

25 Kenle Lane

Trees We Love

- Mimosa
- Peach
- Gum
- Pin Oak
- Pine
- Maple

Wildlife We Love

- Owls
- Herron
- Frogs & Turtle in the pond
- Loggerhead Turtle
- Fish
- Tree Ducks
- Deer (love to sleep near the pond)
- Monarch Butterflies
- Hummingbirds
- Hummingbird Moths
- Cardinals
- Blue Jays
- Sparrows
- Orale
- Red Breasted Hawks (love to hang out near the pond)

A Note from the Owners

- I enjoy sitting on the front porch in the evening and watching the hummingbirds chase each other before going to bed in the mimosa tree. Then watching the hummingbird moths come out to fly around the mimosa tree. Both are attracted to the flowering mimosa tree. Then once it starts to get really dark, we see the lightning bugs come out. There is not a lot, but we have caught one. I keep trying to figure out how to "grow" them. We stopped using lawn insecticide in the front because I think it was hurting them. We only use ant killers on the ant beds.
- We have two deer feeders on the property, and have moved them around. We've had someone bow hunt in the trees. However, these are not city deer, they do not come close to the house and eat the flowers.
- I enjoy sitting on the back porch swinging, in the mornings. The dew on the trees is really pretty when it comes off as the sun warms it up, the mist in the trees slowly rises. It's a great place to talk to God and listen for His answer. I am really going to miss living out there, it does seem like heaven all tucked back away from neighbors.
- I also enjoy how well insulated my house is. It stays cold in the summer and warm in the winter.
- Hosting! It is great for hosting parties or gatherings. We had 5 tables in the living room for Thanksgiving and it was not crowded. The garage area and covered carport allow us to host even if it is raining. For my son's graduation, we had close to 50 people plus. Plenty of room. The kitchen has so much counter space, it is easy to lay everything out and allow people to serve themselves.
