FEDERAL EMERGENCY MANAGEMENT AGENCY
 NATIONAL FLOOD INSURANCE PROGRAM

I.M.R. - Terri W.
 FEB 05 2007

ELEVATION CERTIFICATE

This form is to be used for: 1) New/Emergency Program construction in Special Flood Hazard Areas; 2) Pre-FIRM construction after September 30, 1987; 3) Post-FIRM construction; and, 4) Other buildings (MHC or Post-FIRM rules).

MARTINEZ 15 S. Curlew
 BUILDING OWNER'S NAME
LOT 15 OMEGA BAY S-3
 PROPERTY LOCATION (Lot and Block numbers from address - preferred)

I certify that the information on this certificate represents my best effort to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under U.S. Code, Section 1021.

SECTION I ELIGIBILITY CERTIFICATION (Certified by Local Community Permit Official or a Registered Professional Engineer)

COMMUNITY NO.	PANEL NO.	SUFFIX	DATE OF FIRM	SECTION	DATE OF CONSTRUCTION	BASE FLOOD ELEV. (ft. AD Zone, use suffix)	BUILDING IS
485470	0203	E	5-2-83	A14		12 ^B	<input type="checkbox"/> Single unit <input type="checkbox"/> Two unit <input type="checkbox"/> Three unit

YES NO It is intended that the building described above will be constructed in compliance with the community's flood plain ordinance. The builder may rely on community records. The lowest floor (including basement) will be at an elevation of 12.8 feet NGVD. Failure to construct the building at this elevation may place the building in violation of the community's flood plain management ordinance.

YES NO The building described above has been constructed in compliance with the community's flood plain management ordinance based on elevation data and visual inspection or other reasonable means. If NO is checked, attach copy of variance issued by the community.

YES NO The mobile home located at the address described above has been laid down (anchored) in compliance with the community's flood plain management ordinance, or in compliance with the NFIP specifications.

SECTION II ELEVATION CERTIFICATION (Certified by a Local Community Permit Official or a Registered Professional Engineer, Architect, or Surveyor)

FIRM ZONE A1-A30: I certify that the building at the property location described above has the lowest floor (including basement) at an elevation of 12.8 feet NGVD (mean sea level) and the average grade at the building site is at an elevation of 5.0 feet NGVD.

FIRM ZONES V, VI-V30: I certify that the building at the property location described above has the bottom of the lowest floor-finish at an elevation of _____ feet NGVD (mean sea level), and the average grade at the building site is at an elevation of _____ feet NGVD.

FIRM ZONES A, A0, AH and EMERGENCY PROGRAM: I certify that the building at the property location described above has the lowest floor elevation of _____ feet NGVD. The elevation of the highest adjacent grade next to the building is _____ feet NGVD.

FIRM ZONE A0: I certify that the building at the property location described above has the lowest floor elevation of _____ feet NGVD. The elevation of the highest adjacent grade next to the building is _____ feet NGVD.

SECTION III FLOODPROOFING CERTIFICATION (Certification by a Registered Professional Engineer or Architect)

I certify to the best of my knowledge, information, and belief that the building is designed so that the building is watertight, will be substantially impermeable to the passage of water and structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy that would be caused by the flood depths, pressure velocities, impact and uplift forces associated with the base flood.

YES NO

SECTION II ELEVATION CERTIFICATION (Certified by a Local Community Permit Official or a Registered Professional Engineer, Architect, or Surveyor)

FIRM ZONE A1-A30: I certify that the building at the property location described above has the lowest floor (including unfinished basement) at an elevation of 12.8 feet NGVD (Mean sea level) and the average grade at the building site is at an elevation of 5.0 feet NGVD.

FIRM ZONES V, V1-V30: I certify that the building at the property location described above has the bottom of the lowest floor below at an elevation of _____ feet NGVD (Mean sea level), and the average grade at the building site is at an elevation of _____ feet NGVD.

FIRM ZONES A, A0, A1 and EMERGENCY PROGRAM: I certify that the building at the property location described above has a minimum floor elevation of _____ feet NGVD. The elevation of the highest adjacent grade next to the building is _____ feet NGVD.

FIRM ZONE A0: I certify that the building at the property location described above has the lowest floor elevation of _____ feet NGVD. The elevation of the highest adjacent grade next to the building is _____ feet NGVD.

SECTION III FLOODPROOFING CERTIFICATION (Certification by a Registered Professional Engineer or Architect)

I certify to the best of my knowledge, information, and belief, that the building is designed so that the building is watertight, with walls substantially impermeable to the passage of water and structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy that would be caused by the flood depths, pressures, velocities, impact and debris forces associated with the base flood.

YES NO

In the event of flooding, will the degree of floodproofing be achieved with human intervention?

YES NO

Will the building be occupied by its residents?

If the answer to both questions is YES, the floodproofing cannot be credited for rating purposes and the actual lowest finished floor elevation should be used to determine the floodproofing certificate.

FIRM ZONES A, A1, A30, V1-V30, A0 and A1:

Certified Floodproofed Elevation is _____ feet (NGVD)

THIS CERTIFICATION IS FOR SECTION II BOTH SECTIONS II AND III (Check One)
