If the answer to any of the items in Section 3 is Yes, explain (attach additional sheets if necessary):

Water Damage Not Due to a Flood Event – The refrigerator water line had a cut in it at some point. Created some water damage on the side of cabinet about 3" from the bottom. Dried out and repaired.

Wood Rot – The trim around garage door had a small bit of softness in one of the corners from improper joint alignment. Wasn't sealed or painted from original build. Went and replaced all three sides even though it was in a small area in one corner. Replaced with treated wood and secured more nails than originally done. Sealed completely with new caulk and freshly painted.

*A single blockable main drain may cause a suction entrapment hazard for an individual.
