

Marchal/Stevenson Elevator

3-Stop

2019 Preliminary Pricing for the Inclinator Elevette® MRL Overhead Cable Drum

Project Name: Nell Dougherty
 Project Address: 103 Isles End Rd, Galveston, TX 77554

1000# Capacity

Materials	Unit Cost	Items Included
Base Cost for a Cab Size up to 15 sq ft & 6'8" Tall - 1000lb Capacity		\$22,615
Includes Labor, Materials, Any Necessary Drawings & Freight		Included
200 Series Cab in Unfinished Red Oak or Unfinished Maple		Included
Hanging Wall Phone - Black or White (All Elevators Require a Phone)		Included
Soft Start/Stop System		Included
Emergency Battery Lowering System		Included
Emergency Alarm Bell & Light		Included
Vinyl Accordion Fold Gate		Included
2 LED Lights (White or Oil Rubbed Bronze Trim Rings)		Included
Wood Handrail to Match Panels		Included
Car Operating Panel, Flush or Raised, Includes Keylock		Included
Digital Positioning Indicators on Car Operating Panel & Hall Stations		Included
Machine Decking (If Necessary)		Included
Homing Device		Included
Automatic Lighting		Included
Inclinator Door Frame - To Be Installed by Others (EACH - Doesn't include early shipping charges, if needed)	\$336	
Additional Opening on Same Floor-(Includes Door Lock, Hall Station & Low-Voltage Wiring)	\$650	
Cab Heights Over 7'	\$340	
Finished Panels - Clear Coat Only	\$325	
Finished Panels - Standard Factory Stains with Clear Coat or Standard White Paint	\$500	
Laminate or Unfinished/Finished Oak Flooring	\$175	
200 or 300 Cab in Cherry, Mahogany, Clear Alder (For 300 Cab Charge - See Price Below)	\$175	
200 or 300 Cab in Walnut (For 300 Cab Charge - See Price Below)	\$325	
250 Cab Upgrade - Solid Wood Frame with MDF Veneer Insert	\$1,188	
300 Cab Upgrade	\$775	
400 Cab Upgrade Recessed - Any Species from Brochure (Add \$125 for Walnut)	\$2,575	
400 Cab Upgrade Raised- Any Species from Brochure (Add \$125 for Walnut)	\$3,856	
400 Series Ceiling Options: 1 Over 1 \$518 2 Over 2 \$775 Single \$450		
500 Acrylic Cab Upgrade	\$5,156	
Acrylic Panels (Cost Per Panel)	\$1,468	
Acrylic 1/2 Wall Panels (Cost Per Panel)	\$818	
Hall Stations: Keyswitch (Each) for Hall Station	\$50	
Hall Stations: Water/Corrosion Resistant Option (Each)	\$218	
Flush Mounted Speaker Phone - Brushed Stainless, Brushed Brass, Oil Rubbed Bronze	\$395	
Phone Box: Any Color	\$290	
Flat Handrail - Brushed Brass or Brushed Stainless Steel	\$395	
Round Handrail- Brushed Stainless Steel or Brushed Brass	\$272	
Round Handrail - Oil Rubbed Bronze	\$395	
(4) LED Lights	\$95	
Scissor Gate by Inclinator-Anodized Aluminum (NOT Painted): Clear Anodized Aluminum (Stainless Steel Color) - (Add \$161/Each Gate for Oil Rubbed Bronze Anodized Finish): Single Opening \$1,875 Opposite Opening: \$4,042 Adjacent Opening: \$4,342		
Accordion Gate: Vinyl Single Opening: Included Opposite Opening: \$960 Adjacent Opening: \$1260 3-Gate: \$2582		
Accordion Gate: Clear Panel Single Opening: \$218-Opposite Opening: \$1,260-Adjacent Opening: \$1,560-3-Gate: \$3,182		
Accordion Gate: Real Wood Veneer Single Opening: \$393 Opposite Opening: \$1,746 Adjacent Opening: \$2,046		
Accordion Gate: Aluminum (Solid/Perf.) Single Opening: \$318 Opposite Opening: \$1,596 Adjacent \$1,896		
ADD \$250 EACH GATE FOR GOLD		
Vision Panels for Accordion Gates (Each)	\$30	
Automatic Gate Operator	\$1,430	
Automatic Door Operator	\$1,730	
Sloped Dome Cab	\$1,300	
Subtotal		\$22,615.00
City Permit and/or State Inspection, If Needed		
Tax - May be Exempt with RX (Doesn't apply for lump-sum contractors) - Ask for Details		\$1,038.00
Total Project Cost		\$23,653.00

