*"Floodway" means an area that is identified on the flood insurance rate map as a regulatory floodway, which includes the channel of a river or other watercourse and the adjacent land areas that must be reserved for the discharge of a base flood, also referred to as a 100-year flood, without cumulatively increasing the water surface elevation more than a designated height.*

*"Reservoir" means a water impoundment project operated by the United States Army Corps of Engineers that is intended to retain water or delay the runoff of water in a designated surface area of land.*

**Repairs or treatments** - When house was remodeled in 2014, we suspected that there may have been a mold problem related to a leaky shower in the primary bathroom. We are unaware if any mold was present; however, any mold would have been removed given that the bathrooms were completely gutted and rebuilt as part of a broader remodel of house. In 2024, several air conditioning vents appeared to have mildew. This was determined to be the result of condensation on the vents. The ducts were professionally reattached to the housings to prevent condensation from occurring, and the vents and ducts were professionally cleaned at that time.
