

GENERATOR OPERATION

This 7500 watt portable generator will operate the entire home however it will not run high load appliances simultaneously such as the AC system, clothes dryer and the electric oven. Please select only 1 at a time while using the generator.

It is dual fuel and uses gasoline or propane.

1. Position generator outside the garage
2. Connect supplied cable to generator and plug into outlet in garage
3. Turn off main breaker in exterior panel – labeled
4. Start generator and switch on 60 A breaker in garage panel
