PROPERTY INSPECTION REPORT

Jay Hicks Inspection Services

Prepared For: Casey Snider

Concerning: 128 Dolphin 182363J Texas 77550

By: Jay Hicks

TREC Licensed # 5332

This property Inspection report may include an inspection agreement (contract), addenda, and other information related to property conditions. If any item or comment is unclear, you should ask the inspector to clarify the findings. It is important that you carefully read ALL the information. This report may not be complete without the attachments.

This inspection is subject to the rules ("Rules") of the Texas Real Estate Commission ("TREC"), which can be found at www.trec.texas.gov

The TREC Standards of Practice (Sections535.227 - 535.233 of the rules) are the minimum standards for inspections by TREC licensed inspectors. An inspection addresses only those components and conditions which are present, visible, and accessible at the time of the inspection. While there may be other parts, components, or systems present, only those items specifically noted as being inspected were inspected. The inspector is NOT required to turn on decommissioned equipment, systems, utility services or apply an open flame or light a pilot to operate any appliance. The inspector is NOT required to climb over obstacles, move furnishings or or stored items. The inspection report may address issues that are code based or may refer to a particular code; however, this is NOT a code complaiance inspection and does NOT verify compliance with a manufacturer's installation instructions. The inspection does NOT imply insurability or warrantability of the structure or it's components. Although some safety issues may be addressed in this report, this inspection is NOT a safety/code inspection and the inspector is NOT required to identify all potential hazzards.

In this report, the inspector shall indicate, by checking the appropriate boxes on the form, whether each item was inspected, not inspected, not present or deficient and explain the findings in the corresponding section in the body of the report form. The inspector must check the Deficient (D) box if a condition exists that adversely and materially affects the performance of a system or component or constitutes a hazard to life, limb or property as specified by the TREC Standards of Practice. General deficiencies include inoperability, material distress, water penetration, damage, deterioration, missing components, and unsuitable installation. Comments may be provided by the inspector whether or not an item is deemed deficient. The inspector is not required to prioritize or emphasize the importance of one deficiency over another.

Some items reported as Deficient may be considered life-safety upgrades to the property. For more information, refer to Texas Real Estate Consumer Notice Concerning Recognized Hazards or Deficiencies below.

THIS PROPERTY INSPECTION IS NOT A TECHNICALLY EXHAUSTIVE INSPECTION OF THE STRUCTURE, SYSTEMS OR COMPONENTS. The inspection may not reveal all deficiencies. A real estate inspection helps to reduce some of the risk involved in purchasing a home, but it cannot eliminate these risks, nor can the inspection anticipate future events or changes in performance due to changes in use or occupancy. It is recommended that you obtain as much information as is available about this property, including any seller's disclosures, previous inspection reports, engineering reports, building/remodeling permits, and reports performed for or by relocation companies, municipal inspection departments, lenders, insurers, and appraisers. You should also attempt to determine whether repairs, renovation, remodeling, additions, or other such activities have taken place at this property. It is not the inspector's responsibility to confirm that information obtained from these sources is complete or accurate or that this inspection is consistent with the opinions expressed in previous or future reports.

ITEMS IDENTIFIED IN THE REPORT DO NOT OBLIGATE ANY PARTY TO MAKE REPAIRS OR TAKE OTHER
ACTIONS, NOR IS THE PURCHASER REQUIRED TO REQUEST THAT THE SELLER TAKE ANY ACTION. When a
deficiency is reported, it is the client's responsibility to obtain further evaluations and/or cost estimates from qualified service
professionals. Any such follow-up should take place prior to the expiration of any time limitations such as option periods.
Evaluations by qualified tradesmen may lead to the discovery of additional deficiencies which may involve additional repair
costs. Failure to address deficiencies or comments noted in this report may lead to further damage of the structure or systems
and add to the original repair costs. The inspector is not required to provide follow-up services to verify that proper repair
have been made.

Property conditions change with time and use. For example, mechanical devices can fall at any time, plumbing gaskets and seals may crack if the appliance or plumbing fixture is not used often, roof leaks can occur at any time regardless of the apparent condition of the roof, and the performance of the structure and the systems may change due to changes in use or occupancy, effects of weather, etc. These changes or repairs made to the structure after the inspection may render information contained herein obsolete or invalid. This report is provided for the specific benefit of the client named above and is based on observations at the time of the inspection. If you did not hire the inspector yourself, reliance on this report may provide incomplete or outdated information. Repairs, professional opinions or additional inspection reports may affect the meaning of the information in this report. It is recommended that you hire a licensed inspector to perform an inspection to meet your specific needs and to provide you with current information concerning this property.