Estimated Lead Time: 12 Weeks -NOT GUARANTEED

Price Firm for 30 Days - Does not include construction costs to prepare hoistway & provide electrical

NOTE: ALL PRICES ALREADY INCLUDE 3.5% DISCOUNT FOR CHECK OR CASH

General Structural Notes:

Design Conditions

Dead and Live Loads per IRC 2009,

Wind Condition 120 mph, 3 sec gust

Framing Lumber:

#2 SYP or Better (Treated for all exposed framing)

All exposed lumber, or in contact with concrete shall be treated

Fastener Schedule for Structural Members Shall be per IRC2009 Except as Noted Herein

Components and cladding pressures for window/Door/Siding selection:

All components must be certified to these pressures and compliant with Texas Windstorm Product Requirements. Refer to Texas

Department of Insurance, Windstorm Product Approvals for acceptable products.

Clips and Straps, unless otherwise noted:

Part #'s listed are Simpson

LSTA 15 Straps or H105 at connection to existing roof. Notify Engineer to Verify correct selection to exceed uplift requirement of 528 lbs/

rafter. (Verify existing gable roof is strapped, when new ceiling/gable support beams are installed install Simpson H2.5A from gable stud

wall to new beam. At end of support beam install LSTA18's to transfer roof load to wall framing. At base of stud framing supporting beam

install Simpson HDU connection from stud wall to floor joists.

H105 Clips from 2x8 rafter to stud wall.

Other framing connectors as specified in drawing set

All metal framing connectors in contact with treated lumber must be "Z" type.

Consult manufacturer's instructions for nail sizes.

All straps to be installed with fasteners that give maximum load capacity as specified in manufacturer's documentation

Special Notes:

Care must be taken to insure nails are not overdriven in sheathing, decking, siding and similar applications.

All exposed lumber must be treated

The Engineer-of-Record must be contacted when conflicts in structural requirements are discovered. Do not proceed until resolution of

conflicts are complete.

5/8" Sheathing OSB or Plywood nailing 4" O.C. 8d ring shank nails. Blocking at any seams.

MINIMUM DESIGN LIVE LOAD CONDITIONS

BASED ON TABLE R301.5

ATTICS WITH STORAGE: 10 PSF

ATTICS WITH LIMITED STORAGE: 20 PSF

BALCONIES (EXTERIOR) AND DECKS: 40 PSF

GUARDRAILS AND HANDRAILS: 200 LBS

GUARDRAIL AND INFILL COMPONENTS: 50 LBS

ROOMS OTHER THAN SLEEPING ROOMS: 40 PSF

SLEEPING ROOMS: 30 PSF

STAIRS: 40 PSF

DEAD LOADS:

ROOF: 10 PSF

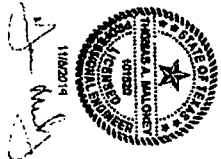

DECKS: 10 PSF

FLOOR: 10 PSF

WALLS: 11 PSF

REQUIRED WINDSTORM INSPECTIONS:

1. FRAMING & WIND STORM HOLD DOWN INSTALLATION
 2. EXTERIOR SHEATHING
 3. WINDOWS/DOORS
 4. EXTERIOR SIDING
- (WINDSTORM INSPECTOR MUST BE NOTIFIED, 24 HRS IN ADVANCE, PRIOR TO COVER UP OF ANY ITEM)
- CITY INSPECTIONS ARE SEPARATE FROM WINDSTORM INSPECTIONS. OWNER/ CONTRACTOR TO NOTIFY CITY FOR SCHEDULING INSPECTIONS.

Customer Information

Please provide job site information in the area below:

Resident's Name (if applicable)

Resident's Phone Number (if applicable)

Project # (Applicable when permit is required by local municipality)

Street Address

City, State, Zip Code

Please provide billing information in the area below:

Name (If a business, provide business name and contact)

Phone Number (If a business, provide office phone number)

Fax Number

Street Address

City, State, Zip Code

Email

Do you prefer to have information sent by Fax Email or Standard Mail?

