Re: FHA, TX Foundation Inspection – 2953 Levi Sloan Rd., Victoria, TX 77904

On January 19, 2022, the foundation inspection of the subject structure was performed by ADP & Associates, Inc. The manufactured home was analyzed with reference to and meets the intent of the HUD publications HUD 7584 and "Permanent Foundations Guide for Manufactured Housing, HUD-007487", September 1996 Edition, including paragraph 101-2 and HUD Handbook 4930.3G and 4000.1.

The home had manufacturer's adhered plate(s) to the exterior of the home, certifying the manufactured home had been constructed in accordance with HUD requirements. The HUD plate(s) contained the numbers: PFS1037257 and PFS1037258.

The additional structures appear to meet HUD Manufactured Home Construction & Safety Standards and do not affect the structural integrity of the home; however, no components were disassembled to view interior structural members and their connections. It appears the additions to the main structure are in serviceable condition and that they will function for the use intended.

The structures tongues, wheels and hitches have been removed. The Subject property appears to be an original installation and to the best of my knowledge has not been moved from another location. The property tax appraiser or other taxing entity could be consulted to see when the home was built and when it was recorded at the site for taxing purposes.

My findings of the foundation, as of the certified date below, are that the foundation meets the intent of the U.S. Department of Housing and Urban Development publications HUD 7584 and U.S. Department of Housing and Urban Development publications HUD 7584 and the "Permanent Foundations Guide for Manufactured Housing, HUD-007487," September 1996 Edition, and HUD Program for permanent foundations as outlined in 24CFR 3280, 3282, 3285 and 3286.803 and 3286.805 " and Handbook 4000.1. Also, State of Texas Administrative Code, Chapter 80.
