Do you dream of coming home to a one of a kind log home <sup>\*</sup>tucked away on 26.62 acres in East Texas Piney Woods?

In the early 1970's Susan & Bob had the same dream. We built our log home from the pines harvested from my parents & adjoining grandparents land. We cut & debarked all the logs by hand & moved them to the building site with my grandfather's Farmall tractor. Then the magic began! Each log was notched and fit into place with only a chain saw, chisel and axe. Layer by layer the cabin took shape and served as my home for 50 years.

Once you enter through the decorative hand built screen door, the rustic look & feel makes visitors eyes widen & a large smile appear. Then one begins to take in all the details that make this home so special.

The floors, cabinets and some walls are knotty pine & compliment the log interior perfectly. Other features include: curved branch towel holder, handmade doorknob, antique cast iron tub, oak antique stained glass

floor, a decorative sink in a converted antique dresser, stained glass windows in almost every room, antique interior doors complete with porcelain or glass knobs, a tongue + groove flooring door latch, a large bedroom perfect for a "bunk room" as well as scattered antiques throughout the house.

Now it's time to pass this uniquely special home to another family so they may experience all the joy + peace this home has brought to me.

Susan Michele

\* additions have been added to the original log home. Care was taken to use slabs (first cut off a log) that match the exterior log home to make the additions seamless.
