This is a Class TV property. Please read and sign the Galveston County Private Wastewater Land Suitability Notice. This notice must be read and signed before these construction plans will be approved.

The final inspection is to assure the system has been constructed according to the submitted plan and is consistent with good public health engineering practices. The acceptance of this plan and the approval of the final inspection, however, should not be construed to mean that the Galveston County Health District recommends, approves, certifies, or guarantees septic tank systems or their satisfactory performance. In the Galveston County area due to the high water table, variation of water usage, soil and climatic conditions, septic tank systems cannot be expected to function properly at all times.
