

Why we love this house

-what the owners are saying

- **The space is in areas that are used daily. We built this house because others we looked at had too much space in rarely used rooms.**
- **Screened in patio for sitting outside in the evening without being bothered by mosquitos, while listening to the fountain.**
- **Outdoor kitchen with a large grill for steaks and a side burner which we loved using to sear roasts or make soup stock.**
- **Two refrigerators in the kitchen - great for storing everything from big Costco trips, and never running out of refrigerator space during the holidays.**
- **The oversized garage!**
- **The incredible storage in the attic with room to store everything. The cabinets in the upstairs hall for decorations and keepsakes that you do not want to put in the attic.**
- **The limestone - the vent hood cover, fireplace, interior stone walls, exterior fireplace and exterior front walls.**
- **The upstairs game room which has room for ping pong, workout videos, rebounder workouts, or just watching movies on a huge screen.**
- **The treadmill/arc training room made it wonderful during the pandemic for everyone to stay active. Between this room and the game room, there was space for every one to exercise at the same time.**
- **Almost no carpeting and media filters on all three A/C units.**
