INSPECTED FOR

Jacquelyn Rysz 15007 Ridingwood Dr. Missouri City, TX 77489

September 30, 2023

PROPERTY INSPECTION REPORT FORM

TEXAS REAL ESTATE COMMISSION

Jacquelyn Rysz Name of Client	09/30/2023 Date of Inspection	
15007 Ridingwood Dr., Missouri City, TX 77489 Address of Inspected Property		
Will Worthen Name of Inspector	24920 TREC License #	
Name of Sponsor (if applicable)	TREC License #	

PURPOSE OF INSPECTION

A real estate inspection is a visual survey of a structure and a basic performance evaluation of the systems and components of a building. It provides information regarding the general condition of a residence at the time the inspection was conducted. *It is important* that you carefully read ALL of this information. Ask the inspector to clarify any items or comments that are unclear.

RESPONSIBILITY OF THE INSPECTOR

This inspection is governed by the Texas Real Estate Commission (TREC) Standards of Practice (SOPs), which dictates the minimum requirements for a real estate inspection.

The inspector IS required to:

- use this Property Inspection Report form for the inspection;
- inspect only those components and conditions that are present, visible, and accessible at the time of the inspection;
- indicate whether each item was inspected, not inspected, or not present;
- indicate an item as Deficient (D) if a condition exists that adversely and materially affects the performance of a system or component **OR** constitutes a hazard to life, limb or property as specified by the SOPs; and
- explain the inspector's findings in the corresponding section in the body of the report form.

The inspector IS NOT required to:

- identify all potential hazards;
- turn on decommissioned equipment, systems, utilities, or apply an open flame or light a pilot to operate any appliance;
- climb over obstacles, move furnishings or stored items;
- prioritize or emphasize the importance of one deficiency over another;
- provide follow-up services to verify that proper repairs have been made; or
- inspect system or component listed under the optional section of the SOPs (22 TAC 535.233).

RESPONSIBILITY OF THE CLIENT

While items identified as Deficient (D) in an inspection report DO NOT obligate any party to make repairs or take other actions, in the event that any further evaluations are needed, it is the responsibility of the client to obtain further evaluations and/or cost estimates from qualified service professionals regarding any items reported as Deficient (D). It is recommended that any further evaluations and/or cost estimates take place prior to the expiration of any contractual time limitations, such as option periods.

Please Note: Evaluations performed by service professionals in response to items reported as Deficient (D) on the report may lead to the discovery of additional deficiencies that were not present, visible, or accessible at the time of the inspection. Any repairs made after the date of the inspection may render information contained in this report obsolete or invalid.

REPORT LIMITATIONS

This report is provided for the benefit of the named client and is based on observations made by the named inspector on the date the inspection was performed (indicated above).

ONLY those items specifically noted as being inspected on the report were inspected.

This inspection IS NOT:

- a technically exhaustive inspection of the structure, its systems, or its components and may not reveal all deficiencies;
- an inspection to verify compliance with any building codes;
- an inspection to verify compliance with manufacturer's installation instructions for any system or component and DOES NOT imply insurability or warrantability of the structure or its components.

NOTICE CONCERNING HAZARDOUS CONDITIONS, DEFICIENCIES, AND CONTRACTUAL AGREEMENTS

Conditions may be present in your home that did not violate building codes or common practices in effect when the home was constructed but are considered hazardous by today's standards. Such conditions that were part of the home prior to the adoption of any current codes prohibiting them may not be required to be updated to meet current code requirements. However, if it can be reasonably determined that they are present at the time of the inspection, the potential for injury or property loss from these conditions is significant enough to require inspectors to report them as Deficient (D). Examples of such hazardous conditions include:

- malfunctioning, improperly installed or missing ground fault circuit protection (GFCI) devices and arc-fault devices;
- ordinary glass in locations where modern construction techniques call for safety glass;
- malfunctioning or lack of fire safety features such as, smoke alarms, fire-rated doors in certain locations, and functional emergency escape and rescue openings in bedrooms;
- malfunctioning carbon monoxide alarms;
- excessive spacing between balusters on stairways and porches;
- improperly installed appliances;
- improperly installed or defective safety devices;
- lack of electrical bonding and grounding; and
- lack of bonding on gas piping, including corrugated stainless steel tubing (CSST).

Please Note: items identified as Deficient (D) in an inspection report DO NOT obligate any party to make repairs or take other actions. The decision to correct a hazard or any deficiency identified in an inspection report is left up to the parties to the contract for the sale or purchase of the home.

This property inspection report may include an inspection agreement (contract), addenda, and other information related to property conditions.

INFORMATION INCLUDED UNDER "ADDITIONAL INFORMATION PROVIDED BY INSPECTOR", OR PROVIDED AS AN ATTACHMENT WITH THE STANDARD FORM, IS NOT REQUIRED BY THE COMMISSION AND MAY CONTAIN CONTRACTUAL TERMS BETWEEN THE INSPECTOR AND YOU, AS THE CLIENT. THE COMMISSION DOES NOT REGULATE CONTRACTUAL TERMS BETWEEN PARTIES. IF YOU DO NOT UNDERSTAND THE EFFECT OF ANY CONTRACTUAL TERM CONTAINED IN THIS SECTION OR ANY ATTACHMENTS, CONSULT AN ATTORNEY.

Inspection Time In: <u>8:45 am</u> Time Out: <u>12:15 pm</u> Property was: Vacant Building Orientation (For Purpose Of This Report Front Faces): West Weather Conditions During Inspection: Sunny Outside Temperature During Inspection: 80 ° to 90 ° Degrees Parties Present at Inspection: Owner – Pre-listing Inspection

THIS REPORT IS PAID AND PREPARED FOR THE EXCLUSIVE USE BY Jacquelyn Rysz. THIS COPYRIGHTED REPORT IS NOT VALID WITHOUT THE SIGNED INSPECTION AGREEMENT. THIS REPORT IS NOT TRANSFERABLE FROM CLIENT NAMED ABOVE.

