

# STEEL FRAME CONSTRUCTION

Have you considered the advantages?

## Structural:

- \*Impervious to termites and other wood attacking insects
- \*Will not rot or warp like wood; resistant to fungus that causes mildew/rot
- \*Considered to hold up better during hurricane-force winds
- \*Non combustible construction
- \*Absence of nail pops and other nail-related problems

## Environmental:

- \*Constructed with recyclable material
- \*A positive alternative to deforestation
- \*Aids in protection of endangered species

## Versatility:

"As seen in commercial construction, steel's inherent strength allows wider spans, which means...bigger wall cavities and more room for insulation."

Houston Builder; August, 1994

**ROYCE HOMES IN WILLOW FOREST IN PROUD TO OFFER  
THE FIRST AFFORDABLE STEEL HOMES FOR SALE IN  
HOUSTON**
