SCOPE OF INSPECTION

- A. This inspection covers only the multi-family structure, primary dwelling or place of business. Sheds, detached garages, lean-tos, fences, guest houses or any other structure will not be included in this inspection report unless specifically noted in Section 5 of this report.
- B. This inspection is limited to those parts of the structure(s) that are visible and accessible at the time of the inspection. Examples of inaccessible areas include but are not limited to (1) areas concealed by wall coverings, furniture, equipment and stored articles and (2) any portion of the structure in which inspection would necessitate removing or defacing any part of the structure(s) (including the surface appearance of the structure). **Inspection does not cover any condition or damage which was not visible in or on the structure(s) at time of inspection but which may be revealed in the course of repair or replacement work.**
- C. Due to the characteristics and behavior of various wood destroying insects, it may not always be possible to determine the presence of infestation without defacing or removing parts of the structure being inspected. Previous damage to trim, wall surface, etc., is frequently repaired prior to the inspection with putty, spackling, tape or other decorative devices. Damage that has been concealed or repaired may not be visible except by defacing the surface appearance. **The WDI inspecting company cannot guarantee or determine that work performed by a previous pest control company, as indicated by visual evidence of previous treatment; has rendered the pest(s) inactive.**
- D. If visible evidence of active or previous infestation of listed wood destroying insects is reported, it should be assumed that some degree of damage is present.
- E. If visible evidence is reported, it does not imply that damage should be repaired or replaced. Inspectors of the inspection company usually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of damage and any corrective action should be performed by a qualified expert.
- F. **THIS IS NOT A STRUCTURAL DAMAGE REPORT OR A WARRANTY AS TO THE ABSENCE OF WOOD DESTROYING INSECTS.**
- G. If termite treatment (including pesticides, baits or other methods) has been recommended, the treating company must provide a diagram of the structure(s) inspected and proposed for treatment, label of pesticides to be used and complete details of warranty (if any). The warranty should specify which areas of the structure(s) are covered by warranty, renewal options and approval by a certified applicator in the termite category. Information regarding treatment and any warranties should be provided by the party contracting for such services to any prospective buyers of the property. The inspecting company has no duty to provide such information to any person other than the contracting party.
- H. There are a variety of termite control options offered by pest control companies. These options will vary in cost, efficacy, areas treated, warranties, treatment techniques and renewal options.
- I. There are some specific guidelines as to when it is appropriate for corrective treatment to be recommended. Corrective treatment may only be recommended if (1) there is visible evidence of an active infestation in or on the structure, (2) there is visible evidence of a previous infestation with no evidence of a prior treatment.
- J. If treatment is recommended based solely on the presence of conducive conditions, a preventive treatment or correction of conducive conditions may be recommended. The buyer and seller should be aware that there may be a variety of different strategies to correct the conducive condition(s). These corrective measures can vary greatly in cost and effectiveness and may or may not require the services of a licensed pest control operator. There may be instances where the inspector will recommend correction of the conducive conditions by either mechanical alteration or cultural changes. Mechanical alteration may be in some instances the most economical method to correct conducive conditions. If this inspection report recommends any type of treatment and you have any questions about this, you may contact the inspector involved, another licensed pest control operator for a second opinion, and/or the Structural Pest Control Service of the Texas Department of Agriculture.

Specify: N/A

11F. Explanation of signs of previous treatment (including pesticides, baits, existing treatment stickers or other methods) identified: N/A

11G. Visible evidence of: N/A has been observed in the following areas: N/A

If there is visible evidence of active or previous infestation, it must be noted. The type of insect(s) must be listed in the first blank and all identified infested areas of the property inspected must be noted in the second blank. (Refer to Part D, E & F, Scope of Inspection)

12A. Corrective treatment recommended for active infestation or evidence of previous infestation with no prior treatment as identified in Section 11. (Refer to Part G, H, and I, Scope of Inspection) Yes No

