**ELECTRICAL WIRING**

10/28/02<sup>3</sup>

As a homeowner at Hidden Oaks Association, by my signature below, I am responding to the Association Insurance requirements concerning aluminum wiring.

The insurance companies will no longer provide insurance on buildings that have straight aluminum wiring, and only a very few will provide coverage for "pigtailed" aluminum wiring. More and more insurance companies are requiring either CO/ALR or Copalum connections to aluminum wiring.

As owner of the townhome listed below, I have verified CO/ALR or Copalum wiring at my townhouse. I have filled out the bottom portion of this notice as verification of CO/ALR or Copalum wiring at my townhouse. Any copies of receipts or letters from electricians confirming this work has been done is included.
