If the answer to any of the above is yes, explain (attach additional sheets as necessary): _____

*For purposes of this notice:

"100-year floodplain" means any area of land that: (A) is identified on the flood insurance rate map as a special flood hazard area, which is designated as Zone A, V, A99, AE, AO, AH, VE, or AR on the map; (B) has a one percent annual chance of flooding, which is considered to be a high risk of flooding; and (C) may include a regulatory floodway, flood pool, or reservoir.

"500-year floodplain" means any area of land that: (A) is identified on the flood insurance rate map as a moderate flood hazard area, which is designated on the map as Zone X (shaded); and (B) has a two-tenths of one percent annual chance of flooding, which is considered to be a moderate risk of flooding.

"Flood pool" means the area adjacent to a reservoir that lies above the normal maximum operating level of the reservoir and that is subject to controlled inundation under the management of the United States Army Corps of Engineers.

"Flood insurance rate map" means the most recent flood hazard map published by the Federal Emergency Management Agency under the National Flood Insurance Act of 1968 (42 U.S.C. Section 4001 et seq.).

"Floodway" means an area that is identified on the flood insurance rate map as a regulatory floodway, which includes the channel of a river or other watercourse and the adjacent land areas that must be reserved for the discharge of a base flood, also referred to as a 100-year flood, without cumulatively increasing the water surface elevation more than a designated height.

"Reservoir" means a water impoundment project operated by the United States Army Corps of Engineers that is intended to retain water or delay the runoff of water in a designated surface area of land.

Section 6. Have you (Seller) ever filed a claim for flood damage to the Property with any insurance provider, including the National Flood Insurance Program (NFIP)?* yes no If yes, explain (attach additional sheets as necessary): _____

*Homes in high risk flood zones with mortgages from federally regulated or insured lenders are required to have flood insurance. Even when not required, the Federal Emergency Management Agency (FEMA) encourages homeowners in high risk, moderate risk, and low risk flood zones to purchase flood insurance that covers the structure(s) and the personal property within the structure(s).

Section 7. Have you (Seller) ever received assistance from FEMA or the U.S. Small Business Administration (SBA) for flood damage to the Property? yes no If yes, explain (attach additional sheets as necessary): _____

Groundwater Conservation Program

The program enables the District to promote activities that conserve and preserve the water resources of Calhoun County. The District promotes activities such as rainwater harvesting, efficient use of groundwater, conjunctive use of groundwater and surface water, prevention of subsidence, prevention of waste, brush management, and recharge enhancement.

Contact Tim Andruss, General Manager to discuss matters related to groundwater conservation at:

- phone: (361) 579-6863
- email: tim.andruss@vcgcd.org

Useful information regarding ways to conserve groundwater can be accessed at the following web address:

- Groundwater Foundation: <https://www.groundwater.org/action/home/conserv.html>;
- Texas Water Development Board: <https://www.twdb.texas.gov/conservation/index.asp>;

The Management Plan of the District defines groundwater conservation as "the activity and practice of seeking to use a groundwater resource in a manner that appropriately balances the impacts associated with consuming the resource and preserving the resource for the future." The District undertakes many activities to achieve the "appropriate balance" between groundwater use and groundwater preservation including 1) establishing conservative [desired future conditions for Calhoun County](#), 2) adopting [rules that allow for limited groundwater production](#), 3) monitoring water levels and water quality of groundwater resources in Calhoun County, and 4) evaluating aquifer conditions using [scientifically-credible methods](#).

Promotion of Rainwater Harvesting: the District encourages all water users to investigate rainwater harvesting as a means of developing alternate water sources. Additional information regarding rainwater harvesting can be viewed at the following website of the Texas A&M Agrilife Extension: rainwaterharvesting.tamu.edu/rainwater-basics/.

Promotion of Efficient Use of Groundwater: the District encourages all users of groundwater to investigate methods of increasing water usage efficiency. Additional information regarding water efficiency opportunities can be viewed at the following website of the Office of Energy Efficiency and Renewable Energy: www.energy.gov/eere/femp/water-efficient-technology-opportunity-sprinkler-automatic-shut-devices.

Promotion of Conjunctive Use of Groundwater and Surface Water: the District encourages water users to examine conjunctive use practices when considering the development of water supply projects that involve groundwater resources. The combined use of groundwater resources with surface water may optimize the characteristics of each source and conserve and preserve groundwater resources. Additional information regarding innovative water technologies related to conjunctive use can be viewed at the following website of the Texas Water Development Board: www.twdb.texas.gov/innovativewater/

Promotion of Subsidence Prevention: the District encourages groundwater producers to investigate causes of subsidence, the vulnerability of areas within the aquifer to subsidence caused by groundwater production, and methods of developing groundwater resources to prevent subsidence caused by or contributed to by groundwater production. Additional information regarding subsidence can be viewed at the following website of the Texas Water Development Board: www.twdb.texas.gov/groundwater/models/research/subsidence/subsidence.asp

Promotion of Brush Management: the District encourages landowners to investigate the brush management as a means of potentially enhancing recharge to groundwater resources. Additional information regarding brush management and the effect on water resources can be viewed at the following site of the United States Geological Survey: www.usgs.gov/centers/ot-water/science/effects-huisache-removal-evapotranspiration?qt-science_center_objects=0#qt-science_center_objects=0

Promotion of Recharge Enhancement: the District encourages large-scale groundwater producers to investigate strategies to enhance recharge, including storage and recovery projects, as a means of conserving and preserving groundwater resources through conjunctive use. Additional information regarding ac storage and recovery can be viewed at the following website of the Texas Water Development Board: www.twdb.texas.gov/innovativewater/asr/index.asp