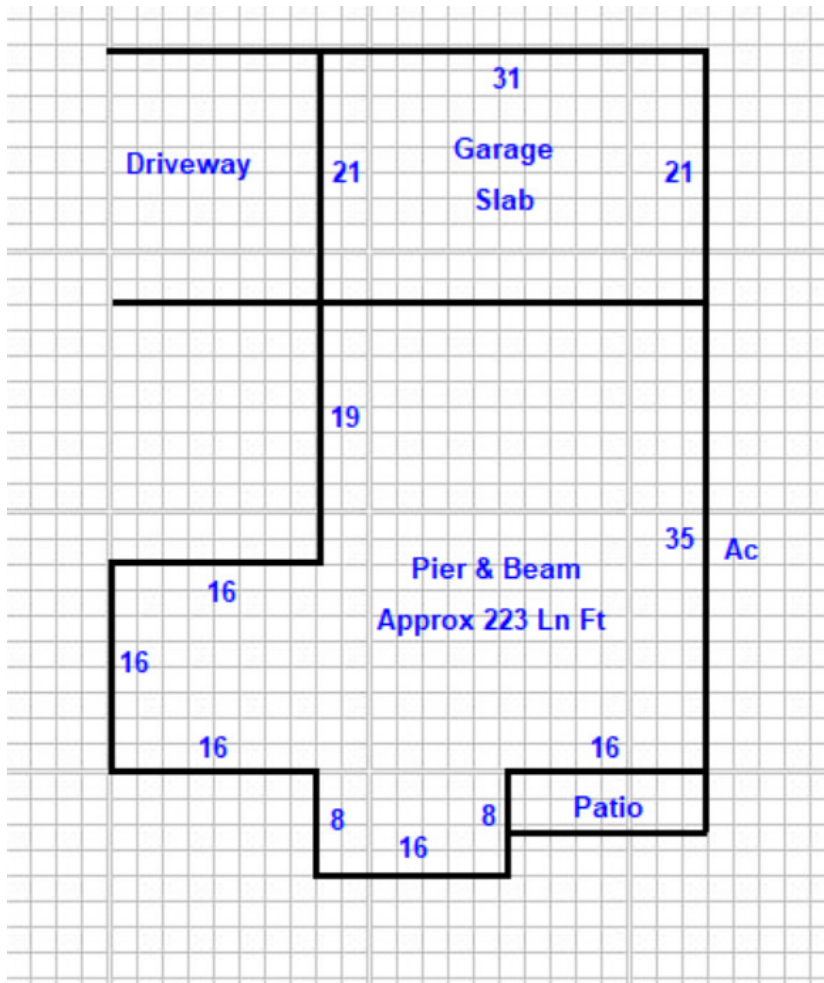

12B. A preventive treatment and/or correction of conducive conditions as identified in 10A & 10B is recommended as follows: Yes No

Specify reason: N/A

Refer to Scope of Inspection Part J

Diagram of Structure(s) Inspected

The inspector must draw a diagram including approximate perimeter measurements and indicate active or previous infestation and type of insect by using the following codes: E- Evidence of Infestation, A-Active; P-Previous; D-Drywood Termites; S-Subterranean Termites; F-Formosan Termites; C-Conducive Conditions; B-Wood Boring Beetles; H-Carpenter Ants; Other(s) - Specify N/A

Additional Comments Your home is eligible for a 12 month warranty. Your Inspection results do not provide for a treatment recommendation at this time. However this does NOT mean that this home does not have a hidden or inaccessible infestation or could be attacked at any time by a new infestation. Please see the attached addendum for important information.

Statement of Purchaser

I have received the original or a legible copy of this form. I have read and understand any recommendations made. I have also read and understand the "Scope of Inspection." I understand that my inspector may provide additional information as an addendum to this report.

If additional information is attached, list number of pages: 1

Signature of Purchaser of Property or their Designee _____ Date _____

Customer or Designee Not Present

Buyer's Initials _____

Thank you for your purchase of a WDI report (Termite inspection). Your report shows no signs of visually accessible insect activity at this time. However...

This does NOT mean it is free of a visually hidden, obstructed or inaccessible infestation. It could have an infestation right now that is impossible to determine by a visual inspection alone.

Now you can protect your new home with a choice of Termite protection plans.

Our Silver Warranty Program is only \$149.00 a year.

This comes with a one year warranty that covers the cost of termite treatment should an infestation be discovered or a new one occurs.

This warranty is renewable at \$99 and includes an annual inspection with a booster treatment.

Our Gold Warranty Program is only \$249.00 a year.

This includes a one year renewable warranty for subterranean termites and carpenter ants. It includes a suppression treatment of your homes perimeter as well as an annual inspection with a booster treatment.

This gold warranty program is renewable at \$199 and includes an annual inspection with a booster treatment
