To whom it may concern,

Originally the room adjacent to the primary bedroom was an open game room that was upgraded to a bedroom adding a door and a closet at the time of construction. Because this room was being used as a beauty room, we took the closet out of the room, took the carpet out of the room, and installed hot and cold water lines along with a drain to accommodate a shampoo bowl. The flooring was installed before the closet was taken out, therefore the closet area does not have any vinyl flooring. Please do not hesitate to ask any questions you may have about this room.

Thank you.