SCOPE OF INSPECTION

These standards of practice define the minimum levels of inspection required for substantially completed residential improvements to real property up to four dwelling units. A real estate inspection is a non-technically exhaustive, limited visual survey and basic performance evaluation of the systems and components of a building using normal controls and does not require the use of specialized equipment or procedures. The purpose of the inspection is to provide the client with information regarding the general condition of the residence at the time of inspection. The inspector may provide a higher level of inspection performance than required by these standards of practice and may inspect components and systems in addition to those described by the standards of practice.

GENERAL LIMITATIONS

The inspector is not required to:

(A) inspect:

- (i) items other than those listed within these standards of practice;
- (ii) elevators;
- (iii) detached buildings, decks, docks, fences, or waterfront structures or equipment;
- (iv) anything buried, hidden, latent, or concealed;
- (v) sub-surface drainage systems;
- (vi) automated or programmable control systems, automatic shut-off, photoelectric sensors, timers, clocks, metering devices, signal lights, lightning arrestor system, remote controls, security or data distribution systems, solar panels, outdoor kitchens, gas grills (built-in or free standing), refrigerators (built-in or free standing), wine coolers, ice makers or smart home automation components; or
- (vii) concrete flatwork such as; driveways, sidewalks, walkways, paving stones or patios;

(B) report:

- (i) past repairs that appear to be effective and workmanlike except as specifically required by these standards;
- (ii) cosmetic or aesthetic conditions; or
- (iii) wear and tear from ordinary use;

(C) determine:

- (i) insurability, warrantability, suitability, adequacy, compatibility, capacity, reliability, marketability, operating costs, recalls, counterfeit products, product lawsuits, life expectancy, age, energy efficiency, vapor barriers, thermostatic performance, compliance with any code, listing, testing or protocol authority, utility sources, or manufacturer or regulatory requirements except as specifically required by these standards;
- (ii) the presence or absence of pests, termites, or other wood-destroying insects or organisms;
- (iii) the presence, absence, or risk of asbestos, lead-based paint, MOLD, mildew, corrosive or contaminated drywall "Chinese Drywall" or any other environmental hazard, environmental pathogen, carcinogen, toxin, mycotoxin, pollutant, fungal presence or activity, or poison;
- (iv) types of wood or preservative treatment and fastener compatibility; or
- (v) the cause or source of a conditions;

(D) anticipate future events or conditions, including but not limited to:

- (i) decay, deterioration, or damage that may occur after the inspection;
- (ii) deficiencies from abuse, misuse or lack of use;
- (iii) changes in performance of any component or system due to changes in use or occupancy;
- (iv) the consequences of the inspection or its effects on current or future buyers and sellers;
- (v) common household accidents, personal injury, or death;
- (vi) the presence of water penetrations; or
- (vii) future performance of any item;
- (E) operate shut-off, safety, stop, pressure or pressure-regulating valves or items requiring the use of codes, keys, combinations, or

Page 3 of 56

This confidential report is prepared exclusively for Jacquelyn Rysz on 09/30/2023.

(F) designate conditions as safe;

(G) recommend or provide engineering, architectural, appraisal, mitigation, physical surveying, realty, or other specialist services;

- (H) review historical records, installation instructions, repair plans, cost estimates, disclosure documents, or other reports;
- (I) verify sizing, efficiency, or adequacy of the ground surface drainage system;
- (J) verify sizing, efficiency, or adequacy of the gutter and downspout system;

(K) operate recirculation or sump pumps;

- (L) remedy conditions preventing inspection of any item;
- (M) apply open flame or light a pilot to operate any appliance;
- (N) turn on decommissioned equipment, systems or utility services; or
- (O) provide repair cost estimates, recommendations, or re-inspection services.

THE CLIENT, BY ACCEPTING THIS PROPERTY INSPECTION REPORT OR RELYING UPON IT IN ANY WAY, EXPRESSLY AGREES TO THE <u>SCOPE OF INSPECTION</u>, <u>GENERAL LIMITATIONS</u> AND <u>INSPECTION</u> <u>AGREEMENT</u> INCLUDED IN THIS INSPECTION REPORT.

This inspection report is made for the sole purpose of assisting the purchaser to determine his and/or her own opinion of feasibility of purchasing the inspected property and does not warrant or guarantee all defects to be found. If you have any questions or are unclear regarding our findings, please call our office prior to the expiration of any time limitations such as option periods.

This report contains technical information. If you were not present during this inspection, please call the office to arrange for a consultation with your inspector. If you choose not to consult with the inspector, this inspection company cannot be held liable for your understanding or misunderstanding of the reports content.

The contents of this report are for the sole use of the client named above and no other person or party may rely on this report for any reason or purpose whatsoever without the prior written consent of the inspector who authored the report. Any person or party who chooses to rely on this report for any reason or purpose whatsoever without the express written consent of the inspector does so at their own risk and by doing so without the prior written consent of the inspector waives any claim of error or deficiency in this report.

This report is not intended to be used for determining insurability or warrantability of the structure and may not conform to the Texas Department of Insurance guidelines for property insurability. *This report is not to be used by or for any property and/or home warranty company.*

The digital pictures within this report are a representative sample of inaccessible areas, deficiencies or damages in place and should not be considered to show all of the inaccessible areas, deficiencies or damages observed. There will be inaccessible areas, deficiencies or damages not represented with digital imaging.

I. STRUCTURAL SYSTEMS

\blacksquare \square \blacksquare \blacksquare A. Foundations

Type of Foundation(s): Slab on Ground *Comments*:

Foundation Is Performing Adequately

In my opinion, the foundation appears to be providing adequate support for the structure at the time of this inspection. I did not observe any apparent evidence that would indicate the presence of adverse performance or significant deficiencies in the foundation. The interior and exterior stress indicators showed little effects of adverse performance and I perceived the foundation to contain no significant unlevelness.

Additional Observations and/or Comments:

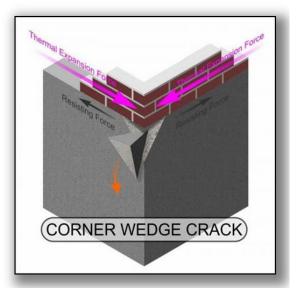

- Deflection cracks were observed in the exterior veneer.
- Separation of the exterior veneer and window frames was observed.
- Floor slopes and/or unlevelness were observed.
- The foundation rebar is visible at the edge of the foundation beam and needs to be properly covered on the north side, west side of the structure.

