Mr Schuler,

After a thorough inspection of this steep 2-story dwelling on July 11th 2021, I found no evidence of storm damage. The roof is a fiberglass composition shingle that is around 12yrs old and in fair condition. The shingles have normal granule loss for a 12yr old roof. This roof should have 5-8yrs of life left. Please call me at 713-725-9970, if you have any questions.

Thanks,
John hynes
