Notice Regarding School Boundaries in San Antonio and the Surrounding Area

Notice: School Boundaries are subject to change and may affect your school attendance area.

Due to the increasing growth in San Antonio and the surrounding areas, school districts may move the attendance boundaries of their schools. The school information provided to you by the Multiple Listing Service (MLS) is meant to reflect the current boundaries. The information found in the MLS is deemed reliable and always should be verified by the buyer and it in no way predicts or guarantees future boundaries for any school.

OUR EXPERTISE:

- We cannot make representation or guarantees concerning future changes to school boundaries because the school boards of each district are constantly monitoring the population growth rates of their schools and making changes when necessary.

THEREFORE, WE RECOMMEND:

- That you take an active position in finding out which school districts and subdivisions have boundary issues.
- That you contact the school district that represents your prospective property to learn of any potential issues.

Notice Regarding Oak Wilt in Central Texas

Notice: There may be Oak Wilt on the property that you are about to purchase.

Oak Wilt is a disease that has long been recognized as causing massive tree loss in the Texas Hill Country. It has now been identified in 55 Texas counties. Losses vary with location with the greatest losses occurring in the hill country. A management program has been developed by the Research and Extension faculty at Texas A&M University. This program involves the use of cultural and chemical controls.

Live Oak, Shumard Red Oak, Southern Red Oak, Spanish Oak, Blackjack Oak, Pin Oak and Water Oak are the native species that are susceptible to the Oak Wilt fungus. They are members of the Red Oak group and will normally die in a few weeks after symptoms are observed. Members of the White Oak group, including Burr Oaks, White Oaks and Post Oaks rarely become infected. They have a high level of resistance and seldom die when affected.

OUR EXPERTISE:

- We cannot make representations or guarantees because we are not trained in identifying the condition of trees and their diseases and have no expertise in the area of plant diseases.

THEREFORE, WE RECOMMEND:

- That you take whatever measures you feel are necessary to satisfy yourself about the condition of the property and its surroundings.
- That you accompany the inspectors and other experts during their inspections and ask any questions you have about the property.

OTHER INFORMATION:

- If you are concerned or desire additional information, you may call your COUNTY AGRICULTURAL EXTENSION SERVICE. You can obtain this and more information at www.texasoakwilt.org