Note: One or more of the foundation perimeter beam corners were observed to be sheared off (corner pop). This is a common condition to observe and is due to thermal expansion and contraction of the different building materials. This condition does not adversely affect the foundation performance. However, in some cases, some cosmetic improvements may be necessary.

Note: Some cracking of the garage concrete floor finish was observed.

Note: Tree(s) in close proximity of the foundation was observed. The client should consider the installation of a root barrier to reduce the possibility of damage to the foundation from tree roots and moisture removal.

Note: The heavy foliage growing on, over or around the exterior walls/foundation of the structure should be trimmed back at least 18-inches. The heavy foliage will limit the inspectors visual observation of the foundation.

Notice: This inspection is one of first impression and the inspector was not provided with any historical information pertaining to the structural integrity of the inspected real property. This is a limited cursory and visual survey of the accessible general conditions and circumstances present at the time of this inspection. Opinions are based on general observations made without the use of specialized tools or procedures. Therefore, the opinions expressed are one of apparent conditions and not of absolute fact and are only good for the date and time of this inspection.

The inspection of the foundation may show it to be providing adequate support for the structure or having movement typical to this region, at the time of the inspection. This does not guarantee the future life or

			est side of the structure. Fill dirt is needed against the o low to help support the foundation footer properly.

- Fill dirt is needed on the east side, west side of the structure. The low spots in the finished grade (ground) adjacent to the foundation perimeter wall should be filled in to help prevent water from standing and/or ponding next to the foundation area.
- The soil line is too high on the south side, east side of the garage structure. Under current building standards there should be at least 4-inches of foundation visible below masonry veneer and 6-inches of foundation visible below wood type veneer.

Notice: Life expectancy of the roofing material is not covered by this property inspection report. If any concerns exist about the roof covering life expectancy or potential for future problems, a roofing specialist should be consulted. The Inspector cannot offer an opinion or warranty as to whether the roof has leaked in the past, leaks now, or may be subject to future leaks, either expressed or implied.

The inspection of this roof may show it to be functioning as intended or in need of minor repairs. This inspection does not determine the insurability of the roof. You are strongly encouraged to have your Insurance Company physically inspect the roof, prior to the expiration of any time limitations such as option or warranty periods, to fully evaluate the insurability of the roof.

Attic Ladder/Hatch Opening

All components were found to be performing and in satisfactory condition on the day of the inspection.

\square \square \square \blacksquare E.

E. Walls (Interior and Exterior)

Comments:

Description of Exterior Cladding: Wood Type Veneer, Fiber Cement Board and Brick Veneer

Interior Walls & Surfaces

- Interior wall joint cracks were observed in the living room.
- Wall surface damage was observed in the front corner bedroom.
- Interior wall stress cracks were observed in the living room.

Note: There is evidence of painting and patching to the interior finish and prior interior finish repairs. This condition could limit the Inspectors visual observations and ability to render accurate opinions as to the performance of the structure.

Notice: Due to the property being built prior to 1978, it is possible the interior walls contain lead based paint, which is known to cause health problems. Testing for lead based paint is beyond the scope of a general home inspection. If any concerns exist as to whether lead based paint is present in the home, it is recommended to obtain any documentation from the seller/homeowner or have a lead based paint test performed.

Exterior Walls & Surfaces

- Caulking improvements are recommended for the area between the exterior veneer and the window frames. It is recommended to use an elastomeric sealant.
- The area between the exterior veneer and the dryer vent termination needs to be properly sealed.
- The area between the exterior veneer and the exterior water hose bibbs (faucets) need to be properly sealed.
- Deflection cracks were observed in the exterior veneer on the south side of the structure.
- Mortar improvements are recommended for the exterior masonry veneer on the north, east, west and south sides of the structure.
- One or more of the exterior bricks were observed to be damaged on the west side of the structure.
- There were no weepholes observed in the lower course of the exterior masonry veneer over the window and door steel lintels. This condition does not meet current building standards and should be corrected as necessary.
- The exterior veneer / cladding has some deterioration and/or damage on the south side, east side of the garage structure.
- The exterior veneer / cladding was observed to be pulling loose and should be better secured on the south side of the garage structure.

Additional Notice from the Inspector: There is more than one layer of exterior siding in place at the time of the inspection. This type of installation could limit the inspectors visual observations and ability to render accurate opinions of the performance behind the cladding. It is recommended to have this condition further evaluated by a licensed contractor and corrected if necessary.

Note: The heavy foliage growing on, over or around the exterior walls of the structure should be trimmed back at least 18-inches. The heavy foliage will limit the inspectors visual observation of the exterior surfaces.

Note: Mortar and/or brick cracks were observed in the exterior veneer on the north, east, west and south sides of the structure.

Note: Previous repairs to the exterior masonry mortar / grout was observed on the north, east, west and south sides of the structure.

Arc-Fault Circuit Interrupter Protection (AFCI)

• None of the required dwelling unit devices, receptacle and lighting outlets (switches, receptacles and fixtures) are connected to an arc-fault circuit-interrupter (AFCI) circuit device. AFCI devices were first required under the 1999 National Electrical Code and under the 2014 NEC, all living space, kitchen and laundry room devices, receptacle and lighting outlets (switches, receptacles and fixtures) should be connected to an arc-fault circuit interrupter (AFCI) device.

Grounding / Bonding

All components were found to be performing and in satisfactory condition on the day of the inspection.

Distribution Wiring

- Open electrical junction box(es) were observed in the kitchen, garage. All open junction box(es) should be properly enclosed for reasons of safety.
- Spliced electrical wires were observed in the attic area, garage. Spliced wires should be properly enclosed in junction box(es) for reasons of safety.
- Open end wires were observed in the east exterior wall. Open end wires should be properly enclosed in a junction box for reasons of safety.

