

## **INFORMATION ABOUT THE POOL AND BADU SWIM JETS**

Pool has Pentair IntelliFlo VS-3 programmable and can be remotely controlled by phone or tablet.

IntelliFlo VSF pump is the first variable speed and flow pump that adjusts to changes in flow conditions to maintain its preprogrammed flow rate to run optimally throughout the entire filtration cycle. It's like having cruise control for your pump. Eight programmable speed or flow settings and built-in timer. Adjusts to Changing Conditions

The IntelliFlo VSF pump is the first of its kind to respond to changes in your pool's environment in order to maintain a pre-programmed flow rate. There's no more guesswork—just set it and forget it. The IntelliFlo VSF variable speed pool pump always delivers the precise flow for peak performance.

It has a freeze mode that monitors the outside temps and runs the pump during freezing temps, automatically (as long as there isn't a power outage). Can remotely control spa, lights, heater, blowers ...and anything else connected to it, through the IntelliFlo VS system.

Best of all... SAVES ENERGY!!!!

Badu STREAM II swim jets

Aquatic Exercise & Therapy

Provides a mild to vigorous workout with endless swimming  
Great for walking in place – with no stress on joints or bones  
BADU SwimJet Systems push water through adjustable jet nozzles that create a concentrated and customizable water flow. There is a “burst area” at the jet outlet capable of a flow rate of up to 400 gallons per minute at 37 feet per second. The system then pushes the body of water in front of it – creating a current (or “flow”) of up to 5,700 gallons per minute – measured between 4 and 6 feet from the pool wall. We call this the “sweet spot”. This sweet spot and the direction of the flow and its rate is completely adjustable. Our systems don't limit you to the use of your pool because you are able to direct this sweet spot as you like and continue to enjoy other areas of your pool as you normally would.

Upgraded items

- upgraded pool tile
- toe tiling around edges of the steps and spa seat
- hand rail
- additional 400+sf of concrete decking,
- automatic pool filler (maintains water level by filling the pool, connected to water spigot).