TEXAS REAL ESTATE CONSUMER NOTICE CONCERNING HAZARDS OR DEFICIENCIES

Each year, Texans sustain property damage and are injured by accidents in the home. While some accidents may not be avoidable, many other accidents, injuries, and deaths may be avoided through the identification and repair of certain hazardous conditions. Examples of such hazards include:

- malfunctioning, improperly installed, or missing ground fault circuit protection (GFCI) devices for electrical receptacles in garages, bathrooms, kitchens, and exterior areas;
 - · malfunctioning arc fault protection (AFCI) devices;
 - · ordinary glass in locations where modern construction techniques call for safety glass;
- malfunctioning or lack of fire safety features such as smoke alarms, fire-rated doors in certain locations, and functional emergency escape and rescue openings in bedrooms;
 - · malfunctioning carbon monoxide alarms;
 - · excessive spacing between balusters on stairways and porches;
- · improperly installed appliances;
- · improperly installed or defective safety devices; and
- · lack of electrical bonding and grounding.

To ensure that consumers are informed of hazards such as these, the Texas Real Estate Commission (TREC) has adopted Standards of Practice requiring licensed inspectors to report these conditions as "Deficient" when performing an inspection for a buyer or seller, if they can be reasonably determined.

These conditions may not have violated building codes or common practices at the time of the construction of the home, or they may have been "grandfathered" because they were present prior to the adoption of codes prohibiting such conditions. While the TREC Standards of Practice do not require inspectors to perform a code compliance inspection, TREC considers the potential for injury or property loss from the hazards addressed in the Standards of Practice to be significant enough to warrant this notice.

Contract forms developed by TREC for use by its real estate licensees also inform the buyer of the right to have the home inspected and can provide an option clause permitting the buyer to terminate the contract within a specified time. Neither the Standards of Practice nor the TREC contract forms require a seller to remedy conditions revealed by an inspection. The decision to correct a hazard or any deficiency identified in an inspection report is left to the parties to the contract for the sale or purchase of the home.

INFORMATION INCLUDED UNDER "ADDITIONAL INFORMATION PROVIDED BY INSPECTOR", OR PROVIDED AS AN ATTACHMENTWITH THE STANDARD FORM, IS NOTN REQUIRED BY THE COMMISSION AND MAY CONTAIN CONTRACTURAL TERMS BETWEEN THE INSPECTOR AND YOU, AS THE CLIENT. THE COMMISSION DOES NOT REGULATE CONTRACTURAL TERMS BETWEEN PARTIES. IF YOU DO NOT UNDERSTAND THE EFFECT OF ANY CONTRACTURAL TERM CONTAINED IN THIS SECTION. OR ANY ATTACHMENTS, CONSULT AN ATTORNEY.

ADDITIONAL INFORMATION PROVIDED BY INSPECTOR

See the attached agreement page.

All directions are front street facing the house (front door).

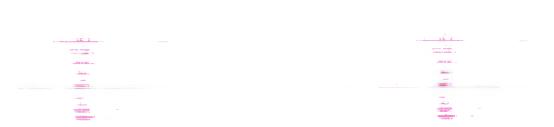

Future performance can not be determined on any item(s).

If you have any concerns, you, the client named on this report, should contact technical personell to evaluate any and all comments.

It is understood that my opinion and testing methods may differ from the opinions of other inspectors, contractors, or licensed technicians.

ATTENTION CLIENTS

Detailed limitations regarding the scope of this report are outlined in the attached
Inspection and Liability Limitation Agreement
located attached to this report
and on the Foundation Information section located on page 4 or 16 of this report.
THE REPORT IS INCOMPLETE IF THESE ITEMS ARE NOT
ENCLOSED IN THIS REPORT.

☐ Damaged pilings: □ Damaged subfloor: ☐ Non-supporting piers/posts: ☐ Non-supporting pilings/columns:

☐ Non supporting beams, sill, or joists: ☐ Damaged retaining walls related to foundation performance: Important Notice >>> The condition of the foundations is reported on the day of inspection.

