THE MODERN ROMAN SHADE

Luxurious fabrics and soft folds give Vignette® Modern Roman Shades a clean, crisp look with the added benefit of no exposed rear cords for improved window aesthetics and enhanced child safety. Offered in sheer, light-filtering and room-darkening fabric opacities, and a range of styles and fold sizes, these shades are the perfect alternative to the traditional Roman shade.

For two opacities in a single shade, consider the revolutionary Duolite® option. Vignette Duolite combines a light-filtering or sheer front shade with a built-in room-darkening back panel both housed on a single roller to easily achieve the perfect level of light and privacy. The single roller is unique to the Roman shades category and also allows for less mounting depth than other dual roller systems. The Duolite option is available exclusively in the Rolling Style with 6" flat folds and the convenience of PowerView® Motorization.

Window Coverings - Owner's Suite, 1st & 3rd Floor Bedrooms Hunter Douglas Vignette Stacking Ultraglide Top-Down/Bottom-Up

Vignette shades by Hunter Douglas

These modernized Roman Shades use soft, stacking folds to create a sense of texture and privacy within your home. With no exposed rear-hanging cords, and fabric-covered head rail and bottom rail, the Vignette line of shades by Hunter Douglas offers exceptional child protection and a seamless look.

Vignette shades have achieved GREENGUARD GOLD Certification.
