Spring, TX 77380 United States

Description of Work

This estimate includes the replacement of the gas valve and supply line for the homes water heater. It also includes resealing the union on the main gas line going into the home. Job will include a 1 Year Warranty On Parts and Labor.

This is not a guarantee that there are no more present gas leaks in this home. This will resolve the current ones we have found, and we will retest after making these repairs.

We returned to home and pressurized system back up to 11 psi and checked for leaks. We found a very small leak on the union coming from the out side to inlet. We unsoldered old and leaking union and installed new solder union in its place with new nipple as well. Once finished we repressurized the system and the gauge did not drop further. We believe all leaks to be fixed now. We will need to get gas back on to home to further test if there are any further issues but at this time the gas system is holding 10 psi.