This report is of the general condition (Not an engineers report), Future performance can not be determined after that day. If you have any concerns. You should contact a structural engineer. It is always recommended to get a second opinion on the foundation performance

FOUNDATION INFORMATION:

The following evidence and consequences are generally associated with foundation differential movement: the structure and loss and gain of moisture content of framing lumber. It is not uncommon for foundations to reveal some systems of differential movement. At the time of inspection, this inspector may have observed evidences and consequences of differential movement. Unless noted otherwise, these evidences and consequences may not be excessive and do not indicate the immediate presence of significantly deflected foundation or foundation failure. Therefore, if indicated, any discrepancy should be evaluated by a Structural Engineer or foundation repair company. Expansive soils that are common in the "Gulf Coast" area can dramatically adversely affect the performance of a foundation. Variations in moisture content produces swelling and shrinkage of the soil which can result in differential heaving and settlement of a foundation. The opinion rendered in this report does not apply to future changing conditions and structural consequences affected by thermal/climatic conditions, moisture or any other conditions that affect foundation movement. Differential movement in the foundation can occur rapidly under certain conditions and the future performance or stability of the foundation cannot be predicted. If In-depth information is desired on the foundation, soil stability or any part thereof, a Structural Engineer should be consulted.

Foundation movement may not necessarily be the cause of cracks in the home gypsum board (sheetrock) and brick veneer. Expansion and contraction of the home's framing may cause the following: 1) Horizontal cracking of sheetrock at the inside corners of windows is due to thermal expansion/contraction of the window framing. 2) Cracks in corners of raised ceilings are most commonly the result of thermal expansion/contraction in attic framing. 3) Minor separations in brick/sheetrock connections are commonly due to different expansion/contraction rates of different materials. 4) Cracks in top "soldier brick" rows are commonly caused by framing movement. 5) Foundation corners that chip off are caused from improper removal of foundation wooden form boards or by frictional forces from the movement between the brick veneer and concrete foundation. 6) Minor cracks may appear in brick veneer due to normal structural movement of walls installed without brick expansion joints or at the weak areas of brick walls under windows.

☑ Recommend a licensed HVAC technician inspect and repair the	entire HVAC system as needed.
☑ Recommend a licensed A/C Heat technician in	nspect and issue a report containing their state
license number and contact information detai	ling their findings and all needed repairs.
	 ☑ Improper gas line in use. (MUST be yellow flex) ☐ Missing flexible gas line ☑ Missing drip leg (gas trap):. ☐ Unit is NOT rainsed 18 inches off of garage floor ☐ Lack of protection from physical damage: ☐ Flame impegment, uplifting flame or improper flame color: ☐ Recommend removal of space heater from wall ☐ Unit is not accessible ☐ Passageway in attic is not floored between attic entrance and some connector (s) are concealed or extend through we recommend a licensed HVAC technician inspect and repair the ☑ Recommend a licensed A/C Heat technician in

The following applicable components of the heating system are commented on:

Unit performance, thermostat controls/limit controls, burner assembley/compartment, condition of flame, vent pipe clearence and routing, combustion/draft air, and gas supply lines and shut off valves. Heat exchangers are NOT disassembled to inspect internal parts. Testing for carbon monoxidels performed but a definitive condition of the heat exchangercan not be determined without disassembley of the unit by a licensed HVAC company. Electrical heat strips are no accessible to evaluate. If an in depth evaluation of the heating system is desired, consult a licensed HVAC company.

See section C (page 10) for information on furnace vent(s)

Attached is a "Liability Limitation Agreement". Please read carefully. Acceptance and reliance upon this inspection report is contingent upon acceptance and understanding of this liability agreement.

