

*Most favorite things we enjoy about our home!*

- The quiet cul-de-sac where children can play outside.
- Great friendly neighbors and a feeling of community – need your trash cans brought up or to borrow something, they are always willing to help!
- High ceilings in the home make all the areas feel spacious and luxurious.
- The open flow between the kitchen, living, and breakfast area creates a feeling of connectedness.
- Built in shelving and cabinets provide places to display meaningful memorabilia from family and travels (and extra storage too).
- Versatile floor plan – we used the formal dining room as a children’s playroom.
- The flexible fourth bedroom connected to the master was originally our exercise room before our second child came and then conveniently became the nursery.
- The large master bath with soothing colors, natural light, and soaker tub.
- Tall mature trees and shaded back porch make home feel private and the summer days about 10 degrees cooler.
- Detached garage with attic provided ample storage for all our outdoor hobbies.
- Garden area behind the garage is the perfect location with moderate sunlight to grow your favorite herbs and vegetables.
- Outdoor low voltage lighting keeps the front and back of the house lit up at night.
- Sprinkler system with updated control panel keeps the grass and plants growing during the hot summer days.
- Driveway is perfect for a future basketball goal or other kids’ activities.
- The outdoor shed behind the house is great for lawn equipment storage.
- Excellent location near restaurants, shopping, and parks. There are at least six parks within walking distance of the house.