INCLINATOR® ELEVETTE® | HOME ELEVATORS

From simple accessibility to distinctive elegance.

*Image pictured does not show gate or interlock.

INCLINATOR
COMPANY OF AMERICA

You can be confident in choosing an Inclinator product.

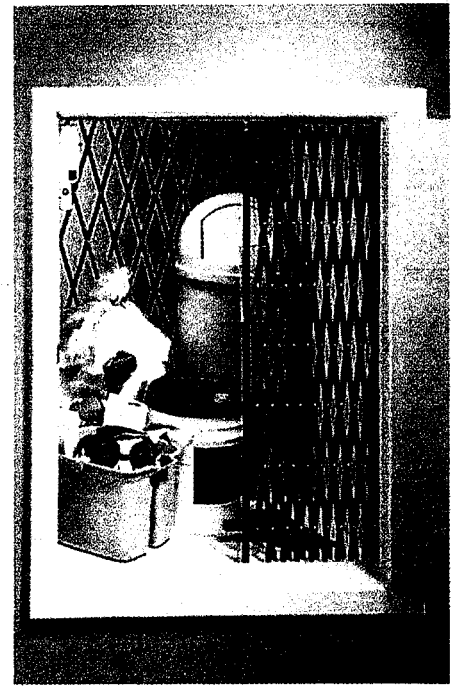

Home Elevators

From simple accessibility to distinctive elegance, Elevette® has the most standard features and custom options. America's #1 brand.

Vertical Platform Lifts

The Inclinator Serenity wheelchair lift is the choice of homeowners throughout North America, offering easy access into and out of your home.

Commercial and Residential Dumbwaiters

Move heavy or bulky items effortlessly with a commercial or residential dumbwaiter from Inclinator.

Best Name in the Industry

Engineered for Reliability | Handcrafted Elevator Cabs | Robust Control System

Optional Phone

We offer a flushed mount speaker phone.
An analog telephone line is required.

4 1/8 x 9 7/8"

Exterior - Water Resistant Hall Stations

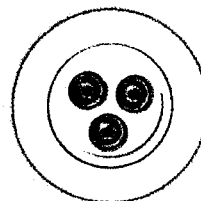

Available in brushed stainless only

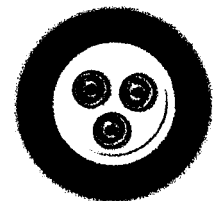

Closed with Hinged Cover

Lights

Up to four LED lights available (2 standard) which also serve as emergency lighting. Or supply your own lighting to match your home decor. For homeowner supplied lights, an emergency light is provided.

White

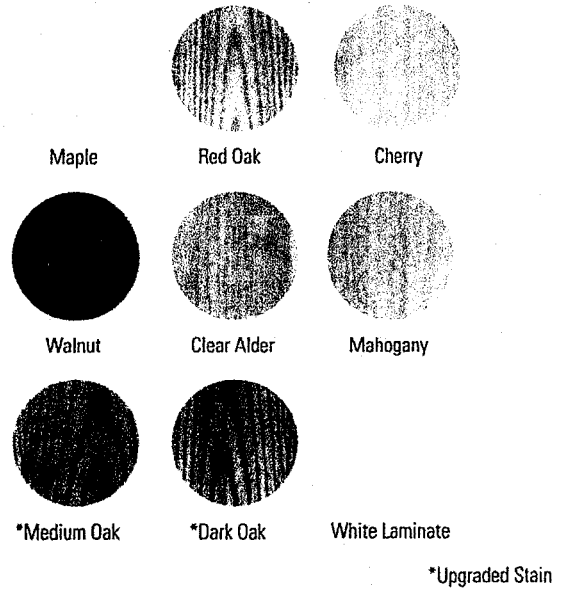

White & Painted Bronze

3 1/2" Diameter Recessed Down Light with Three
1-Watt High-Power LEDs with Pivoting Center

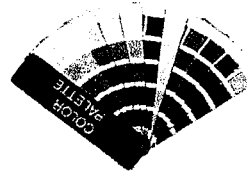

Cab Finishes

Walls and Ceiling

The following wood species are available for our 200, 250, 300 and 400 Cabs. Many other wood species can be special ordered upon request. White laminate available for ceilings only. Acrylic ceilings are also available.