 $\overline{\mathsf{M}} \square \square \overline{\mathsf{M}}$

B. Branch Circuits, Connected Devices, and Fixtures

Type of Wiring: Copper Comments:

Receptacle Outlets

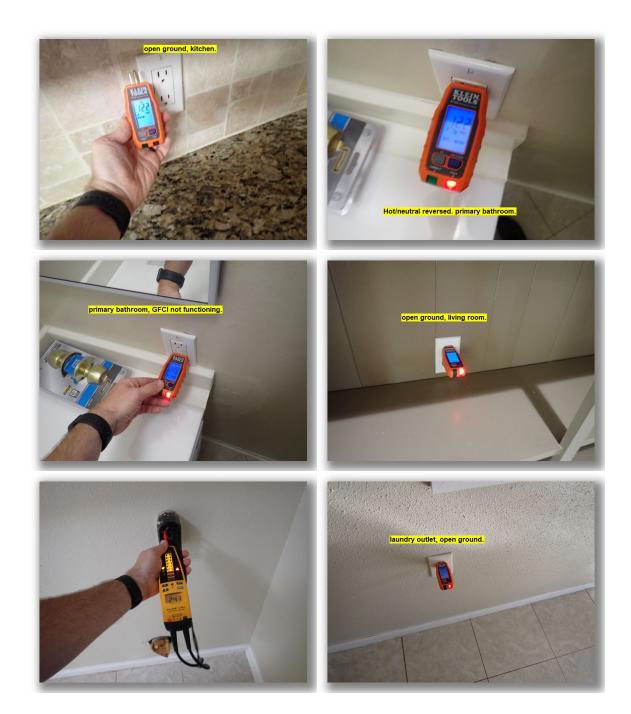

- There are no tamper resistant receptacles installed at the time of inspection. Under current building standards, all receptacles that are less than five and a half feet above the floor should be tamper resistant. This is an "as built" condition, but per TREC standards of practice, we are required to report this condition as deficient. Tamper Resistant outlets are required per the 2008 National Electric Code. You may consider corrective measures for improved safety.
- One of the ground fault circuit interrupter (GFCI) devices are not functioning properly at the time of this inspection. The device is located in the primary bathroom, kitchen area.
- One or more of the receptacles have reversed polarity (i.e. it is wired backwards). This receptacle(s) and the circuit should be investigated and improved as necessary. The receptacle(s) in question are located in the primary bathroom.
- One or more of the receptacles were observed to have an open ground connection in the kitchen, living room.
- One or more of the receptacles were observed to be damaged in the several locations throughout the house.
- All exterior receptacles should have weather tight covers. The receptacle weather cover plate is damaged and/or missing on the west exterior wall, east exterior wall.

	plumbing components the otherwise concealed, and limited cursory and visue anticipate future events, changes in use or occup	at are buried, beneath the fou I reporting any deficiency that al survey is outside the scope <i>conditions or changes in pe</i>	mponent that is not visible and/or accessible, such as indation, located within construction voids or it does not appear or become evident during our of this inspection. <u>The inspector will not be able to</u> <i>rformance of any component or system due to</i> <i>o guarantee or warranty, express or implied, as to</i> <u>tt.</u>
$\blacksquare \Box \Box \blacksquare$	B. Drains, Wastes, and Ve	ents	

Type of drain piping material: PVC *Comments*:

• One or more of the plumbing vent stacks was damaged.

Note: The inspector could not locate the main drain line clean out on the exterior of the structure. **Note:** Due to the age of the home, cast iron pipes may be present under the foundation or other inaccessible areas of the home. It is recommended to obtain any possible information or verify with a licensed plumber on the material and condition of the drain system.

Notice: Reporting the condition of drains, wastes and vent piping that is not completely visible and/or accessible or; reporting any defect or deficiency that requires extended use of the system to develop or does not become evident during our limited cursory and visual survey is outside the scope of the inspection. This is a limited cursory and visual survey of the accessible general conditions and circumstances present at the time of this inspection. Opinions are based on general observations made without the use of specialized tools or procedures. Therefore, the opinions expressed are one of apparent conditions and not of absolute fact and are only good for the date and time of this inspection. *The inspector will not be able to anticipate future events, conditions or changes in performance of any component or system due to changes in use or occupancy. The inspector makes no guarantee or warranty, express or implied, as to future performance of any item, system or component.*

C. Water Heating Equipment *Energy Sources*:

Capacity: Comments:

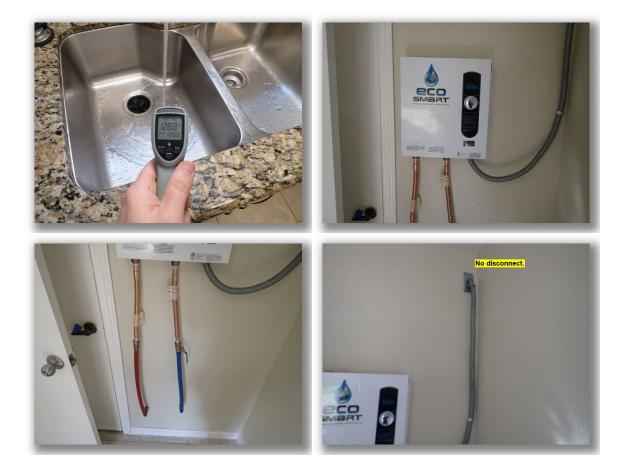

Page 45 of 56

I NI NP D				
		~		

Water Heater – Energy Source: Electric Location: Laundry Room Area Approximate Capacity: Tankless Water Heater Approximate Age: Unable To Determine Brand Name: Eco Smart

- I was unable to locate or observe a service disconnect at or around the water heater.
- There is no visible pressure relief valve in place for the water heater. This condition should be corrected to help prevent damage to the structure.

Note: The electric tankless water heater was functioning at the time of inspection. Generally, these types of electric tankless water heaters are intended to be used as "point of service" for a small amount of local faucets (i.e. a single bathroom). The water heater was observed to be installed as a whole house water heater. The water heater may not be able to provide a steady source of hot water to multiple operated faucets for an extended period of time.

I=Inspected	NI=Not Inspected	NP=Not Present	D=Deficient	
I NI NP D				

D. Hydro-Massage Therapy Equipment

Comments:

Note: There is no hydro-massage therapy equipment present at the time of inspection.

E. Gas Distribution Systems and Gas Appliances

Location of gas meter: There is no gas service to the property. *Type of gas distribution piping material:* There is no gas service to the property. *Comments*:

Note: There is no gas service to the property.

