

**SUBTERRANEAN TERMITE POST-CONSTRUCTION TREATMENT DISCLOSURE FOR EACH ESTIMATE**

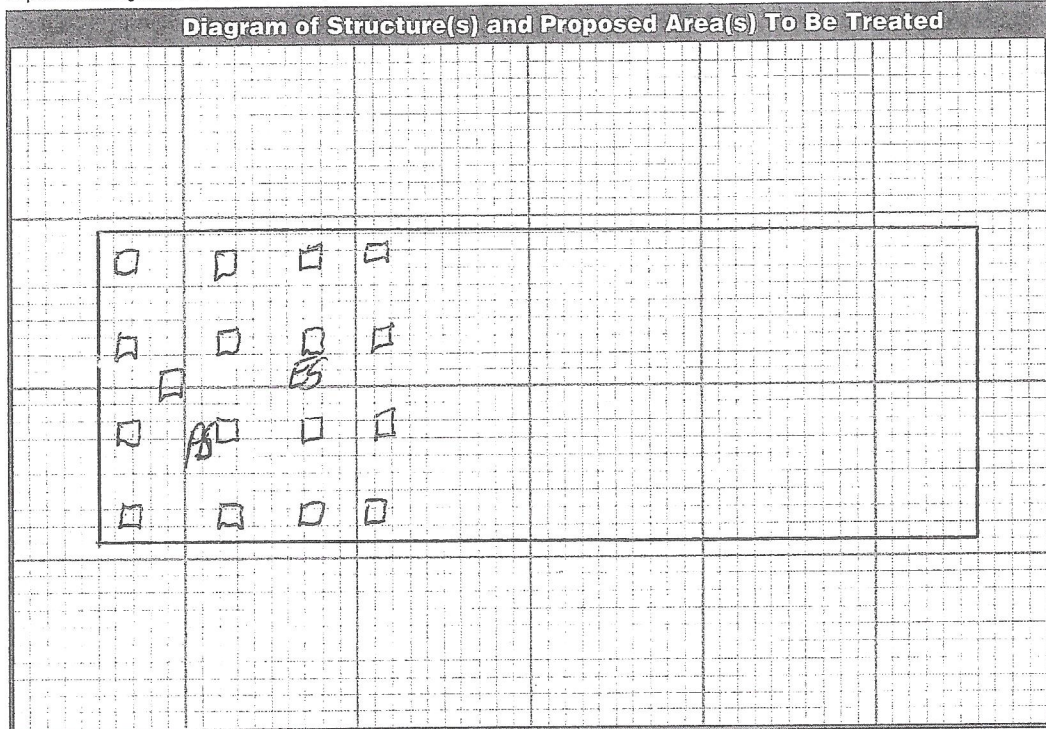

**PEST CONTROL COMPANY:**

Name: **TEXAS A-1 PEST CONTROL & TERMITE CO.** TPCL (Business License No.) **0570691** Phone #: **713-464-5219**  
 Address: **8505 HAMMERLY** City: **HOUSTON** State: **TX** Zip Code: **77055**

**CUSTOMER INFORMATION:**

Name: *Anthony Carrabba* Phone #1: *713-503-3842* Phone #2: *832-515-9121*  
 Address: *927 Rowlette* City: *Rickinson* State: *TX* Zip Code: *77539*

For all treatments there will be a diagram showing exactly what will be treated. Treatment specifications and warranties for those treatments may vary widely. Review the pesticide label provided to you for minimum treatment specifications and compare this with any proposal or estimate you may receive. If you have any questions, contact the pest control company or the Texas Department of Agriculture, P.O. Box 12847, Austin, Texas 78711-2847. Telephone number: (866) 918-4481 or Fax: (888) 232-2567.

**PROPOSED TREATMENT SPECIFICATIONS:**

Type:  Partial  Pier & Beam  Slab  Spot  Baiting System  Physical Barrier: \_\_\_\_\_ sq ft Approx. perimeter measurement of structure to be treated: *102 L.F. (40' x 26')*  
 A label of *Terminator 5C* is attached. The concentration of liquid termiticide (if any) to be applied: *0.06%* Approx. number of baiting systems (if any) \_\_\_\_\_

**DEFINITIONS OF TREATMENT:**

A subterranean termite treatment may be a partial treatment or spot treatment using termiticide, approved physical barriers or a baiting system. These types of treatments are defined as follows:  
**Partial Treatment:** This technique allows a wide variety of treatment strategies but is more involved than a spot treatment (see definition below). Ex: treatment of some or all of the perimeter, bath traps, expansion joints, stress cracks, portions of framing, walls and bait locations.  
**Pier and Beam:** Generally defined as the treatment of the outer perimeter including porches, patios and treatment of the attached garage. In the crawl space, treatment would include any soil to structure contacts as well as removal of any wood debris on the ground.  
**Slab Construction:** Generally defined as treatment of the perimeter and all known slab penetrations as well as any known expansion joints or stress cracks.  
**Spot Treatment:** Any treatment which concerns a limited, defined area less than ten (10) linear or square feet that is intended to protect a specific location or "spot". Often there are adjacent areas that are susceptible to termite infestation, which are not treated.  
**Baiting Systems:** This type of treatment may include interior and/or perimeter placement of monitoring or baiting systems along with routine inspection intervals. The baiting technique may include one or more baiting locations as prescribed by the product label and instructions.  
**Barriers:** If a physical device is used, the square footage of the physical device must be recorded and a diagram describing the installation will be provided.

**WARRANTY & ATTACHMENTS:**

Warranty information (if any) including area covered, time period of warranty, renewal options and cost, the obligations of the contracting parties, and conditions that could develop which would void the warranty is attached. If the warranty does not include the entire structure treated, the areas included in the warranty are: (specify) \_\_\_\_\_  
 A copy of the consumer information sheet has been made available to the appropriate party.
