Tex	Texas Termite Terminators Additional Statements Included in the Scope of Inspection Agreement that are	∍ not			
Α.	Promulgated by the Texas Department of Agriculture  This inspection is only good for the date and time of the inspection. Texas Termite Terminators, its Inspector employees and agents will not guarantee or warrant the absence of any wood destroying insect. Due to the characteristics and behavior of various wood destroying insects, the insects may not be visible or detectable and time of the inspection. Even with the best inspection, termites can remain hidden and unnoticed for a lon time. Swarming of wood destroying insects can occur in a short amount of time and may by the first signs of	on the date g period of the presence			
	of wood destroying insects that were not detectable at the time of the original inspection. If swarming occurs date and time of the original inspection and active wood destroying insects were not detectable at the time of inspection. Texas Termite Terminators, its Inspectors, employees and agents cannot be liable for the non-definfestation and will not assume any liability for corrective actions needed and will not assume liability for non-hidden wood damage.	the original tectable			
В.	Texas Termite Terminators Standard Operational Inspection Procedures: The Inspector will perform a visual the visible and accessible foundation perimeter beam (slab-on-grade foundation), visual inspection of the visi accessible exterior perimeter beam and accessible interior perimeter beam and piers (pier-&-beam foundation visible and accessible exterior wood for active or signs of previous activity of a wood destroying insects, visual of the structures accessible interior walls, ceiling, baseboards and cabinetry and visual inspection of the accessible attic.  The inspector will not deface the structure, cut holes, remove panels, pull back carpet, lift floor treatments, cut	ble and n), probe al inspection essible areas at holes in			
C.	the floors, wall or ceilings, move boxes, furniture, personal items or effects. The inspector will then complete using the SPCB required standards for completing this form. These standards can be provided to you upon readditional Information from Texas Termite Terminators. AREAS OF POTENTIAL NON-VISIBLE WOOD DESTROYING INSECT ACTIVITY AREAS ARE LISTED BUT NOT LIMITED TO THE FOLLOWING: In the	equest. ) wall voids at			
	the bathroom bathtraps and shower stalls/enclosures, plumbing penetrations within the construction wall void high soil lines, behind heavy foliage, non-visible slab joints, non-visible slab cracks, under and/or behind deck raised patios, behind cosmetic repairs of the foundation beam, within sill plates and between sub-floors and a area that the Inspector marks as inaccessible in section 6B of this report. Texas Termite Terminators and its employees and agents will not assume any liability for active infestation of a wood destroying insect that is not and/or accessible to the Inspector at the time of the original inspection.	ks and/or any other Inspectors,			
D.	The Inspector will do his/her best to access and to inspect all accessible and visible areas and/or component structure. This inspection is only good for the date and time of this inspection and Texas Termite Terminators Inspectors, employees and agents will not assume any liability for non-accessible areas and non-visible wood insects. If for any reason you are unhappy with the performance of the Inspector, his/her findings or unwilling the scope of this inspection. Texas Termite Terminators will be more than happy to refund to you the cost of inspection within 90 day's from the date of the original inspection. The refund is contingent on you surrendering of this inspection report back to Texas Termite Terminators and you releasing Texas Termite Terminators, its and its agents from all future liabilities to the inspected property. This refund cannot be made if the report has been used to close on a real estate transaction.	s, its d destroying to accept this ng all copies employee			

#### TEXAS OFFICIAL WOOD DESTROYING INSECT REPORT

Rule §7.176 Requires this department prescribed form to be used for real estate transactions in Texas regarding the visible presence or absence of wood destroying insects and conditions conducive to infestations of wood destroying insects.