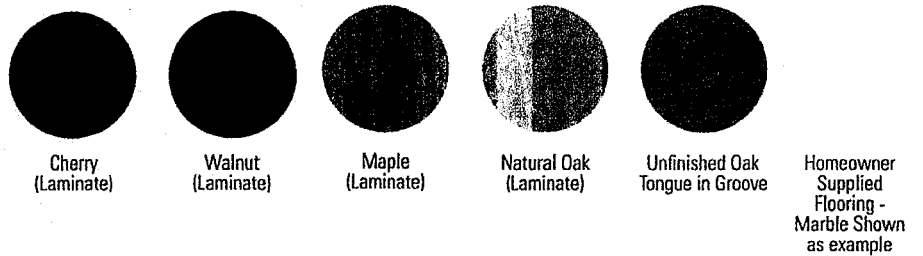

Available in satin, semi-gloss, clearcoat or virtually any custom paint or stain.

Flooring

The following floor options are available.

Handrail

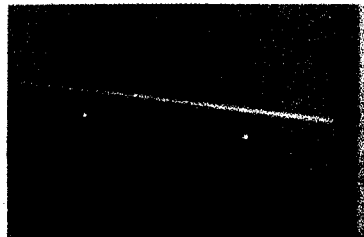

One flat wood handrail, finished to match walls, is standard. Optional round metal handrail is available in one of these finishes

