RE: Addition at 12626 Kingsride Lane, Houston, Texas 77024

Dear Mrs. Blackard:

Our firm has performed a structural analysis of the existing foundation of this residence to determine if it is adequate to support the anticipated loads of the new second floor addition. Our structural analysis was based on the provided architectural plans and a soil report for this site prepared by ARM Soil Testing LLC, Report Number G21-352, dated May 19, 2021. Our analysis found that the existing foundation, with the additional footings shown on our foundation plan, is adequate to support the anticipated loads of the new second floor addition.

Please call me if you have any questions or need further information.

Yours truly,

Bryan Hendricks, P.E.
President
Hendricks Engineers, Inc.
