Uniform Residential Appraisal Report

File # 2022-1377

COMMENTS ON SALES COMPARISON APPROACH. The soles considered are among	the most comparable in Hauster	o'o MLC All cole	a used are leasted in the aubicatio
COMMENTS ON SALES COMPARISON APPROACH: The sales considered are among		15 MLS. All Sale	is used are located in the subjects
marketing area, similar in size, and considered similar to the subject in quality of construct	on and condition.		
In the Sales Comparison Approach, the appraiser makes adjustments to the comparable s	ales based on their differences v	vith the subject.	Most of the adjustments are for apparent
and/or objective differences such as location (interior, corner or cul-de-sac lots), gross living	g area, age, bathrooms, car stor	age and fireplac	es. Because these items are objective,
they have been quantified based on the appraiser's observation of what the market will par			
properties that are otherwise similar. Subjective adjustments such as quality of construction			
		ocations and do	cor have been made based on the
appraiser's knowledge of the market and/or conversations with knowledgeable agents and	contractors within the market.		
The appraiser certifies and agrees that this appraisal was prepared in accordance with the	requirements of Title XI of the F	inancial Instituti	ons, Reform, Recovery, and Enforcement
Act (FIRREA) of 1989, as amended (12 U.S.C. 3331 et seq.), and any applicable impleme	nting regulations in effect at the t	time the apprais	er signs the appraisal certification.
Typical financing in the area is conventional, FHA/VA, Bank loans or cash with sellers typical	cally paying up to 3 point on new	loan financing.	No adjustment has been made for seller
paid closing cost of 3% or less.	, , , , , , , , , , , , , , , , , , ,		
paid disting cost of 676 of 1666.			
N (T)			
Note: The photographs of comparable sales provided in this report are from original imag			
However, in instances that are deemed inappropriate, or in the case of a camera malfuncti	on, an image provided by MLS h	ias been utilized	
FINAL RECONCILIATION: In the final reconciliation of value, greatest emphasis has bee	n given to the value indicated by	the Sales Com	parison Analysis, which is more indicative
of Market Value under the willing Buyer and Seller concept and is supported by the Cost A	pproach. All sales have been co	nsidered in our	final conclusion of value.
,			
The income Appreciate is not considered as reliable insefer as single family proportion are a	not typically purchased for their in	noomo producio	a ability
The income Approach is not considered as reliable insofar as single family properties are in	iot typically pulcitased for their if	roome producin	y abiiity.
NATENDED HOEMOED. THE LANGE OF THE COLUMN ASSESSMENT OF THE COLUMN ASSE	LEHAURD TO CO.		
INTENDED USE/USER: The Intended User of this appraisal report is the Lender/Client a	nd FHA/HUD. The intended use	of the appraisal	is to determine market value for listing
purposes.			
PURPOSE OF REPORT: The purpose of this appraisal is to form an opinion of the Ma	rket Value of the subject for our 0	Client as of the	effective date contained in this report
The purpose of the application to term an opinion of the ma

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period preceding acceptance of this assignment.

APPRAISER INDEPENDENCE CERTIFICATION:

I hereby certify, I have followed the appraiser independence safeguards in compliance with Appraisal Independence and any applicable state laws I may be required to comply with. This includes but is not limited to the following: I am currently licensed and/or certified by the state in which the property to be appraised is located. My license is the appropriate license for the appraisal assignments and is reflected on the appraisal report. I certify that there have been no sanctions against me for any reason that would impair my ability to perform appraisals pursuant to the required guidelines.

I assert that no employee, director, officer, or agent, or any other third party acting as joint venture partner, independent contractor, appraisal company, appraisal management company, or partner on behalf of Paramount Appraisals influenced or attempted to influence the development, reporting, result, or review of my appraisal through coercion, extortion, collusion, compensation, inducement, intimidation, bribery, or in any other manner.

I further assert that the client has never participated in any of the following prohibited behavior in our business relationship: Withholding or threatening to withhold timely payment or partial payment for an appraisal report, withholding or threatening to withhold future business with me, demoting, terminating or threatening to demote or terminate me, expressly or implicitly promising future business, promotions, or increased compensation for myself, conditioning the ordering of my appraisal report or the payment of my appraisal fee or salary or bonus on the opinion, conclusion, or valuation to be reached, or on a preliminary value estimate requested from me, requesting that I provide an estimated, predetermined, or desired valuation in an appraisal report prior to the completion of the appraisal report, or requesting that I provide estimated values or comparable sales at any time prior to my completion of an appraisal report. Provided me an anticipated, estimated, encouraged, or desired value for a subject property or proposed or target amount to be loaned to the borrower, except that a copy of the sales contract for purchase transactions may be provided, provided to me, my appraisal company, or any entity or person related to me as an appraiser, appraisal company, stock or other financial or non-financial benefits. Any other act or practice that impairs or attempts to impair my independence, objectivity, or impartiality or violates law or regulation, including, but not limited to, the Truth in Lending Act (TILA) and Regulation Z, or the USPAP.

