If the inspector notes visible evidence of active or previous infestation or damage during the inspection of this property, it is highly probable that hidden damage exists in the structure and a licensed building contractor for damage should evaluate the property. This Inspection/Treating Report is based on visible evidence of readily accessible areas and does not attempt to reveal damage, which may be present. No attempt to remove insulation, wall coverings, floor coverings, ceilings, etc. to search for hidden damage was made. This Inspection/Treatment Report may be updated at the time of treatment or re-inspection.