Notice: The Inspector will use a combustible gas leak detector on accessible gas lines, joints, unions and connectors and report visible deficiencies found at the time and date of the inspection. The inspector inspects the gas lines from the point they enter the structure and will complete the inspection without digging, damaging property, permanent construction or building finish. When performing the inspection, the inspector will keep in consideration the age of the system and normal wear and tear from ordinary use when rendering opinions.

The inspector is not required to and will not inspect sacrificial anode bonding or for its existence. The Inspector is not licensed to and will not perform a pressure test on the gas line system. The Inspector cannot detect gas leaks below the finished grade (underground), construction voids, between the walls or behind fireplace hearths. Propane tanks will not be inspected. If any further concerns exist about possible gas line failure and/or deficiencies or code compliance, we recommend the buyer have the gas system further evaluated by the local controlling gas supplier and/or a qualified licensed master plumber prior to the expiration of any time limitations such as option or warranty periods.

INSPECTION AGREEMENT PLEASE READ THIS AGREEMENT CAREFULLY BEFORE SIGNING

This Inspection Agreement (herein after known as the Agreement) is entered into on this day, 09/30/2023, between Jacquelyn Rysz (herein known as the Client) and A-Action Home Inspection Group LLC (herein known as the Inspector) for the purpose of performing a general property condition inspection concerning 15007 Ridingwood Dr. (herein known as the property).

I. SCOPE OF SERVICES

- A. A real estate inspection is a non-technically exhaustive, limited visual survey and basic performance evaluation of the systems and components of a building using normal controls and does not require the use of specialized equipment or procedures. The purpose of the inspection is to provide the Client with information regarding the general condition of the Property at the time of inspection.
- B. In exchange for the inspection fee (\$541.00) paid by the Client, the Inspector agrees to provide the Client with an Inspection Report setting out the Inspector's professional opinions concerning the condition of the Property further described in the report. The inspection will be performed in accordance with the Standards of Practice promulgated by the Texas Real Estate Commission. Inspector will attempt to identify major defects and problems with the Property. However, Client acknowledges that the Inspection Report may not identify all defects or problems.
- C. The inspection is limited to those items which are easily accessible, seen, viewed or capable of being approached, entered and/or operated by the Inspector at the time of the inspection as set out in the Inspection Report. The Inspector will not climb over obstacles, move furnishings or large, heavy, or fragile objects, remove walls, floors, wall coverings, floor coverings and other obstructions in order to inspect concealed items. The inspector will not turn on decommissioned equipment, systems, utility services. Systems, components and conditions which are not specifically addressed in the Inspection Report are excluded.
- D. The Inspection Report may indicate one of the following opinions of the Inspector regarding a particular item:
 - 1. The item is performing its intended function, achieving an operation, function or configuration relative to accepted industry standard practices with consideration of age and normal wear and tear from ordinary use at the time of the inspection;
 - 2. The item is in need of replacement, maintenance or repair; or
 - 3. Further evaluation by an expert is recommended.

II. INSPECTION REPORT

- A. The Inspection Report provided by the Inspector will contain the Inspector's professional, good-faith opinions concerning the need for repair or replacement of certain observable items. All statements in the report are the Inspector's opinions and should not be construed as statements of fact or factual representations concerning the Property. By signing this Agreement, the Client understands that the services provided by the Inspector fall within the Professional Services Exemption of the Texas Deceptive Trade Practices Act ("DTPA") and agrees that no cause of action exists under the DTPA related to the services provided.
- B. Unless specifically stated, the report <u>WILL NOT INCLUDE</u> and should not be read to indicate <u>OPINIONS AS TO</u>;
 - 1. the presence, absence, or risk of environmental conditions such as asbestos, lead-based paint, **MOLD**, mildew, corrosive or contaminated drywall "Chinese Drywall" or any other environmental hazard, environmental pathogen, carcinogen, toxin, mycotoxin, pollutant, fungal presence or activity, poison, presence of toxic or hazardous waste or substances;
 - 2. presence or absence of pests, termites, or other wood-destroying insects or organisms;
 - 3. <u>COMPLIANCE WITH</u> compliance with any ordinances, statutes or restrictions, <u>CODE</u>, listing, testing or protocol authority, utility sources, property association guidelines or requirements, manufacturer or regulatory requirements;
 - 4. insurability, efficiency warrantability, suitability, adequacy, compatibility, capacity, durability, quality reliability, marketability, operating costs, recalls, counterfeit products, product lawsuits, age, energy efficiency; or
 - 5. anticipate future life or future events or changes in performance of any item inspected.
- C. The Inspection Report is not a substitute for disclosures by sellers and real estate agents. Said disclosure statements should be carefully investigated for any material facts that may influence or effect the desirability and/or market value of the Property.
- D. As noted above, the Inspection Report may state that further evaluation of certain items is needed by an expert in the field of the item inspected. By signing this Agreement, Client acknowledges that qualified experts may be needed to further evaluate such items as structural systems, foundations, grading, drainage, roofing, plumbing, electrical systems, HVAC, appliances, sprinkler systems pool system and components, fire/smoke detection systems, septic systems and other observable items as noted in the report. Any such follow-up should take place prior to the expiration of any time limitations such as option or warranty periods.

III. DISCLAIMER OF WARRANTIES

The inspector makes no guarantee or warranty, express or implied, as to any of the following:

- 1. That all defects have been found or that the Inspector will pay for repair of undisclosed defects;
- 2. That any of the items inspected are designed or constructed in a good and workmanlike manner;
- 3. That any of the items inspected will continue to perform in the future as they are performing at time of the inspection; and
- 4. That any of the items inspected are merchantable or fit for any particular purpose.