Brushed Stainless

Brushed Brass

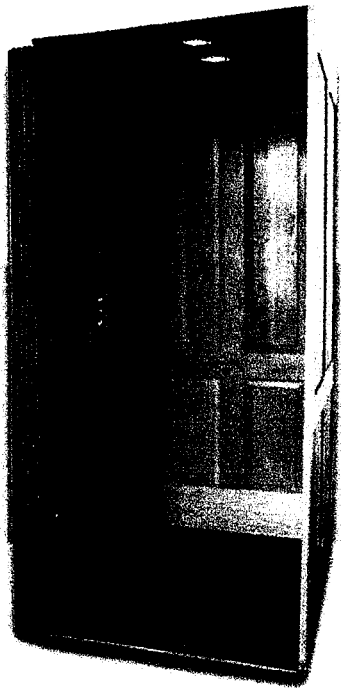

Oil Rubbed Bronze

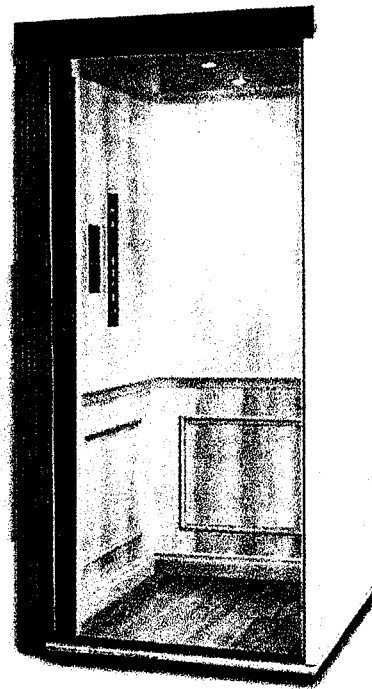

Standard: Flat Wood Handrail

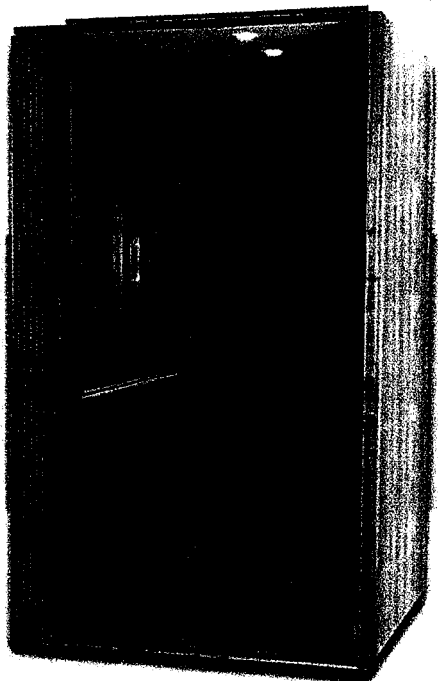

Optional: Round Metal Handrail

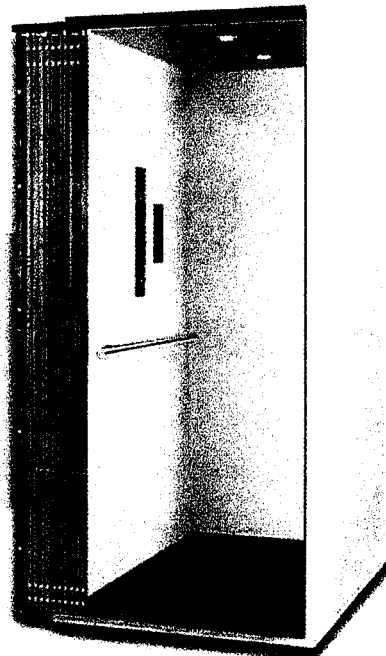

400 Cab
Solid wood with hardwood veneer raised or recessed panels. This cab complements a traditional home style.

300 Cab
Smooth hardwood veneer panels with crown, chair, baseboard, and picture molding.

200 Cab
Smooth hardwood veneer panels with flush corners make this style ideal for more contemporary designs.

100 Cab
Paintable MDF panels with plywood core. White laminate ceiling. Shown with clear aluminum scissor gate

Beautiful Cab Styles

With the Best Fit and Finish
In the Industry

Choose a standard model or design a one-of-a-kind elevator.

Inclinators Elevette® is available in six cab styles, three drive systems, many door configurations and the most custom features and accessory options. Elevette can be placed in an interior or exterior elevator shaft.

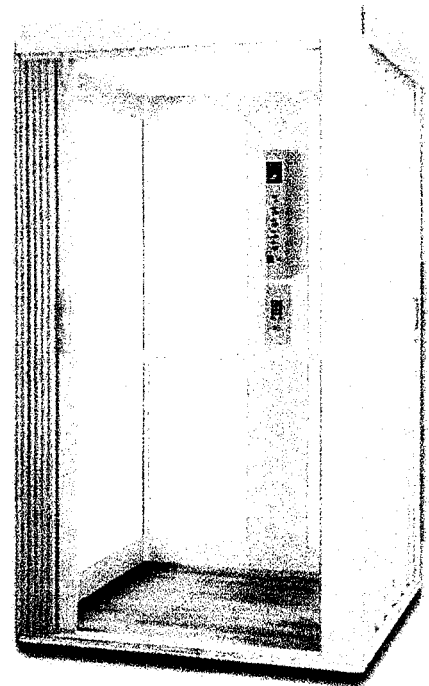

Elevette has more standard features and custom options than any other home elevator brand.

Standard Features

- 100 Cab
- Accordion Gate (vinyl)
- Wooden Handrail
- Two (2) LED Lights
- Cab Operating Panel
- Hall Stations
- Cab Height – Up to 96" inside
- Up to 15 sq. ft. Cab Size

Custom Features

- Telephone
- Upgraded Cab Styles
- Upgraded Hand Rail
- Upgraded Accordion Gates
 - Hardwood
 - Acrylic
 - Aluminum
- Scissor Gates
- Custom Finish for Cab
- Hardwood Floor
- Non-skid Laminate Floor
- Over 50" Cab Width
- Water Resistant Hall Station
- Up to four (4) LED Lights
- Acrylic Cab Window/ Dome
- Auto Gate Opener
- Auto Door Opener

500 Cab

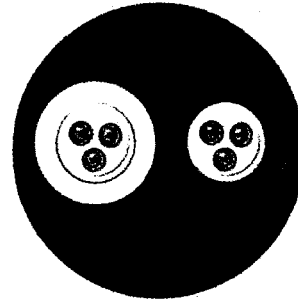

Powder-coated extruded aluminum frame with acrylic panels that provide a panoramic view. Frame available in silver, white, or black.

