***If Buyer is concerned about these matters, Buyer may consult Information About Flood Hazards (TXR 1414).**

For purposes of this notice:

"100-year floodplain" means any area of land that: (A) is identified on the flood insurance rate map as a special flood hazard area, which is designated as Zone A, V, A99, AE, AO, AH, VE, or AR on the map; (B) has a one percent annual chance of flooding, which is considered to be a high risk of flooding; and (C) may include a regulatory floodway, flood pool, or reservoir.

"500-year floodplain" means any area of land that: (A) is identified on the flood insurance rate map as a moderate flood hazard area, which is designated on the map as Zone X (shaded); and (B) has a two-tenths of one percent annual chance of flooding, which is considered to be a moderate risk of flooding.

"Flood pool" means the area adjacent to a reservoir that lies above the normal maximum operating level of the reservoir and that is subject to controlled inundation under the management of the United States Army Corps of Engineers.

Concerning the Property at _____

"Flood insurance rate map" means the most recent flood hazard map published by the Federal Emergency Management Agency under the National Flood Insurance Act of 1968 (42 U.S.C. Section 4001 et seq.).

"Floodway" means an area that is identified on the flood insurance rate map as a regulatory floodway, which includes the channel of a river or other watercourse and the adjacent land areas that must be reserved for the discharge of a base flood, also referred to as a 100-year flood, without cumulatively increasing the water surface elevation more than a designated height.

"Reservoir" means a water impoundment project operated by the United States Army Corps of Engineers that is intended to retain water or delay the runoff of water in a designated surface area of land.

Structural Inspection & Evaluation of Foundation @ 3300 Lewisburg Court, Bryan,
Texas

Performed by Jimmy D. Dunham, P. E.
October 20, 2021

BACKGROUND

The single-family residence @ 3300 Lewisburg Court in the Green Oaks sub-division of Bryan is supported by a concrete slab on grade foundation.

The concrete slab was constructed approx. 2016 with approx. dimensions of 57' width (facing Lewisburg Court) x 75' long.

PURPOSE

The purpose of the inspection was to evaluate the structural soundness of the foundation.

PROCEDURE

The structure's foundation was visually inspected using measuring tapes, a carpenter level and a zip level device.

INSPECTION RESULTS

1. The visible portion of the concrete foundation above grade is in good condition. No deterioration was evident.
2. Minor corner cracks and voids with exposed aggregate (honeycomb) were observed in the concrete but are not structurally significant.
3. A level survey of the foundation's brick ledge had the following results:
 - a. The South side facing Lewisburg Court is level.
 - b. The North side facing the pool has a 0.50" drop from West to East which equates to a 0.07% slope.

The Texas Real Estate Commission requires to provide the following documents:

Subject: Pool Inspection

Good afternoon!

Thanks for sending me the inspection report regarding the results of the pool at [3300 Lewisburg Court](#) in Bryan.

I have been by the property to look into and address a few of these issues.

-I have secured the grounding wire to the heater, automation panel, and pumps. These have been completed and are of no risk.

-The handheld remote is now functioning properly. It inly needed two new AA batteries.

-The spa light did not work but it is possible a bulb could replace this. If not, a fixture replacement is the only option. The prices of these repairs is about where they normally land for each.

-The autofill on the side of the pool has been slightly lowered to not be above the drain grate in the tile line. However, it would not matter as the pool has a ball valve attached to the drain line so as to allow the water to stay higher than the drain grate allows. This can easily be opened with no repairs needed. This is not a concern That is relevant.

-The plaster condition is quite average for this point in the lifespan of white plaster. The small fractures in the places mentioned are aesthetic and not indicative of a leak and or a problem.

-The pool does have an expansion line between the coping and the deck. The joint is of the same gap now that it has been for several years and is of no risk at this point. It can be filled with mastic at any time.

-The water chemistry and the picture pointing to the discoloration inside the skimmer box is of absolutely no concern. That line and result can vary depending on the landscaping around each pool. The water test report showed that chlorine was high and PH and alkalinity were high based on a test strip. We use Spin-Lab centrifuge based UV tests. I would take the results from that far before that of a test strip. The results are below. The pool needs about a half gallon of acid, which is very average for a pool being serviced once per week.

Please let us know if you have any questions regarding the inspection report.
