

**6: Siding or trim is damaged or deteriorated**

**Recommendation**

Back of home

Damaged or deteriorated siding and trim can allow access to water and insects into the home. Have damaged or deteriorated areas replaced.

Recommendation: Contact a qualified siding specialist.

Back door

**7: Wall is loose and moves when the pressure is applied.**

**Recommendation**

Stairwell

Walls, especially partial walls around stairways can become loose over time. If the wall continues to loosen, it could lose support and will need to be re-secured to structure.

Recommendation: Contact a qualified professional.
