

SOLAR

at 7222 Wind Dale

PERKS

- Low utility bills
- Power during outages
- Transferrable warranty on equipment and roof

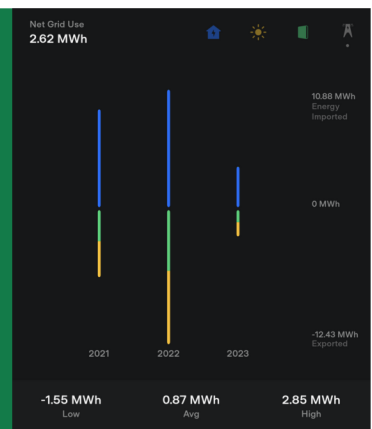

Coverage during outages is seamless with the **whole-home battery backup** - we don't notice when the power goes out (we've had **120+ outages** since the panels were installed in 2021).

After Winter Storm Uri exposed the **failing Texas power grid** for what it is, you want to make sure you're **prepared for an extended outage**.

\$278.86 fixed monthly rate,
Bill credits on gas+electric,
No cost to transfer contract,
and most importantly...

PEACE OF MIND!

The solar panel and battery system has exported much more energy than it has drawn from the grid across its lifetime!