IV. LIMITATION OF LIABILITY

BY SIGNING THIS AGREEMENT, CLIENT ACKNOWLEDGES THAT THE INSPECTION FEE PAID TO THE INSPECTOR IS NOMINAL GIVEN THE RISK OF LIABILITY ASSOCIATED WITH PERFORMING HOME INSPECTIONS IF LIABILITY COULD NOT BE LIMITED. CLIENT ACKNOWLEDGES THAT WITHOUT THE ABILITY TO LIMIT LIABILITY, THE INSPECTOR WOULD BE FORCED TO CHARGE CLIENT MUCH MORE THAN THE INSPECTION FEE FOR THE INSPECTOR'S SERVICES. CLIENT ACKNOWLEDGES BEING GIVEN THE OPPORTUNITY TO HAVE THIS AGREEMENT REVIEWED BY COUNSEL OF HIS OR HER OWN CHOOSING AND FURTHER ACKNOWLEDGES THE OPPORTUNITY OF HIRING A DIFFERENT INSPECTOR TO PERFORM THE INSPECTION. BY SIGNING THIS AGREEMENT, CLIENT AGREES TO LIABILITY BEING LIMITED TO THE AMOUNT OF THE INSPECTION FEE PAID BY THE CLIENT. \$541.00

V. DISPUTE RESOLUTION

In the event a dispute arises regarding an inspection that has been performed under this agreement, the Client agrees to notify the Inspector within ten (10) days of the date the Client discovers the basis for the dispute so as to give the Inspector a reasonable opportunity to reinspect the property. Client agrees to allow reinspection before any corrective action is taken. Client agrees not to disturb or repair or have repaired anything which might constitute evidence relating to a complaint against the Inspector. Client further agrees that the Inspector can either conduct the reinspection himself or can employ others (at Inspector's expense) to reinspect the property, or both. In the event a dispute cannot be resolved by the Client and the Inspector, the parties agree that any dispute or controversy shall be resolved by mandatory and binding arbitration administered by the American Arbitration Association ("AAA") pursuant to Chapter 171 of the Texas Civil Practice & Remedies Code and in accordance with this arbitration agreement and the commercial arbitration rules of the AAA.

VI. ATTORNEY'S FEES

The Inspector and the Client agree that in the event any dispute or controversy arises as a result of this Agreement, and the services provided hereunder, the prevailing party in that dispute shall be entitled to recover all of the prevailing party's reasonable and necessary attorneys' fees and costs incurred by that party.

VII. EXCLUSIVITY

The Inspection Report is to be prepared exclusively for the Client and is not transferable to anyone in any form. Client gives permission for the Inspector to discuss report findings with real estate agents, specialists, or repair persons for the sake of clarification. A copy of the Inspection Report may be released to the buyers Real Estate Agent.

BY MY SIGNATURE BELOW, I ACKNOWLEDGE THAT I HAVE READ THIS CONTRACT AND THAT THE INSPECTOR DID NOT COERCE, PRESSURE OR RUSH ME TO EXECUTE THIS CONTRACT WITHOUT OPPORTUNITY TO FULLY REVIEW THE CONTRACT AND IF NECESSARY HAVE THE CONTRACT REVIEWED BY AN ATTORNEY; THAT INSPECTOR AGREED TO RESCHEDULE THE INSPECTION IN THE EVENT I REQUIRED ADDITIONAL TIME TO REVIEW THE CONTRACT; THAT I UNDERSTAND THE TERMS AND CONDITIONS AND THAT I AGREE TO BE BOUND BY THESE TERMS AND CONDITIONS. IF CLIENT IS MARRIED, CLIENT REPRESENTS THAT THIS OBLIGATION IS A FAMILY OBLIGATION INCURRED IN THE INTEREST OF THE FAMILY.

	SCOPE OF INSPECTION	

- A. This inspection covers only the multi-family structure, primary dwelling or place of business. Sheds, detached garages, lean-tos, fences, guest houses or any other structure will not be included in this inspection report unless specifically noted in Section 5 of this report.
- Β. This inspection is limited to those parts of the structure(s) that are visible and accessible at the time of the inspection. Examples of inaccessible areas include but are not limited to (1) areas concealed by wall coverings, furniture, equipment and stored articles and (2) any portion of the structure in which inspection would necessitate removing or defacing any part of the structure(s) (including the surface appearance of the structure). **Inspection does not cover** any condition or damage which was not visible in or on the structure(s) at time of inspection but which may be revealed in the course of repair or replacement work.
- C. Due to the characteristics and behavior of various wood destroying insects, it may not always be possible to determine the presence of infestation without defacing or removing parts of the structure being inspected. Previous damage to trim, wall surface, etc., is frequently repaired prior to the inspection with putty, spackling, tape or other decorative devices. Damage that has been concealed or repaired may not be visible except by defacing the surface appearance. The WDI inspecting company cannot guarantee or determine that work performed by a previous pest control company, as indicated by visual evidence of previous treatment, has rendered the pest(s) inactive.
- If visible evidence of active or previous infestation of listed wood destroying insects is reported, it should be assumed D. that some degree of damage is present.
- E. If visible evidence is reported, it does not imply that damage should be repaired or replaced. Inspectors of the inspection company usually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of damage and any corrective action should be performed by a qualified expert.

THIS IS NOT A STRUCTURAL DAMAGE REPORT OR A WARRANTY AS TO THE ABSENCE OF WOOD F. **DESTROYING INSECTS.**

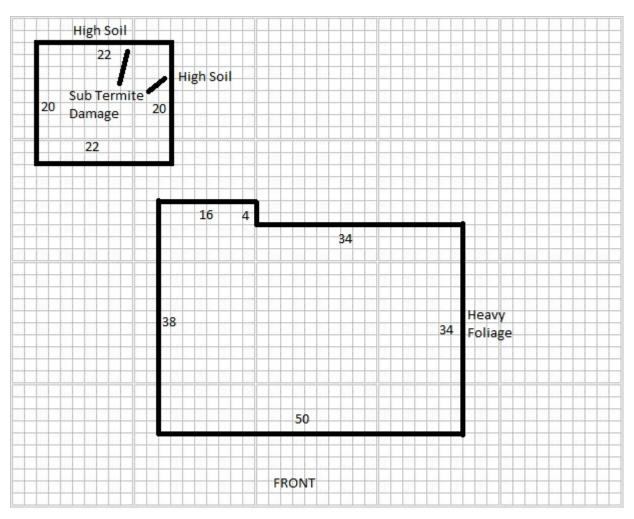

- G. If termite treatment (including pesticides, baits or other methods) has been recommended, the treating company must provide a diagram of the structure(s) inspected and proposed for treatment, label of pesticides to be used and complete details of warranty (if any). At a minimum, the warranty must specify which areas of the structure(s) are covered by warranty, renewal options and approval by a certified applicator in the termite category. Information regarding treatment and any warranties should be provided by the party contracting for such services to any prospective buyers of the property. The inspecting company has no duty to provide such information to any person other than the contracting party.
- H. There are a variety of termite control options offered by pest control companies. These options will vary in cost, efficacy, areas treated, warranties, treatment techniques and renewal options.
- Ι. There are some specific guidelines as to when it is appropriate for corrective treatment to be recommended. Corrective treatment may only be recommended if (1) there is visible evidence of an active infestation in or on the structure, (2) there is visible evidence of a previous infestation with no evidence of a prior treatment.
- J. If treatment is recommended based solely on the presence of conducive conditions, a preventive treatment or correction of conducive conditions may be recommended. The buyer and seller should be aware that there may be a variety of different strategies to correct the conducive condition(s). These corrective measures can vary greatly in cost and effectiveness and may or may not require the services of a licensed pest control operator. There may be instances where the inspector will recommend correction of the conducive conditions by either mechanical alteration or cultural changes. Mechanical alteration may be in some instances the most economical method to correct conducive conditions. If this inspection report recommends any type of treatment and you have any questions about this, you may contact the inspector involved, another licensed pest control operator for a second opinion, and/or the Structural Pest Control Service of the Texas Department of Agriculture.

Sharpeye Pest Control Additional Statements Included in the Scope of Inspection / Agreement that are not Promulgated by the Structural Pest Control Service

- A. This inspection is only good for the date and time of the inspection. Sharpeye Pest Control, its Inspectors, employees and agents will not guarantee or warrant the absence of any wood destroying insect. Due to the characteristics and behavior of various wood destroying insects, the insects may not be visible or detectable on the date and time of the inspection. Even with the best inspection, termites can remain hidden and unnoticed for a long period of time. Swarming of wood destroying insects can occur in a short amount of time and may by the first signs of the presence of wood destroying insects that were not detectable at the time of the original inspection. If swarming occurs after the date and time of the original inspection and active wood destroying insects were not detectable at the time of the original inspection. Sharpeye Pest Control, its Inspectors, employees and agents cannot be liable for the non-detectable infestation and will not assume any liability for corrective actions needed and will not assume liability for non-detectable wood damage.
- B. Sharpeye Pest Control Standard Operational Inspection Procedures: The Inspector will perform a visual inspection of the visible and accessible foundation perimeter beam (slab-on-grade foundation), visual inspection of the visible and accessible exterior perimeter beam and accessible interior perimeter beam and piers (pier-&-beam foundation), probe visible and accessible exterior wood for active or signs of previous activity of a wood destroying insects, visual inspection of the structures accessible interior walls, ceiling, baseboards and cabinetry and visual inspection of the accessible areas of the attic.

The inspector will not deface the structure, cut holes, remove panels, pull back carpet, lift floor treatments, cut holes in the floors, wall or ceilings, move boxes, furniture, personal items or effects. The inspector will then complete this WDIR using the SPCS required standards for completing this form. These standards can be provided to you upon request.

- C. Additional Information from Sharpeye Pest Control. AREAS OF POTENTIAL NON-VISIBLE WOOD DESTROYING INSECT ACTIVITY AREAS ARE LISTED BUT NOT LIMITED TO THE FOLLOWING: In the wall voids at the bathroom bathtraps and shower stalls/enclosures, plumbing penetrations within the construction wall voids, below high soil lines, behind heavy foliage, non-visible slab joints, non-visible slab cracks, under and/or behind decks and/or raised patios, behind cosmetic repairs of the foundation beam, within sill plates and between sub-floors and any other area that the Inspector marks as inaccessible in section 6B of this report. Sharpeye Pest Control and its Inspectors, employees and agents will not assume any liability for active infestation of a wood destroying insect that is not visible and/or accessible to the Inspector at the time of the original inspection.
- D. The Inspector will do his/her best to access and to inspect all accessible and visible areas and/or components of the structure. This inspection is only good for the date and time of this inspection and Sharpeye Pest Control, its Inspectors, employees and agents will not assume any liability for non-accessible areas and non-visible wood destroying insects. If for any reason you are unhappy with the performance of the Inspector, his/her findings or unwilling to accept the scope of this inspection. Sharpeye Pest Control will be more than happy to refund to you the cost of this inspection within ten business day's from the date of the original inspection. The refund is contingent on you surrendering all copies of this inspection report back to Sharpeye Pest Control and you releasing Sharpeye Pest Control, its employee and its agents from all future liabilities to the inspected property. This refund cannot be made if the report has already been used to close on a real estate transaction.

WOOD-DESTROYING INSECT INSPECTION AGREEMENT

This is a Wood-Destroying Insect Inspection Agreement ("Agreement") between Sharpeye Pest Control ("INSPECTION COMPANY") and the undersigned client **Jacquelyn Rysz** ("CLIENT"), collectively referred to herein as the "PARTIES." CLIENT agrees to employ the INSPECTION COMPANY to perform a wood-destroying insect inspection as set forth below.

- 1. Property Address. The address of the property to be inspected is: 15007 Ridingwood Dr. Missouri City, TX 77489 ("Property").
- 2. Fee. The fee for the inspection service has been included in the cost of the home inspection to be performed by A-Action Home Inspection Group, LLC. By signing this Agreement, Client acknowledges that A-Action Home Inspection Group, LLC and Sharpeye Pest Control are separate and distinct entities.
- 3. **Purpose.** The purpose of the inspection is to attempt to detect the presence of wood-destroying insects by performing a visual inspection of the Property without removing or defacing any part of the structure.