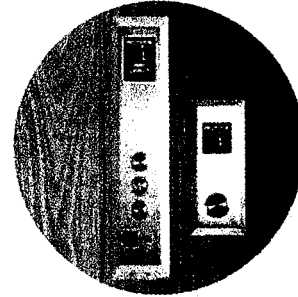

250 Cab

Shaker style with solid wood frame and veneer inserts. Shown with oil rubbed bronze scissor gate.

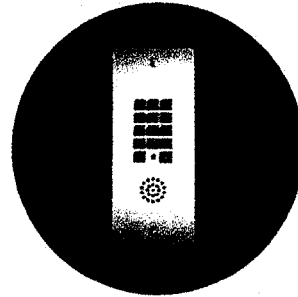

Elevator Cab Components

LED ceiling lights, or add your own lights

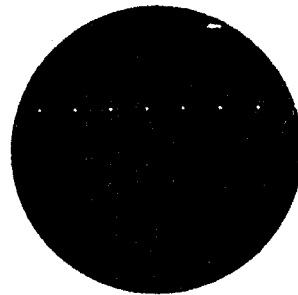

Cab Operating Panel, inside cab and Hall Station at each landing's door

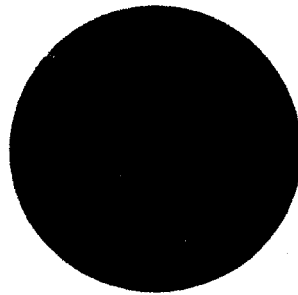

Optional flush mount phone

Wood or metal handrail

3. Folding car doors be designed and installed to withstand a force of 75 lbs. applied horizontally using a 4" diameter sphere at any location within the folds on the car door, without permanent deformation. The deflection shall not exceed $\frac{3}{4}$ " and shall not displace the door from its guides or tracks. The force shall be applied while the door is in the fully closed position.

4. Horizontally sliding car doors and gates be designed and installed to withstand a force of 75 lbs. applied horizontally on an area 4" x 4" at right angles to and at any location on the car door or gate without permanent deformation. The deflection shall not exceed $\frac{3}{4}$ " and shall not displace the door from its guides or tracks. The force shall be applied while the door is in the fully closed position.

These code revisions are designed to eliminate the small child entrapment and injury hazard.

Is this code change mandatory for all residential elevator companies and their dealers?

ASME 17.1/CSA B44 are voluntary national safety standards prepared by dedicated elevator industry professionals with high levels of expertise. ASME 17.1/CSA B44-2016 was published on November 30, 2016. Compliance to the new standard is required within six months of its publication.

States and local governments use ASME 17.1/CSA B44 as guidance for state and local requirements that are required by law. Adoption of ASME 17.1/CSA B44-2016 will vary by state and local governments.

Inclinator Company of America is committed to providing residential elevators that meet the highest safety standards. We started installing light curtains as a standard feature in 2015 as a short-term measure to improve safety as these code changes were being developed and approved.

We will be following ASME 17.1/CSA B44-2016 for all units to be installed on and after May 30, 2017. This means that we will only be shipping units with code compliant car gates a few weeks before May 30, 2017 to ensure that installations on and after May 30, 2017 comply with ASME 17.1/CSA B44-2016.

What if I install an Inclinator residential elevator that isn't compliant with the new code change on or after May 30, 2017?

Inclinator Company of America will be modifying its Terms and Conditions of sale with additional wording requiring that the installing Dealer follow ASME 17.1/CSA B44-2016 and indemnify Inclinator Company of America for any injuries or property damages that occur due to any installation not meeting the requirements of ASME 17.1/CSA B44 on and after May 30, 2017.

We are urging all dealers to sell and install only ASME 17.1/CSA B44-2016 code compliant elevators on and after May 30, 2017. These code changes are being driven by safety concerns, especially the potential entrapment and injury of young children between the hoistway door and the car door.

Why the code change is an industry-wide necessity

Being an early adopter of the code change can be incredibly beneficial for dealers as they become their customers' number one advocates. Consumers want to know that the companies and dealers they do business with care about their well-being, and choosing to sell only code-compliant elevators is a simple way to accomplish this.