13822 Senca Park Drive	Houston	77077
Inspected Address	City	Zip Code
	SCOPE OF INSPECTION	

- A. This inspection covers only the multi-family structure, primary dwelling or place of business. Sheds, detached garages, lean-tos, fences, guest houses or any other structure will not be included in this inspection report unless specifically noted in Section 5 of this report.
- B. This inspection is limited to those parts of the structure(s) that are visible and accessible at the time of the inspection. Examples of inaccessible areas include but are not limited to (1) areas concealed by wall coverings, furniture, equipment and stored articles and (2) any portion of the structure in which inspection would necessitate removing or defacing any part of the structure(s) (including the surface appearance of the structure). Inspection does not cover any condition or damage which was not visible in or on the structure(s) at time of inspection but which may be revealed in the course of repair or replacement work.
- C. Due to the characteristics and behavior of various wood destroying insects, it may not always be possible to determine the presence of infestation without defacing or removing parts of the structure being inspected. Previous damage to trim, wall surface, etc., is frequently repaired prior to the inspection with putty, spackling, tape or other decorative devices. Damage that has been concealed or repaired may not be visible except by defacing the surface appearance.

  The WDI inspecting company cannot guarantee or determine that work performed by a previous pest control company, as indicated by visual evidence of previous treatment, has rendered the pest(s) inactive.
- D. If visible evidence of active or previous infestation of listed wood destroying insects is reported, it should be assumed that some degree of damage is present.
- E. If visible evidence is reported, it does not imply that damage should be repaired or replaced. Inspectors of the inspection company usually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of damage and any corrective action should be performed by a qualified expert.
- F. THIS IS NOT A STRUCTURAL DAMAGE REPORT OR A WARRANTY AS TO THE ABSENCE OF WOOD DESTROYING INSECTS.
- G. If termite treatment (including pesticides, baits or other methods) has been recommended, the treating company must provide a diagram of the structure(s) inspected and proposed for treatment, label of pesticides to be used and complete details of warranty (if any). At a minimum, the warranty must specify which areas of the structure(s) are covered by warranty, renewal options and approval by a certified applicator in the termite category. Information regarding treatment and any warranties should be provided by the party contracting for such services to any prospective buyers of the property. The inspecting company has no duty to provide such information to any person other than the contracting party.
- H. There are a variety of termite control options offered by pest control companies. These options will vary in cost, efficacy, areas treated, warranties, treatment techniques and renewal options.
- I. There are some specific guidelines as to when it is appropriate for corrective treatment to be recommended. Corrective treatment may only be recommended if (1) there is visible evidence of an active infestation in or on the structure, (2) there is visible evidence of a previous infestation with no evidence of a prior treatment.
- J. If treatment is recommended based solely on the presence of conducive conditions, a preventive treatment or correction of conducive conditions may be recommended. The buyer and seller should be aware that there may be a variety of different strategies to correct the conducive condition(s). These corrective measures can vary greatly in cost and effectiveness and may or may not require the services of a licensed pest control operator. There may be instances where the inspector will recommend correction of the conducive conditions by either mechanical alteration or cultural changes. Mechanical alteration may be in some instances the most economical method to correct conducive conditions. If this inspection report recommends any type of treatment and you have any questions about this, you may contact the inspector involved, another licensed pest control operator for a second opinion, and/or the Structural Pest Control Service of the Texas Department of Agriculture.

## **Eastern Subterranean Termite Infestation**

Texas Termite Terminators or it's designee has inspected the building noted above for the purpose of determining visible evidence of Wood Destroying Insects, as defined by the Texas Department of Agriculture. Texas Termite Terminators or it's designee has provided a written report of its findings to the client. That report and the Limited Warranty are subject to the terms and condition of the Inspection Agreement, as well as the Scope and Limitations of the Limited Warranty. The parties agree that the liability of Texas Termite Terminators is as follows:

If Eastern Subterranean Termites are visually observed while this 90 day FREE Protection (Convertable to a Lifetime Renewable Termite Treatment Protection) is in good standing, Texas Termite Terminators will have the infestation treated as is determined by the terms of this agreement. Any areas having "Conducive Conditions" as noted in the written report are exempt from this coverage unless remedied and reinspected by Texas Termite Terminators (a re-inspection fee may apply).

GENERAL TERMS, SCOPE, AND LIMITATIONS ARE SET FORTH ON PAGE TWO OF THIS CERTIFICATE
