

Caséta by Lutron Smart Lighting Controls

Connected living throughout your home

The Smart Hub (formerly Smart Bridge) and App for Caséta are the perfect foundations for creating a connected home system. Monitor and control lights (as well as [shades](#) and [temperature](#)) from anywhere, so you can always be in touch with your home.

Caséta expands beyond lighting control. With the Smart Hub it works with other connected home solutions, such as thermostats, shades, Sonos speakers and even other manufacturers' apps. It is compatible with Amazon Alexa, Google Assistant and Apple® HomeKit (including Apple Watch™) and provides control via app or voice™ with special lighting control features like scheduling, scenes, Smart Away and more.

EXAMPLE
Taken from [casetawireless.com](#)