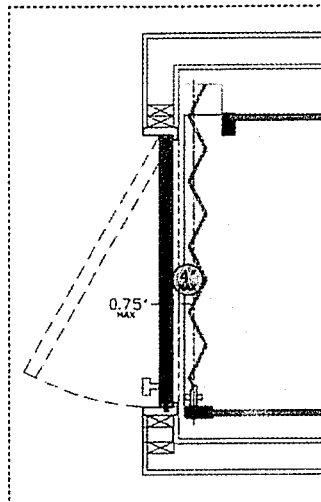

ASME 17.1-2016 (Safety Code for Elevators and Escalators) Has Been Revised.

It Was Published on November 30, 2016 and is Effective as of May 30, 2017

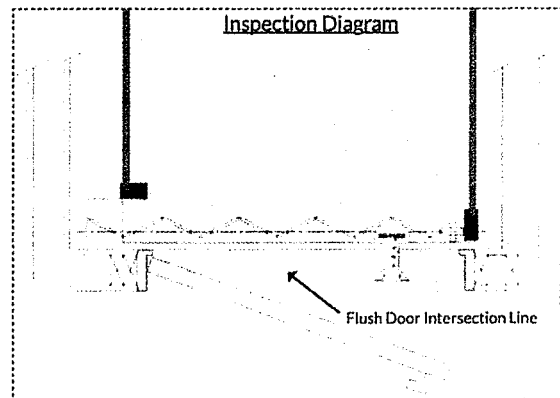

Did you know that changes have been made to Sections 5.3.1.7.2 (Clearance Between Hoistway Doors and Landing Sills), 5.3.1.8.2 (Car Doors and Gates), and 5.3.1.8.3 (Clearance Between Hoistway Doors and Gates) to improve the safety of residential elevators?

The ASME ANSI A17.1/CSA B44-2016 National Safety Code for Elevators – Section 5.3 Private Residence Elevators revisions were made to prevent entrapment and injury of small children between the hoistway door and the car gate. The reduced clearances were based on a hazard analysis that was conducted and provided to the ASME 17.1 Residence Elevator subcommittee.

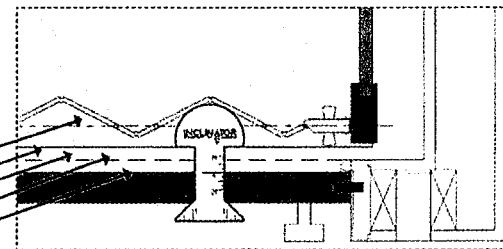

New Requirements

Inspection Diagram

Accordian Car Door
Car Sill
Running Clearance
Inside Hoistway Face
Flush Door Surface

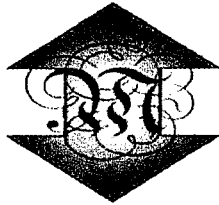

What code changes were made to improve the safety of residential elevators?

THE CODE REVISIONS REQUIRE THAT...

1. Where swinging hoistway doors and either folding or horizontally sliding car doors are used and both doors are in the fully closed position, the space between the hoistway door and the car door reject a 4" diameter ball at all points.
2. The distance between the hoistway face of the hoistway doors and the hoistway edge of the landing sill not exceed $\frac{3}{4}$ " for swinging doors.

INCLINATOR
COMPANY OF AMERICA

Marchal/Stevenson Elevator

PLEASE READ

The following is to be provided by the contractor/owner:

1. Adequate space for the elevator machinery.
2. Voltage: 220V – 30Amp service #10-3-WG wire for motor (dedicated line)
110V – 20Amp service #12 wire for car lights, phone line
**Please leave 15-20ft of extra wire in machine area
3. Provide doors: solid core, wood, 1 hour fire-rated – and door latches.
4. Swing of doors must be the same on all floors, unless otherwise approved.
5. Pit depth: 8" for a geared elevator, 9" for a hydraulic elevator (below finish grade floor).
6. Main rail: 2x12 pine support, full length of shaft, properly supported (please do not sheetrock 2x12's).
7. Auxiliary rail: 2x6 pine support, full length of shaft, properly supported.
8. Properly framed hatch in accordance with Marchal/Stevenson sketches.
9. Repair, cut and patch walls and provide doorsills, if necessary.
10. If the elevator equipment is housed in a room or closet on any floor other than the attic, the entrance door must be self-closing and self-locking. This is to prevent unauthorized persons from entering the area.
11. Per 2016 ASME code: Provide a maximum distance of 4" between the inside face of hoistway doors and the car gate. Provide a maximum distance of ¾" from inside face of hoistway door to edge of the landing sill. Ask for details.
12. 6'8" cab height requires a minimum of 7'8" clear from uppermost floor level to hoistway ceiling. 8' cab height requires a minimum of 9' clear.

