| Funding Process for Future Large Infrastructure Needs: | | |
| As of 12/31/2018 the Reserve Fund totaled \$2.1 million. | | |
| We contracted with Reserve Advisors, Inc, Milwaukee WI to define necessary funding for anticipated future infrastructure spending. | Yes | Yes |
| Funding Goal: The Funding Goal of this Reserve Study is to maintain reserves above an adequate, not excessive threshold during years of planned significant expenditures. | | |
| A Cash Flow Method is used to compute the Reserve Funding Plan. This method offsets future variable Reserve Expenditures with existing and future stable levels of reserve funding. Our application of this method also considers: • current and future local costs of replacement • 1.2% annual rate of return on invested reserves | | |
| 2.0% future Inflation Rate for estimating Future Replacement Costs | | |
| Sources for <i>Local</i> Costs of Replacement: Our proprietary database, historical costs and published sources, i.e., R.S. Means, Incorporated. | | |
| Certification: This <i>Full Reserve Study</i> exceeds the Community Associations Institute (CAI) and the Association of Professional Reserve Analysts (APRA) standards fulfilling the requirements of a "Level I Full Reserve Study." | | |
| Current practice is to update the study every 5 years (2020 is next revision year). | | |