Agreement

We are a general real estate inspection company. We are licensed and regulated by the Texas Real Estate Commission. Our inspection and inspection forms are designed to adhere to guidelines in the 'Rules of the Texas Real Estate Commission' for home inspectors effective January 1,2018 and all subsequent amendments. {This Report complies with the January 1, 2018 requirements from the T.R.E.C.}

(1) What We Do:

We perform a visual inspection of accessible areas and items and report to you the general conditions of inspected areas and/or items. Our inspection is limited to items specifically listed in this report only. We inspect and report to you if an item is performing the function for which it was designed or is deficient. We will explain our report to you or your designated agent. We perform our inspection in a professional and workmanlike manner. Our report of the inspection and its contents are based solely on the condition and appearance existing at the time of inspection. We do not address or comment on the condition or functional abilities of any item past the date and time of inspection. If we report that an item is not functioning or is deficient and is in need of replacement, we urge you to have the item examined by a specialist prior to making the final purchase of the property. We also advise you to re-check the functional ability of systems to insure no defects have occurred after the date of our inspection and prior to closing. If a structure has been unoccupied for an extended period of time, it is not uncommon for defects to occur, particularly in plumbing joints or HVAC systems.

We are not liable for damage or defects which may have been cosmetically masked or altered or are not completely visual and apparent under normal conditions. Weather conditions may affect the Inspector's ability to detect defects. Example: Minor areas of moisture penetration may not be visible at different times of the day or with low levels of humidity.

The information contained in this report is the sole possession of the buyer.

(2) What We Do Not Do:

We do not offer guarantees, warranties or insure the future performance or condition of any item, whether inspected or not. If you desire a guarantee, warranty, insurance policy or certification you must obtain such products and information from a company in that business endeavor. We do not inspect any item we cannot see in a normal manner of inspection.

We do not move furniture, rugs, carpet, paintings or any other furnishings or stored items in the course of our inspection.

We do not enter areas with less than proper clearance space needed, or areas, which in the opinion of the Inspector, is unsafe

We do not walk on wood shake, wood shingle, tile or any roof areas we may damage or any roof area which the Inspector considers unsafe to walk. These areas will be viewed either from the attic or ground or both, whichever is applicable.

We do not dismantle any item or system to check component parts, including gas fired heat exchangers.

We do not inspect for building codes, soil analysis, design adequacy, capacity, efficiency, sizing, value, flood plain location, pollution, environmental hazards or habitability.

We do not inspect for termites or any other insect infestation. We do not inspect security systems.

We do not inspect for, nor comment on, cosmetic damage.

We do not operate equipment or systems outside the parameters of manufacturers recommendations.

We do not re-inspect repair work (all repairs are to be done by licensed professional repair tradesman)

(3) What You Do:

You agree not to allow any third party not associated with the negotiations and consummation of the sale of the inspected property to have access to or rely on information contained in this report. You agree to notify the Inspector within sixty days from the date of this inspection of any items disputed in this report and to allow a re-inspection of the disputed item prior to any repairs. You agree to limit any liabilities incurred by us and/or our associates which pertain to this inspection to the amount of the fee paid for this inspection and release our company and its associates from any further liability. You are to put into writing to our company any disputes. Communications must be consistent in that the party originally accompanying the inspector will be the party resolving the problem. You agree you will not post any information on any social media which may be derogatory or inflamatory towards Jay Hicks, Jay Hicks Inspection Services, their associates, or employees.

DISPUTE RESOLUTION: In the event of a dispute between the parties relating to this agreement, the parties or their representatives will meet promptly in an effort to resolve the dispute amicably. Upon the request of any party to this agreement, all unresolved disputes (not limited to breech of contract action), shall be submitted for binding arbitration in accordance with the Better Business Bureau Rules of Arbitration then in effect, and then neither party shall have a right to bring a suit in court. You agree to pay any and all fees incurred by all parties concerned. Any and all litigation, arbitration, or third party dispute resolution of any kind must take place in Galveston county, Texas.

You agree any payment made for inspection services that are subsequently dishonored will result in an additional \$100.00 fee. RE-INSPECTION FEE \$100.00. (To come back and finish job / due to utilities not on or outside temperature too low for A/C.) You attest that the inspector performing this inspection has made no oral representation that differ from the contents of this agreement.

You agree to the provisions and limitations of this contract and report by your reliance upon it whether you sign it or not.

You agree to pay a \$75.00 (seventy five dollars) billing fee for inspections not paid for at the time/day of inspection.

These inspections are visual only and structure and equipment is determined operable (unless otherwise indicated) at the time of inspection only.

Any use or this report constitutes acceptance or the above listed terms and conditions.

No warrantees or guarantees are offered for inspected components.

I HAVE READ THIS AGREEMENT AND I UNDERSTAND AND ACCEPT THESE CONDITIONS:
