925 Kaechele Road

Showing Instructions

To schedule showing, please text Gabriela at 979-446-1893. You will receive the gate combination to the land you are showing at that time. When scheduling, make sure to text your email address to Gabriela and she will have the listing agent send you interactive mapping for the land which is very helpful when showing.

Answers to FAQ

- 1) None of the tracts are in a designated FEMA Flood plain.
- 2) Land currently holds a grazing ag exemption.
- 3) All tracts have newly built 5-wire barbed perimeter fencing.
- 4) All tracts have culverted entry drives and gate.
- 5) Electric Utility service is from Centerpoint. New owners will arrange to have line and meter installed onto their tract. Expect \$200-\$225 for installation of meter on individual tracts (information from SBB tract 4 owner).
- 6) It is the country, so sewer is by aerobic septic systems and new installations have been quoted by several very reputable companies at approx. \$10,000 fully installed.
- 7) Water is by potable water well. The land has very good aquifers. Potable water wells are generally in the depth range of 175 to 200 feet. Installing a potable water well system is comparatively low cost at approximately \$9,000 to \$10,000 installed with all surface equipment included. It is reported that the water quality in this area is very high due to the aquifers and high sand volume in the sub surface strata.
- 8) Land that has shallow channeling on it can be advantageous to those that may desire to install a pond or other water feature on one's land. The channeling helps capture the lands water shed to fill and maintain ponds or similar water features.
- 9) Pastures have an overall mix of improved and native grasses.
- 10) There are light restrictions that convey with land tracts, primarily nuisance restrictions and mobile homes are not allowed. You can find the CCRs restrictions on the Listing supplements. Please review prior to showing.
- 11) Seller Financing is available. See Seller Financing Option Documents on MLS supplements.

Contracting Instructions

We recommend using the Unimproved Property Contract or the Farm and Ranch Contract.