NEIGHBORHOOD MARKETABILITY:

Adequate retail, employment and other support facilities are located in the area. Public transportation and houses of worship of most denominations are located nearby. Land uses are generally compatible in the area, with commercial properties primarily located along the principal streets. Residential properties use, maintenance, and alteration are controlled by deed restrictions which are locally enforced by the respective property owners association. No significant adverse physical conditions were observed which would have a detrimental effect on the marketability of properties within the neighborhood.

The subject exceeds the predominant value in the neighborhood due to having an above average lot size. The median sized GLA for the area is 2,433sqft.

PLANNED UNIT DEVELOPMENT:

The home owners are in control of the Home Owner's Association (HOA), therefore, this project is considered to be a TYPE E PUD. The contribution for the maintenance of the common areas and amenities of the subdivision/project do not contribute more than two (2%) percent of a typical property's value. Therefore, the contribution is considered insignificant in terms of its influence on the use and enjoyment of the premises and has little or no effect on the value of a typical property. The information contained in this report was obtained from Houston's MLS.

SITE AND TAXES:

Title documents and survey were not available for the appraiser to review. Area properties are regulated under deed restrictions rather than zoning, and the subject appears to be in compliance.

The four criteria for the Highest and Best Use are: Legally permissible; Physically possible; Financially feasible; and Maximum profitability. The subject's current use meets all of the criteria for highest and best use; therefore it is our opinion that the highest and best use for the subject, both vacant and improved, is single family residential.

Based on review of the flood maps provided by Federal Emergency Management Agency (FEMA), the subject appears to be within the flood zone reported herein, however confirmation of the exact location should be obtained from current survey or other reliable source.

The valuation and tax rates in the area appear reasonable.

The appraiser relied on the extraction method to determine an estimated site value for the subject. Dwelling Cost data was utilized to determine a replacement cost for the subject, which was then extracted from the final opinion of value. The difference is the estimated site value.

EXPOSURE TIME:

A reasonable exposure time for the subject property at the opinion of value indicated is estimated to be the same as the marketing time reported in the neighborhood section on page one of this report.

ESTIMATE OF GROSS LIVING AREA:

The measurements and sketch contained herein are for the purposes of this appraisal when comparing the subject to the comparable sales in the Sales Comparison Analysis. The sketch herein is not an architectural rendering of the subject improvements and is not to be considered as such. I am not a licensed architect. The gross living area addressed herein is based on physical measurements taken by me utilizing the American National Standards Institute (ANSI) protocol adopted by the National Homebuilder's Association (NHA) for measuring square footage. The Gross Living Area stated in this report may or may not agree with Gross Living Area published by the tax assessor, the MLS, or the builder for the subject or for the

Lender	David Kiker							

comparable sales. The square footage estimate noted herein for the subject was calculated from physical measurements taken by me for the purposes of this assignment only. I do not guarantee the accuracy of this square footage ESTIMATE and it should not be relied upon by anyone for any other use.

Appraiser acknowledges the GLA variance between prior listings, however all measurements were verified at the time of site

SMOKE/CO DETECTORS:

These items are not required by the State of Texas. While some municipalities in Texas have rules governing them, they can vary widely. Being aware of all relevant building codes in each municipality serviced is beyond the typical scope of a residential appraisal. Smoke and CO detectors often look very similar. They may also be "combo" devices, performing both functions. They may be placed in areas inaccessible for close scrutiny, such as on high ceilings. Additionally, at best the appraiser can only state that a smoke or CO detector "exists"; whether it "functions properly is not possible to accurately test. The presence of a light on the device does not ensure that the device will function when smoke or CO is present, only that some electric current is present in the device. These devices also have a shelf life, and the date of manufacturer or the in-service date is not always available. Since these items are not relevant to the actual market value of a property due to their limited cost, and plug-in or battery-operated models are not considered part of the real property, the appraiser does not inspect for them unless specifically required to do so by the lender in the original engagement letter. The presence or lack of these items does not impact the value or marketability of a property. However, the appraiser strongly encourages involved parties to install and/or replace smoke and CO detectors regularly according to the manufacturer's guidelines, as a non-functioning device could be considered a safety hazard. The appraiser will not be held liable.

CLARIFICATION OF ITEM 2 CERTIFICATION STATEMENT:

An appraiser's inspection is a data gathering task for comparative analyses only. The term/phrase "complete visual inspection" means a non-intrusive, visual observation of readily accessible areas on the effective date of the appraisal. The attic was viewed from a head and shoulders stance and did not include any intense visual observation of the entire attic area or any mechanical systems within the attic. No warranty is given to the condition or continued functional operation of the mechanical, electrical, plumbing or any other systems in the dwelling beyond the effective date of the appraisal.