4. Scope of Inspection.

- A. The inspection covers only the multi-family structure, primary dwelling or place of business. Sheds, detached garages, lean-tos, fences, guest houses or any other structure will not be included in this inspection.
- B. The inspection is limited to those parts of the structure that are visible and accessible at the time of the inspection. Examples of inaccessible areas include, but are not limited to, the following: (1) areas concealed by wall coverings, furniture, equipment and stored articles and (2) any portion of the structure in which inspection would necessitate removing or defacing any part of the structure(s) (including the surface appearance of the structure). The inspection does not cover any condition or damage which was not visible in or on the structure(s) at time of inspection but which may be revealed in the course of repair or replacement work.
- C. Client understands and agrees that due to the characteristics and behavior of various wood destroying insects, the inspection may not detect the presence of infestation because the Inspection Company is unable to deface or remove parts of the structure being inspected. Client understands that often, previous damage to trim, wall surface, etc., is frequently concealed with putty, spackling, or other decorative material. Therefore, wood-destroying insects are often not discoverable until sheetrock or other coverings are removed.
- D. If visible evidence of active or previous infestation of wood destroying insects is reported, it should be assumed that some degree of damage is present.
- E. If visible evidence is reported, it does not imply that damage should be repaired or replaced. Inspectors of the inspection company usually are not engineers or builders qualified to give an opinion regarding the degree of structural damage. Evaluation of damage and any corrective action should be performed by a qualified expert.
- F. THE INSPECTION IS NOT A STRUCTURAL DAMAGE INSPECTION OR A WARRANTY AS TO THE ABSENCE OF WOOD DESTROYING INSECTS.
- 5. **Report.** The CLIENT will be provided with a written report of the INSPECTION COMPANY's visual observations and opinions. The Inspection Report provided by the Inspector will contain the Inspector's professional, good-faith opinions. All statements in the report are the Inspector's opinions and should not be construed as statements of fact or factual representations concerning the Property. By signing this Agreement, the Client understands that the services provided by the Inspector fall within the Professional Services Exemption of the Texas Deceptive Trade Practices Act ("DTPA") and agrees that no cause of action exists under the DTPA related to the services provided.
- 6. **Exclusivity.** The report is intended for the sole, confidential and exclusive use and benefit of the CLIENT and the INSPECTION COMPANY has no obligation or duty to any other party. INSPECTION COMPANY accepts no responsibility for use by third parties. There are no third party beneficiaries to this Agreement. This Agreement is not transferable or assignable.

7. LIMITATION OF LIABILITY.

IT IS UNDERSTOOD THE INSPECTION COMPANY IS NOT AN INSURER AND THAT THE INSPECTION AND REPORT SHALL NOT BE CONSTRUED AS A GUARANTEE OR WARRANTY OF ANY KIND. BY SIGNING THIS AGREEMENT, CLIENT ACKNOWLEDGES THAT THE INSPECTION FEE PAID TO THE INSPECTION COMPANY IS NOMINAL GIVEN THE RISK OF LIABILITY ASSOCIATED WITH PERFORMING WOOD-DESTROYING-INSECT INSPECTIONS IF LIABILITY COULD NOT BE LIMITED. CLIENT ACKNOWLEDGES THAT WITHOUT THE ABILITY TO LIMIT LIABILITY, THE INSPECTION COMPANY WOULD BE FORCED TO CHARGE CLIENT MUCH MORE THAN THE INSPECTION FEE FOR THE INSPECTOR'S SERVICES. CLIENT ACKNOWLEDGES BEING GIVEN THE OPPORTUNITY TO HAVE THIS AGREEMENT REVIEWED BY COUNSEL OF HIS OR HER OWN CHOOSING AND FURTHER ACKNOWLEDGES THE OPPORTUNITY OF HIRING A DIFFERENT INSPECTOR TO PERFORM THE INSPECTION. BY SIGNING THIS AGREEMENT, CLIENT AGREES TO LIABILITY BEING LIMITED TO THE AMOUNT OF THE INSPECTION FEE (\$541.00) PAID BY THE CLIENT OR \$500.00, WHICHEVER IS GREATER. THE CLIENT AGREES TO HOLD THE INSPECTION COMPANY AND ITS RESPECTIVE OFFICERS, AGENTS AND EMPLOYEES HARMLESS FROM AND AGAINST ANY AND ALL LIABILITIES, DEMANDS, CLAIMS, AND EXPENSES INCIDENT THERETO FOR INJURIES TO PERSONS AND FOR LOSS OF, DAMAGE TO, DESTRUCTION OF PROPERTY, COST OF REPAIRING OR REPLACING, OR CONSEQUENTIAL DAMAGE ARISING OUT OF OR IN CONNECTION WITH THIS INSPECTION.

- 8. **Disclaimer of Warranties.** The Inspector makes no guarantee, warranty or promise, express or implied, that all signs of past or present termite infestation have been found or that the Inspector will pay for treatment or cost of repairs.
- 9. **Dispute Resolution.** In the event a dispute arises regarding an inspection that has been performed under this agreement, the Client agrees to notify the Inspector within ten (10) days of the date the Client discovers the basis for the dispute so as to give the Inspector a reasonable opportunity to re-inspect the property. Client agrees to allow re-inspection before any corrective action is taken. Client agrees not to disturb or

repair or have repaired anything which might constitute evidence relating to a complaint against the Inspector. Client further agrees that the Inspector can either conduct the re-inspection himself or can employ others (at Inspector's expense) to re-inspect the property, or both. In the event a dispute cannot be resolved by the Client and the Inspector, the parties agree that any dispute or controversy shall be resolved by mandatory and binding arbitration administered by the American Arbitration Association ("AAA") pursuant to Chapter 171 of the Texas Civil Practice & Remedies Code and in accordance with this arbitration agreement and the commercial arbitration rules of the AAA.

- 10. <u>Attorney's Fees.</u> The INSPECTION COMPANY and CLIENT agree that in the event any dispute or controversy arises as a result of this Agreement, and the services provided hereunder, the prevailing party in that dispute shall be entitled to recover all of the prevailing party's reasonable and necessary attorneys' fees and costs incurred by that party.
- 11. Entire Agreement. This Agreement represents the entire agreement between the PARTIES. No statement or promise made by the INSPECTION COMPANY or its respective officers, agents or employees shall be binding.

BY MY SIGNATURE BELOW, I ACKNOWLEDGE THAT I HAVE READ THE FOREGOING CONTRACT; THAT I UNDERSTAND THE TERMS AND CONDITIONS AND THAT I AGREE TO BE BOUND BY THESE TERMS AND CONDITIONS. IF CLIENT IS MARRIED, CLIENT REPRESENTS THAT HE OR SHE HAS BEEN AUTHORIZED TO ENTER INTO THIS AGREEMENT ON BEHALF OF HIS OR HER SPOUSE AND/OR OTHER FAMILY MEMBER(S).
