice shall state the anticipated beginning date for mining, which shall be at least 12 months in the future, from the date of the notice, and the estimated time period during which the mining will be in progress, and an estimated date when the mining in said designated parcel is expected to be completed. Mining on a designated area, once begun, must be prosecuted with reasonable diligence until completed.

Upon completion, Grantors shall give written notice that they have completed mining in said area, and notifying that the surface in said area is about to be restored to make it available for use by the Grantee. Grantors shall have the duty to restore the surface of said

land in accordance with the highest federal or state regulations, standards or guidelines, existing at that time and to plant trees or other vegetation thereon, as requested in writing by Grantee, but Grantors shall not be required to do replanting that is any more expensive than replanting of trees.

It is recognized that Grantee shall be entitled to reasonable compensation for damage to and loss of use of the surface resulting from mining of coal or lignite, and such compensation shall be comparable in amount to that which is being paid to surface owners of comparable property in Texas at the time, which shall include an appropriate allowance for the value of pre-merchantable timber. Grantee shall be consulted in advance and have a reasonable opportunity to negotiate surface damages either with any mineral lessee, or with Grantors if they develop the coal or lignite resources themselves.

Grantors do also reserve to themselves ownership of the old steam engine and all other personal property now on the premises and which was used in connection with the old coal mines, but Grantors will remove said items from the premises if requested by Grantee and upon reasonable notice to allow time for removal.

This conveyance is made subject to any and all mineral reservations, easements and covenants of record in the office of the County Clerk where the subject property is situated, applicable to and enforceable against the hereinabove described property.

TO HAVE AND TO HOLD the above described premises, together with all and singular the rights and appurtenances thereto in anywise belonging, unto the said Grantee, its successors and assigns forever; and Grantor does hereby bind itself, its successors and assigns, to WARRANT AND FOREVER DEFEND all and singular the said premises unto the said Grantee, its successors and assigns, against every person whomsoever lawfully claiming or to claim the same or any part thereof, by, through or under Grantor, but not otherwise.

EXECUTED this 31 day of March 1994.

including sulphur or any other minerals inherent to or contained in any oil, gas, coal or lignite) in, on, under or that may be produced from the land hereinabove described and every part thereof, together with the full right of ingress and egress over, upon and across said property for the purpose of exploring for (including, but not by way of limitation, seismicographic exploration and core drilling for any such minerals) the above specified minerals and for drilling wells, mining or producing the same and for storing and removing the same when so mined or produced. This right of ingress and egress shall include the right to make use of so much of the surface estate of the land described as may be necessary, incident or convenient to any such mineral exploration, development, storage, production or removal, including drilling of water or disposal wells and the erection of pipelines, storage tanks, slush pits, roads and other surface structures necessary, incident or convenient to such mineral exploration, development, storage, production or removal. All such structures, material, machinery or equipment placed upon the property by Grantors may be removed by Grantors at any time.

Grantors shall have the right to occupy so much of the surface of the above described land as may be necessary or expedient for the mineral exploration, development, storage, production or removal of coal or lignite therefrom; and shall have the right of ingress and egress to and from and throughout the above described land necessary and expedient for the development, production, and removal of coal or lignite therefrom. Grantors shall have the right to mine the above described land by strip mining or otherwise and to use any portion of the property for such purpose even though it requires the removal of material overlying the coal or lignite and deprives Grantee of the use of the surface of a portion of said land during the period required for mining. Also, if Grantors desire to use the coal or lignite on site for fuel or other processing, Grantee agrees to lease land for a plant site on the property, said site not to exceed 400 acres, together with necessary rights of way for export of the plant products from the site, at a reasonable or appraised rental price.

With reference to the mining of coal or lignite, the following procedure shall be followed: Grantors shall notify Grantee in writing of the intent to mine coal or lignite from said land. Said written notice shall designate the portion of said land to be mined from time to time, describing it so as to make it clear what land is intended to be so used and accompanying it with maps or sketches to make it clearly identifiable. The land so designated to be mined shall be