The appraiser made an interior and exterior inspection of all readily accessible areas of the subject property improvements. Appraiser did not make entry into attic scuttle or crawl space, and did not move any personal property or furniture. Appraiser has noted all readily observable conditions of the subject property, that is, conditions that are immediately noticeable and discernible during a typical site visit. Appraiser is not responsible for determining the functionality of appliances or mechanical

The appraiser is not a home inspector, and this appraisal report is not a home inspection; the appraiser only performed a visual observation of accessible areas and the appraisal report cannot be relied upon to disclose conditions and/or defects in the

Any statement, comment, or conclusion made about the structural integrity is not a warranted fact, but an observation limited to the purview of my visual observation. For warranted fact about the structural integrity unless otherwise stated the user of the appraisal should have the improvement inspected by a licensed structural engineer or similar professional whose job is to determine structural integrity.

CLARIFICATION OF ITEM 7 CERTIFICATION STATEMENT:

My primary data source was the Houston Association of Realtor (HAR) MLS. The Dodd-Frank Act and Fannie Mae's Appraiser Independence Requirements (AIR) was enacted to prevent unreasonable expectations of appraisers who have already provided credible support for their conclusion of value. Unless there is data that was not available to me at the time of research for the appraisal on the effective date, I will not be influenced or coerced into performing additional analysis of sales that are deemed less comparable for the purpose of producing an influence or change to the value credibly developed.

In the event sales not chosen (i.e. those deselected by me in the final selection process) are asked to be analyzed by the client, such as additional research, will be subject to additional charges for the additional research, analysis, and communication. Such fees will be relative to the amount of additional information required and should be discussed with the client to ensure that they are prepared to pay any additional fees. If the client's request is based on data obtained from the same MLS system where there are no additional sales comparable to the subject that were not already researched, selected or disqualified at the time of the appraisal, such consideration of the same data researched would be an additional charge to the client for these added analyses.

CLARIFICATION OF ITEM 10 CERTIFICATION STATEMENT:

I attempted to adhere fully with the requirements set forth in Certification Item 10 and believe the sources used provided credible information, but strict adherence was not possible in the normal course of business. In the State of Texas and local jurisdiction, the non-disclosure status of law prevents me from any published non-interested party data other than that which is printed through the private source of Multiple Listing Service (MLS).

CLARIFICATION OF ITEM 14 CERTIFICATION STATEMENT:

The users and others who are choosing to rely on this appraisal report need to be aware of the limitations of the included 1004MC Form. This form only views transactions over a 12-month period, which makes each column a seasonal conclusion. As a consequence, the conclusions may vary from the one-unit housing trends reported in the Neighborhood Section and may not be consistent. Those circumstances will be further explained on the 1004MC Form where seasonal anomalies are addressed. Further, the comments about concessions are based on that data which is available to me through the primary data source. Inconsistencies exist in the reporting of concessions which impacts my conclusions and may be impacted to the degree concessions were not forthright by all of the MLS reporting members.

The information contained herein regarding the environmental conditions are not to be construed as a warranted fact. This information was the result of the non-intrusive physical observation and data gathered from the EPA website. For a warranted fact about environmental conditions the Intended User(s) of this appraisal report must seek from environmental professional's facts such as can be found from testing done in Phase II environmental reporting. I have made no environmental tests on the subject property.

CLARIFICATION OF ITEM 21 CERTIFICATION STATEMENT:

The parties identified in this item are given disclosure privileges of distribution rights. These distribution privileges are not equal nor should be construed as being the same privilege as an "Intended User". Only the client named herein has the privilege of being identified as the "Intended Users". I am not obligated nor will I discuss this Summary Appraisal Report with any of the entities listed in this section unless they have been specifically identified by me at the time of the assignment as an Intended User with similar privileges as the client in terms of direct communication rights.

FINAL RECONCILIATION:

Cypress

David Kiker

Borrower/Client

Property Address

City

Lender

In the final reconciliation of value, full emphasis has been given to the value indicated by the Sales Comparison Analysis, which is indicative of Market Value under the willing Buyer and Seller concept. All sales have been considered in our final conclusion of value.

The Cost Approach has been developed solely at the request of the Client; and has been given no weight in arriving at the final opinion of value. The "cost new" of a property is not typically part of the decision making process of a buyer desiring a property similar in age to the subject. This is consistent with FAQ #290 in the most current edition of USPAP.

USPAP 2020-2021 COMPLIANCE:

This appraisal indicates it is a summary appraisal report. It has not been updated by FNMA to conform with 2020-2021 USPAP. The current USPAP has deleted the three types of appraisals known as Self Contained, Summary, and Restricted Use and replaced them with "Appraisal Report" and "Restricted Appraisal Report". This product is an "Appraisal Report".

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C/

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Ω4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and ungrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

ESTIMATED INDICATED VALUE OF THE SUBJECT: 742,000

• Indicated Weight Value

Estimated indicated value is determined by using the Gross Adjustment of sale price for each comparable as a measure of the relative quality of the comp. The Indicated Value is derived by multiplying the weight of each comp by the Adjusted Sale Price of that comp, repeating for each property, then adding them all together. This weighted average is used as the indicated value of

As with any method, this technique is not perfect. However, it does do a very good job of giving more weight to the most similar comps while at the same time minimizing values near the extremes of the indicated value range.