If you have any questions regarding these requirements, please contact Marchal/Stevenson for clarification.

3. Folding car doors be designed and installed to withstand a force of 75 lbs. applied horizontally using a 4" diameter sphere at any location within the folds on the car door, without permanent deformation. The deflection shall not exceed $\frac{3}{4}$ " and shall not displace the door from its guides or tracks. The force shall be applied while the door is in the fully closed position.

4. Horizontally sliding car doors and gates be designed and installed to withstand a force of 75 lbs. applied horizontally on an area 4" x 4" at right angles to and at any location on the car door or gate without permanent deformation. The deflection shall not exceed $\frac{3}{4}$ " and shall not displace the door from its guides or tracks. The force shall be applied while the door is in the fully closed position.

These code revisions are designed to eliminate the small child entrapment and injury hazard.

Is this code change mandatory for all residential elevator companies and their dealers?

ASME 17.1/CSA B44 are voluntary national safety standards prepared by dedicated elevator industry professionals with high levels of expertise. ASME 17.1/CSA B44-2016 was published on November 30, 2016. Compliance to the new standard is required within six months of its publication.

States and local governments use ASME 17.1/CSA B44 as guidance for state and local requirements that are required by law. Adoption of ASME 17.1/CSA B44-2016 will vary by state and local governments.

Inclinator Company of America is committed to providing residential elevators that meet the highest safety standards. We started installing light curtains as a standard feature in 2015 as a short-term measure to improve safety as these code changes were being developed and approved.

We will be following ASME 17.1/CSA B44-2016 for all units to be installed on and after May 30, 2017. This means that we will only be shipping units with code compliant car gates a few weeks before May 30, 2017 to ensure that installations on and after May 30, 2017 comply with ASME 17.1/CSA B44-2016.

What if I install an Inclinator residential elevator that isn't compliant with the new code change on or after May 30, 2017?

Inclinator Company of America will be modifying its Terms and Conditions of sale with additional wording requiring that the installing Dealer follow ASME 17.1/CSA B44-2016 and indemnify Inclinator Company of America for any injuries or property damages that occur due to any installation not meeting the requirements of ASME 17.1/CSA B44 on and after May 30, 2017.

We are urging all dealers to sell and install only ASME 17.1/CSA B44-2016 code compliant elevators on and after May 30, 2017. These code changes are being driven by safety concerns, especially the potential entrapment and injury of young children between the hoistway door and the car door.

Why the code change is an industry-wide necessity

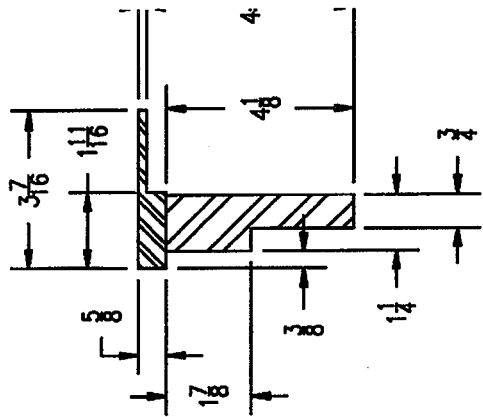

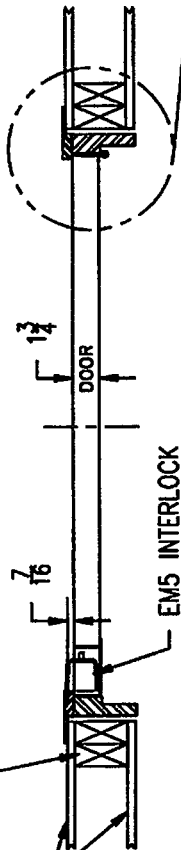

Being an early adopter of the code change can be incredibly beneficial for dealers as they become their customers' number one advocates. Consumers want to know that the companies and dealers they do business with care about their well-being, and choosing to sell only code-compliant elevators is a simple way to accomplish this.
