

Flood Mitigation Efforts regarding Braeswood Area

The Harris County Flood Control District has a significant number of flood damage reduction projects occurring all over Harris County as part of its on-going Capital Improvement Program (CIP), Operations and Maintenance, and the 2018 Bond Program.

Projects In Brays Bayou Watershed

Brays Bayou Federal Flood Control Project Channel Modifications

- Full channel section from Upstream of S. Rice to upstream Fondren
- Ninth reach of channel improvements in support of the Brays Bayou Federal Flood Damage Reduction Project.
- Partnership project with the City of Bellaire and TxDOT to develop a master drainage concept plan to improve drainage along the major north-south running drainage ways in the City of Bellaire. Bellaire will be the lead agency for this study.
- Willow Waterhole Detention Basin. This project consists of construction of a channel control structure necessary for the operations of the Willow Waterhole Basin, in support of the Brays Bayou Federal Flood Damage Reduction Project.

EMERGENCY POST-HARVEY REPAIRS HAVE ALREADY BEEN COMPLETED AT THE FOLLOWING LOCATIONS:

- Brays Bayou near Lawndale Street
- Cypress Creek near Cypresswood Drive
- Brays Bayou, Calhoun Road to HCFCD Unit D120-00-00
